INTRODUCTION

*Award of American Daffodil Society Gold Medal 1993
for hybridisation of Narcissus.*

In late 1995 we handed over the bulk of the stock of our older named cultivars to Nial Watson a new entrant into the charmed circle of daffodil hybridists who is now growing them on his farm near us, beautifully sited on Ringhaddy Sound in Strangford Lough.

He is already a successful exhibitor at our Northern Ireland Daffodil Group Shows, and a well qualified horticulturalist who raises a large and varied range of what are for Northern Ireland exotic vegetables such as pumpkins, courgettes, cherry tomatoes, and culinary herbs as well as market crops.

In the last few years he has already made a series of narcissus crosses, largely from selected cultivars of Brian Duncan's and Kate Reade's raising, as well as from our own things.

In 1996 onwards he will be providing bulbs of many of our named catalogued cultivars to supplement our Ballydorn stocks. His bulb stocks have all been put through hot water treatments here before planting, and are being grown according to our established procedures.

This year we introduce four new weatherproof cultivars that promise well, after early successes on the show bench for three of them.

- We have forecast a £ sterling/US \$ exchange rate of \$1.50, and will as always make good any exchange rate difference with extra bulbs.

- Payment must be by cheque or post office money order payable in London in £ sterling or US \$, and early orders are recommended, and rewarded by extra bulbs.

Payment: New customers are asked to make payment with order and to add the cost of postage, allowing for free bulbs.

CHOICE NEW DAFFODILS

ARRANGEMENT OF LIST, AND CODING SYSTEM

The list has been arranged in alphabetical order with the Division and Classification of each cultivar shown in the margin. The classification is in accordance with the Revised System adopted by the R.H.S. Colours are abbreviated as follows:

w—white or whitish; g—green; y—yellow; p—pink; o—orange; r—red.

For the purpose of description, the daffodil flower is divided into perianth, and corona. The perianth is described by the first letter following the number of the Division to which the cultivar belongs.

The corona is treated as having three zones: An eye zone, a mid-zone and an edge or rim. The description of the corona is separated from the description of the perianth by a hyphen and the letter then following the hyphen describes the corona colour starting with the eye zone. If however the corona is of a single colour, only a single letter of the colour code is used to describe it.
