'There is a season, turn, turn, turn . . .'

be totally uneconomic. In short, *it is now our firm resolve to accept orders of any size.*

Society frowns, however, on blowing one's own trumpet, although we have heard it said that if we don't do it, nobody else will! So, let us go back to our quotation. I have always been fascinated by the changing seasons, and now that catalogue time is here again, I have been reflecting on the fact here on the nursery, winter is curiously absent. Living in the West Country has something to do with it, but I have never heard anyone speak of winter flowering crocuses, for example. Yet *C. tournefortii*, *C. niveus*, and *C. laevigatus fontenayii*, blooming as they do in October, November and December are definitely winter flowering. So too are the January flowering *C. imperati*, and the more traditionally named Spring crocuses, like *C. chrysanthus*, which start in February.

I wish I had both the space and the time to develop my argument a little more fully, but alas! I haven't. There is only enough of both, to make one customer happy. Running a very personal business is sometimes rather difficult, but when I am asked to publish a photograph, so that 'customers may have someone with whom to identify', who am I to refuse?

Happy Gardening!

LORD SKELMERSDALE

LEUCOJUM (*Snowflakes*)

Leucojums behave very like Snowdrops (*Galanthus*) and Cyclamen. We are no longer offering them as dry bulbs in the autumn, but as growing plants in the spring. You will find them in our Main Spring List, published in January every year.

MUSCARI (*Grape Hyacinth*)

Free-flowering and attractive spring bulbs which grow and increase rapidly. They may be planted in full sun although they do well in partial shade. Ideal for the rockery and for brightening a dark corner. Plant 3" deep and 3" apart to allow room for them to spread.

AMBROSIACUM. A very distinctive Muscari with beautiful scented flowers. Lilac at the top and creamy-white below.

ARMENIACUM. Beautiful large flowers of deep cobalt-blue with a white rim. Makes a fine effect when planted with other bulbs or shrubs. Picture back cover.

ARMENIACUM BLUE SPIKE. Enormous heads of rich blue giving a massive display over a long period.

ARMENIACUM CANTAB. Very pretty bright Cambridge blue flowers on short sturdy stems.

BOTRYOIDES. An exceptional variety of sky-blue on short stems. Never an embarrassment through too much spreading.

BOTRYOIDES ALBUM. A very attractive pure white form of botryoides, sometimes called Pearls of Spain. Sweetly scented.

COMOSUM PLUMOSUM. Feathery violet blooms. Long lasting and good for cutting. Most unusual.

NEGLECTUM. An unusual scented variety with blackish-blue flowers with a distinct white rim.

PARADOXUM. Large broad spikes of blackish-blue flowers, green tinged inside. Robust and regal in appearance.

TUBERGENIANUM. The Oxford and Cambridge Muscari. The top half of the flower is light blue and the lower half dark blue. Very striking for mass planting.

NARCISSI (DAFFODILS)

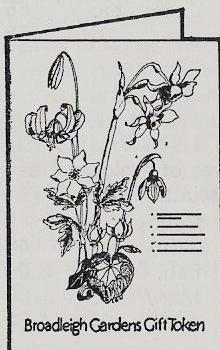

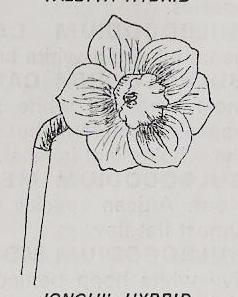

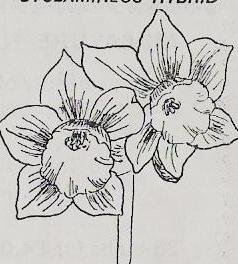

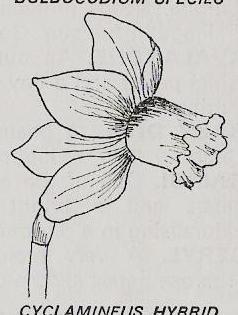

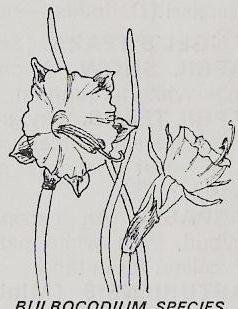

A daffodil is probably one of the easiest and least demanding of plants to grow. Normally when a bulb is planted it will come up and flower, provided that an unbalanced fertilizer is not put on. Fertilizers containing an excess of nitrogen should be avoided, as should manure. However, the species do need more understanding and care and must be treated with the respect accorded to most plants in the garden. If they are happy they will become established and multiply.

