GOLD MEDAL DAFFODILS

REVISED CLASSIFICATION OF DAFFODILS 1977

1. The classification of a daffodil cultivar shall be based on the description and measurements submitted by the person registering the variety, or shall be the classification submitted by such person.
2. Colours applicable to the description of daffodil cultivars are abbreviated as follows :
   W—white or whitish. G—green. Y—yellow. P—pink. O—orange. R—red.
3. For purposes of description, the daffodil flower shall be divided into perianth and corona.
4. The perianth shall be described by the letter or letters of the colour code most appropriate.
5. The corona shall be divided into three zones—an eye-zone, a mid-zone, and the edge or rim. Suitable coded colour descriptions shall describe these three zones, beginning with the eye-zone and extending to the rim.
6. The letter or letters of the colour code most accurately describing the perianth shall follow the division designation.
7. The letters of the colour code, most accurately describing the zones of the corona shall then follow, from the eye-zone to the rim separated from the perianth letters by a hyphen. In Division 4, the letters of the colour code most accurately describing the admixture of petals and petaloids replacing the corona shall follow in proper order, using 3, 2, or 1 colour codes as appropriate.
8. If the corona is substantially of a single colour, a single letter of the colour code shall describe it.

Using these basic requirements, daffodils may be classified as follows :

DIVISION 1—TRUMPET DAFFODILS OF GARDEN ORIGIN
Distinguishing characters : One flower to a stem; trumpet or corona as long or longer than the perianth segments.

DIVISION 2—LONG-CUPPED DAFFODILS OF GARDEN ORIGIN

DIVISION 4—DOUBLE DAFFODILS OF GARDEN ORIGIN
