MESSAGE FROM THE PRESIDENT

Musings at the Winter Solstice - Michael Berrigan

We are nearing the winter solstice and I am reminded of the shortened days in which to get everything done. For me, this year was a blur, with comings and goings, crises and solutions, celebrations, welcomes and goodbyes. We all have low points, times where a kind word helps us through, or a note from far away rekindles the glow within us to keep going. We all have high points, where nothing can be better than that moment and we would like to keep it that way forever. And there are the times between - times to reflect and to follow through and to plan. I am firmly in that spot now.

At this lull, I can reflect on my daffodil plantings, seeds of hope and remembrance which will grow and bloom when more temperate conditions allow. Many months will pass before we can enjoy our flowers outside. We can, however, enjoy the correspondence and camaraderie of other daffodil enthusiasts through the tools available from the [American Daffodil Society](#).

"[Daffnet](#)" is a pain-free web page providing more reading on daffodils than can be found in any other location. Try it at <http://daffnet.org/>. The web page has postings divided by topics arranged along the top of the home page. You can display many articles on topics that you preselect or search. Within a few keystrokes, one can see postings on dozens of subjects. One can also look up articles with any keyword you choose to search by.

This fall, I had the opportunity to visit the South Island of New Zealand and attend the World Daffodil Convention. I will write about it at length in the future. It was nice to see a place where a daffodil planted in the 1880's could still be flourishing, and could be left to grow and multiply without care for generations.

When I returned to our dry fall, I fretted about the lack of rain and assembled a dozen hoses to get water to the furthest reaches of my plantings. I went home at lunch to move hoses and sprinkler heads. I spent hours watering and looking at the long range weather report, only to get up early and move hoses again.

I next worried about how fast the ground would freeze and the lack of snow cover, and found a source of wheat straw. The bales were from failed crops that grew but did not fill out. This seedless straw could not infect my beds with weeds, so was a perfect mulch and insurance against a harsh winter. Once the straw was spread, a light rain cemented it in place and I was ready to catch up in the greenhouse.

I potted bulbs for forcing so I can collect the pollen for hybridizing, and bulb orders that came too late to risk planting out of doors. Giant amaryllis bulbs seemed to get larger with each store where I saw them, until finally I had to go buy more pots (plus just a few more bulbs of Grand Soleil d'Or)!

Grand Soleil d'Or - great for forcing in our climate

An idle comment from my daughter that she likes hyacinths resulted in the purchase of clearance bulbs, plus a few crocuses to fill them out. The greenhouse is now full of pots that will bloom until the flowers of spring propel me outside again. The greenhouse contains wonders from far continents and exotic places that I hope one day to visit, but am more likely to visit only vicariously.

I realize that the daffodil hobby's excuse is the flowers, but in fact the allure is the people. I also saw this fall that our hobby is not even that odd, as exemplified by four different groups at the same large convention center where I was on a recent weekend. I have ranked the groups in order of "least" to "most" odd: 1 - the Vanderbilt high school 1962 class reunion, 2 - The American Daffodil Society Fall Board meeting, 3 - the Nashville Bodybuilders Association fall competition and banquet, and 4 - the Furry anthropomorphic Nashville gathering (yes, there is a website!). I left convinced that my hobby is not so odd after all! I had not expected that a group could impose rules on its members, written or not, such as that slit skirts were expected attire at breakfast, or no leash play in the halls! Any of our rules that seem odd or puzzling to an outsider seem tame by comparison.

I wish you all a happy, healthy, and safe holiday season. I hope to see you in 2013! Michael Berrigan