The varieties we offer vary from 3" to 18" in height. Only a few are species and are clearly marked as such. The remainder are hybrids, being crosses between small species and larger-flowered varieties and, as normally happens, the hybrids have more vigour and adaptability. The hybrid daffodils which we list will grow almost anywhere, but this only applies to a very few of the species, many of which are alpines and need treatment, especially drainage, suitable for these subjects. Species daffodils may be seen all over the high ground in Spain and Portugal, where *N. asturiensis*, *bulbocodium*, *rupicola* and *triandrus* are found growing through the melting snow like *Crocus* in the Alps.

The *jonquils* however seem to like places where the soil is often heavy and where they get a thorough baking in summer. Few of the *tazetta* group are hardy in this country and then only in unusually warm spots — in other words their growth is restricted to south of a line from the Severn to the Wash. However, together with the North African species, they will grow well if brought in to a cold house by the middle of November but *not forced*.

The *bulbocodiums* grow almost all over the Iberian peninsula in varying conditions from marshland to dry road verges. When grown in this country it is found that those which increase by seed flower well but those whose bulbs split are likely to be flowerless after a few years. These trends can only be found out by experience as they seem to vary from garden to garden. Many of the *triandrus* family, all of which need good drainage, flower in partial shade, often on northern slopes.

Many people like to grow *daffodils* in grass. However it should be remembered for this form of naturalising that the bulbs should be planted 6" deep — in other words rather deeper than usual — and the grass should not be mown until after the leaves have died down. Many of the hybrids we list are suitable for this purpose, especially *February Silver*, *Peeping Tom*, *February Gold*, *Beryl* and the *poeticus* varieties. Also of course the wild daffodil of northern Europe, now called *pseudo narcissus*. Many of the smaller hybrids are better grown in the border and rock garden where their daintiness can be appreciated to the full.

BROADLEIGH GIFT TOKEN

Our unique and very popular Gift Tokens, drawn and designed by Lady Skelmersdale, make ideal presents for gardeners. Tokens to any value. Add 10p for a handling charge.

Narcissi (Daffodils)—continued

	Height	Flowers	£	p
ANGEL'S TEARS. (See <i>triandrus albus</i>)		Early	ea.	13
APRIL SNOW. A charming large-cupped variety, milk-white throughout. Excellent for pots.	9"	April	10	1.15
APRIL TEARS. Very graceful hanging blooms, several to each stem. Golden-yellow with a slightly paler cup. Like most <i>triandrus</i> needs a well-drained, sunny position.	7"	April	ea.	18
			10	1.60
ASPASIA. An exceptional multi-flowered tazetta hybrid, with white petals and a small yellow cup. Excellent for cutting.	15"	Mar./ April	ea.	15
			10	1.35
ASTURIENSIS (Minimus). The smallest species daffodil. Needs protection from slugs and very good drainage in full sun. Golden-yellow.	3"	Feb.	10	50
			100	4.50
avalanche. An outstanding tazetta hybrid, with white petals and a tiny lemon coloured cup. Good for cutting.	15"	Mar./ April	ea.	15
			10	1.35
BABY DOLL. A beautiful little cyclamineus hybrid. Lemon-yellow throughout.	9"	Late Mar.	ea.	25
			10	2.25
BAMBI. One of the earliest to flower, it has white petals and a bright yellow trumpet. Good for naturalising in a dry position.	6"	Feb.	ea.	11
			10	1.00
			100	9.00
BERYL. A very prolific cyclamineus hybrid with primrose petals and an orange cup. Most attractive.	8"	Late Mar.	ea.	18
			10	1.60

			10	80
			100	7.20
BULBOCODIUM ROMIEUXII. One of the gems of the group, with a large, widely flaring pale lemon-yellow cup.	5"	Feb.	ea.	16
			10	1.45
BULBOCODIUM TENUIFOLIUS. A very dwarf golden hoop petticoat with prostrate foliage.	3"	Feb.	ea.	15
			10	1.35
BULBOCODIUM VULGARIS CONSPICUUS. A rather more robust variety with deep yellow flowers. Increases rapidly.	5"	Late Mar.	100	4.50
BULBOCODIUM VULGARIS NIVALIS. A tiny hoop petticoat with a narrow yellow trumpet.	2"	Jan.	100	4.50
CANARY BIRD. A nice, very prolific multi-headed poetaz with canary-yellow petals and an orange cup.	12"	Late Mar.	10	8.10
CHARITY MAY. An exceptionally beautiful cyclamineus hybrid of soft clear yellow with delicate swept back petals.	15"	Late Mar.	10	1.80
CHARLES WARREN. A most unusual dwarf yellow trumpet daffodil with twisted petals.	5"	Early Mar.	10	4.50
CHERIE. An exquisite small-flowered jonquil with a delicate pink cup and white petals.	15"	Late Mar.	10	1.45
CHINITA. This multi-headed variety is one of the prettiest of the poetaz, having primrose petals with a red-edged cup.	18"	Late Mar.	10	1.45
CLARE. A beautiful dark lemon miniature jonquil which increases rapidly.	8"	April/ May	ea.	10
			10	90
			100	8.10
CORA ANN. A very prolific jonquil hybrid, with a small yellow cup and white petals.	10"	Late Mar.	10	1.35
CUTTY SARK. A very unusual primrose coloured jonquil. Most attractive.	14"	Late Mar.	10	2.00
CYCLAMINEUS. A very beautiful species of deep yellow with a long trumpet and completely swept back petals. Excellent for naturalising in a damp place. Picture inside front cover.	5"	Early Mar.	10	1.10
			100	10.00
DEMURE. A dainty little jonquil hybrid with smooth white petals and small pale yellow cup.	7"	Early April	10	1.60
DINKIE. A small-cupped daffodil of beautiful form and much substance. Butter-yellow petals and red-edged cup.	15"	Mar./ April	ea.	35
			10	3.15
DOVE WINGS. A really outstanding cyclamineus hybrid with ivory-white petals and pale yellow trumpet.	12"	Late Mar.	10	4.05
ELF. A very decorative little trumpet variety. Lemon throughout, the trumpet delicately edged with pink.	9"	April	ea.	18
			10	1.60
ERLICHEER. A remarkably strongly scented tazetta with creamy double flowers contrasting well with deep green leaves. Needs a good baking in the summer.	10"	Late Mar.	10	9.00
			100	8.10
FAIRY CIRCLE. A charming little small cupped variety, with white petals and a flat cup edged with buff-pink. Award of Merit.	12"	Late Mar.	ea.	2.50
FEBRUARY GOLD. The well known and loved early cyclamineus hybrid with golden-yellow petals and a slightly darker cup. Very long lasting and good for naturalising.	12"	Feb./ Mar.	ea.	19
			10	1.70
FEBRUARY SILVER. A most amazingly lasting cyclamineus hybrid with milk-white petals and lemon cup. Large and of good substance.	12"	Feb./ Mar.	ea.	26
			10	2.35

Narcissi (Daffodils)—continued

	Height	Flowers	£	p
	4"	Early Mar.	ea.	1.50
GAMBAS. A perfect miniature trumpet daffodil. Clear yellow throughout.	15"	Late Mar.	ea.	15
GARDEN PRINCESS. A lovely and long lasting cyclamineus with flowers of a deep yellow. Very free-flowering and good for naturalising.	15"	Late Mar.	10	1.35
GERANIUM. A most striking poetaz with four to six flowers on an upright stem. Pure white petals with bright scarlet-orange cups.	16"	Late Mar.	ea.	12
GIPSY QUEEN. A charming miniature, pale lemon throughout with slightly darker tips to both the long trumpet and the petals.	4"	Early Mar.	ea.	25
GLORY OF LISSE. One of the very few poeticus hybrids. The large flower has spreading pure white petals and a small deep yellow cup rimmed with crimson.	17"	May	ea.	15
GOLDSITHNEY. An excellent garden plant of a bright butter-yellow throughout. A very prolific large-cupped variety.	8"	Late Mar.	ea.	12
			10	1.10

NARCISSI FOR ROCK GARDENS		
Splashes of bright colour in the open garden from March to April.		
Heights range from 6" to 14".		
5 Little Witch	5 March Sunshine	
5 Halvose	5 Sundial	
5 Odorus rugulus		
Collection No. 5		
25 bulbs for £4.00	Saving 20p	
50 bulbs for £7.85	Saving 55p	

	Height	Flowers	£	p
	6"	Mar.	ea.	1.50
HALINGY. An exquisite little plant with several milk-white flowers with pale yellow cups.	6"	Mar.	ea.	1.50
HALVOSE. A very useful tazetta for pots and bowls, as it does not grow too tall indoors. Also a fine garden variety; the brick-red of the cup also tinges the yellow petals.	12"	Mar./April	ea.	12
			10	1.10
HAWERA. Beautiful lemon sister seedling to April Tears.	7"	April	ea.	65
			10	5.95
HENRIQUESII. Recently collected rare and superb addition to the jonquil group. The glowing golden flowers, with sometimes rather ragged cups, have an exceptional scent. Grows well with us outside.	12"	Mar.	ea.	80
			10	7.20
HESLA. An attractive twin-headed jonquil of an unusual shade of soft yellow with a green-tinted centre.	15"	Early April	ea.	12
			10	1.10
HORN OF PLENTY. A very vigorous white triandrus which can bear two to three flowers on a stem. These have an expanded trumpet.	12"	Late Mar.	ea.	15
			10	1.35
ITALICUS. A very floriferous tazetta species. About ten flowers on a stem with straw coloured petals and lemon cups.	10"	Early April	ea.	10
			10	90
JACK SNIPE. A delicate little cyclamineus whose long creamy petals and dark primrose cup make a striking contrast.	8"	Late Mar.	ea.	22
			10	2.00

	Height	Flowers	£	p
	15"	Early April	ea.	46
JENNY. An exquisite cyclamineus hybrid with milk-white petals. The trumpet opens lemon coloured but quickly fades to a lovely creamy-white.	15"	Late Mar.	ea.	12
JEZEBEL. A most eye-catching small-cupped daffodil with deep yellow petals and vivid red cup.	15"	Early April	ea.	1.10
JONQUILLA SINGLE. This charming and very well-known jonquil species has up to six very strongly scented deep yellow flowers to a stem.	12"	Feb.	ea.	08
JUMBLIE. An excellent little cyclamineus hybrid with two to three clear yellow flowers to the stem. Slightly orange cup and reflexed petals. Very free-flowering and good for pots.	8"	Feb.	ea.	32
			10	3.00
JUNCIFOLIUS. Quite exceptional and one of the smallest jonquil species. Several tiny yellow flowers which are sweetly scented.	3"	Mar.	ea.	11
			10	1.00
KEATS. A most unusual poeticus. The white petals shade to green at the centre and are not fully formed—what should be a cup is in fact five or six segments not joined together. Very exciting for floral decoration.	16"	Mar.	ea.	9.00
KEHELLAND. A very pretty soft yellow double with a stiff stem. An excellent garden plant.	7"	Mar.	ea.	1.80
KENELLIS. A rare N. bulbocodium hybrid, extremely free-flowering, with three or four blooms over a long period. They open citron-yellow, then fade to milk-white.	6"	Feb./Mar.	ea.	2.50
LA BELLE. A very charming jonquil. It has a largish flower with very clear yellow petals and rather flat orange-red cup.	6"	April	ea.	60
			10	5.40
LACTICOLOR (Canaliculatus). A very prolific sweetly scented miniature tazetta species. White petals and lemon-yellow cup. Needs a well-drained position.	5"	Mar.	ea.	08
LADY BEE. A very beautiful large cupped daffodil, with white petals, and a very unusual delicate pink cup. Excellent for flower arranging.	10"	Mar.	ea.	70
LANARTH. A rather unusual jonquil hybrid, often twin-headed. The flowers have yellow petals and orange cups.	14"	Mar.	ea.	6.30
LARKELLY. A very fine cyclamineus hybrid of great substance. Bright yellow petals and orange-tinted cup.	11"	Mar.	ea.	50
LE BEAU. A very fine cyclamineus hybrid, with drooping flowers of softest yellow and rather long trumpets.	12"	Mar.	ea.	4.50
LEMON HEART. Excellent dwarf triandrus variety, with a rather large flower. Palest creamy-yellow long cup and milk-white petals.	9"	Mar.	ea.	18
			10	1.60
			10	1.0
			10	90
			10	15
			10	1.35
LENNA.	NEW INTRODUCTION			
	LENNA			
Although we seem to have been concentrating on the introduction of Trumpet daffodils in recent years, we have no hesitation in offering this one. It was bred by that <i>doyen</i> of miniature daffodil raisers, Alec Gray, and is a sister seedling of his <i>Tosca</i> , which deservedly won an Award of Merit at Wisley in 1973. <i>Lenna</i> is somewhat similar, with milk-white flatter petals, and a more flared buttercup yellow trumpet. The great advantage, however, is the extra height and later flowering date.				
Height: 7". Flowers: Early April. Price: £2.50				

Registered as 'Little Dancer' 1977

Narcissi (Daffodils)—continued

	Height	Flowers	£	p
LENT LILY. (See <i>pseudo narcissus</i> .)	13"	Late ea. Mar. 10	26 2.35	
LIBERTY BELLS. A triandrus of outstanding beauty with several citron-yellow drooping flowers to the stem. Very colourful and excellent in the garden.	13"	Late ea. Mar. 10	26 2.35	
LINTIE. A dainty little jonquil. Each stem bears one to four flowers with butter-yellow petals and flat orange-red cups.	8"	Late ea. Mar. 10 100	12 1.10 9.90	
LITTLE BEAUTY. A charming little well contrasted trumpet daffodil. Twisted white petals with a lemon trumpet.	4"	Early ea. Mar. 10	20 1.80	
LITTLE GEM. An exquisite little pale gold trumpet daffodil. Free-flowering.	6"	Early ea. Mar. 10	25 2.25	
LITTLE WITCH. An exceptionally beautiful cyclamineus hybrid. Bright gold throughout with very reflexed petals. Extremely long lasting. Good in the garden and for pots.	9"	Mar./ April ea. 10	20 1.80	
MARCH SUNSHINE. A free-flowering and quite outstanding cyclamineus hybrid with an almost flat canary-yellow perianth and orange-tinged trumpet.	12"	Early ea. Mar. 10	20 1.80	
MARY PLUMPSTEAD. Closely resembling April Tears, this attractive triandrus hybrid is a delightful shade of greenish-cream. Stock very limited.	6"	Early April ea.	3.00	
MILLENIUM. This singularly attractive miniature trumpet daffodil produces a large number of flowering stems per bulb. It has pale yellow petals with a pure lemon trumpet. Picture inside back cover.	7"	Mar. ea. 10	50 4.50	
MINNOW. An exquisite little tazetta hybrid with several creamy flowers on each stem with contrasting yellow cups. Does very well and increases rapidly. A good garden plant.	6"	Mar./ April ea. 10	15 1.35	
NANCEGOLLEN. One of the very few white jonquils. Most attractive creamy-white sweetly scented flowers. More than one to a stem.	12"	Mar. ea. 10	25 2.25	
NANUS. The best miniature variety for naturalising. The flowers have yellow trumpets with paler petals.	5"	Early ea. Mar. 10	12 1.10	
NIRVANA. A very fine creamy-white jonquil with several small-cupped flowers to a stem. A most attractive variety.	14"	Mar./ April ea. 10	12 1.10

ODORUS CAMPERNELLI. A very tall vigorous jonquil with several sweetly scented pale yellow flowers to a stem.	15"	Early ea. Mar. 10	15 1.35	
ODORUS CAMPERNELLI PLENUM. A double form of the above. Also sweetly scented.	13"	Early ea. Mar. 10	17 1.55	

	Height	Flowers	£	p
ODORUS RUGULOSUS. An outstanding jonquil with up to four deep yellow flowers on each stem. An excellent garden plant, nicely scented.	12"	Mar. ea. 10	17 1.55	
ORANGE QUEEN. Unusual very sweetly scented jonquil, with both cup and petals completely orange.	10"	Mar./ April ea. 10	20 1.80	
PARCPAT. An excellent short-cupped jonquil. Good for cutting and garden display. Has very unusual orange petals with a deeper cup. Increases well.	15"	Mar./ April ea. 10	10 90	
PAULA COTTELL. A really delightful miniature daffodil with rigid overlapping milk-white petals and small creamy cup.	9"	Early April ea. 10	15 1.35	
PEASEBLOSSOM. An exquisite little two-headed cream coloured jonquil hybrid.	5"	Mar./ April ea. 10	50 4.50	
EEPING TOM. A most distinctive cyclamineus hybrid with its very long narrow trumpet flared at the end and reflexed petals. A true golden-yellow. Excellent for naturalising.	16"	Feb./ Mar. ea. 10	19 1.70	
			100	15.30
PENCREBAR. A very sweet little yellow double jonquil looking like a tiny rose. Often twin-flowered.	6"	April ea. 10	30 2.70	
PEPPER. A red-cupped daffodil which does extremely well in all gardens and lasts well as a cut flower. Bright orange-red cup with deep yellow petals.	12"	Mar. ea. 10	10 90	
			100	8.10
PIPER'S BARN. A favourite dwarf jonquil with deep yellow flowers, having small cups and rather pointed petals.	8"	Mar./ April ea. 10	10 90	
			100	8.10
POETICUS FLORE PLENO. The well-known double Pheasant Eye. Pure white and strongly scented and very late flowering. Excellent for naturalising.	17"	May ea. 10	12 1.10	
			100	9.90
POETICUS POETARUM. An interesting subspecies, of unknown locality. It has a deep red cup, and this has provided the colour of most modern red cups.	15"	April/ May ea. 10	50 4.50	
POETICUS PRAECOX. This is the earliest of the poeticus to flower, and, in spite of its name, is probably of garden origin. The flower is a smaller version of recurvus.	15"	Late April ea. 10	50 4.50	
POETICUS RECURVUS. The old-fashioned late Pheasant Eye loved by everyone. Snow-white petals swept back from a tiny yellow cup edged with red.	17"	May ea. 10	12 1.10	
			100	9.90
PSEUDO NARCISSUS. The Lent Lily of English woodlands. Pale yellow petals with a citron cup. Excellent for naturalising.	6"	Early Mar. ea. 10	13 1.15	
			100	10.35
PSEUDO NARCISSUS GAYI. A larger form of the above with more substance. White petals and clear yellow trumpet. Equally good for naturalising.	12"	Early Mar. ea. 10	10 90	
			100	8.10
PSEUDO NARCISSUS MOSCHATUS. A pure white flower with nodding heads and petals running almost parallel to the trumpet giving a hooded effect.	6"	Early Mar. ea. 10	20 1.80	
PSEUDO NARCISSUS OBVALLARIS. The Tenby Daffodil or 'Host of golden Daffodils' (Wordsworth). Neat bright yellow flowers on very stiff stem. Long lasting and excellent for naturalising.	12"	Feb./ Mar. ea. 10	15 1.35	
			100	12.15
PSEUDO NARCISSUS VAN SION. The original double yellow daffodil. Useful for naturalising because of its iron constitution.	15"	Early Mar. ea. 10	12 1.10	
			100	9.90
RIKKI. An exceptional little jonquil with a tiny white flower and a pale lemon cup. Very upright.	5"	Mar./ April ea. 10	45 4.05	
RIPPLING WATERS. By far the most attractive and best triandrus that we sell, with three creamy-white short-cupped flowers to a stem. A strong grower.	14"	Early April ea. 10	31 2.80
