When supplying your permit, the U.S. Department of Agriculture will also send you special green and yellow mailing tags, which you must forward at once to me to attach to your parcel or parcels of bulbs. These tags, which will bear your permit number, will take the bulbs first to the Inspection House at Hoboken, N.J., where they will be inspected, repacked and forwarded to your address.

In addition to the varieties catalogued I have small stocks of numerous other choice Daffodils and welcome enquiries for any varieties in which customers are interested.

Customers are requested to send their orders as early as possible as I commence to replant all unsold bulbs early in September.

Cultural Notes

A well drained sunny plot which has been manured for a previous crop such as potatoes is ideal for growing first-class Daffodils. Planting should be completed as early as possible in August or early September. Beds about four feet wide are convenient, planting in rows about 10 inches apart across the beds, putting six to eight bulbs in each row according to the size and vigour of the variety. The bulbs should be covered with from three to five inches of soil according to size. It is advisable to place a small handful of sand below each bulb to ensure sharp drainage which is vitally important.

As soon as the foliage appears in Spring the beds should be forked or hoed to keep weeds in check. Exhibition flowers may require protection from rough weather and six feet high hop screening is useful as a wind break. Small lots of choice flowers can also be protected with overhead covers placed about eighteen inches above the flowers. White calico covers are suitable for self yellow, bicolour and white varieties but red cups require two thicknesses of hessian to prevent burning by sunlight. The covers should not be allowed to remain in position any longer than necessary as they tend to weaken the plants.

Flowers should be put in water for twenty-four hours before packing for a show using light wooden boxes lined with paper. Pack with each row of flowers resting on a roll of tissue paper and the petals overlapping. After every third row has been packed the stems should be secured to the bottom of the box with tape and drawing pins.

On arrival at the show, place the flowers in water immediately after cutting about half an inch from the bottom of the stem to allow them to recover from the journey. The flowers can then be selected and staged in the usual way. Generally three flowers are required in each vase arranged with a few clean daffodil leaves and firmed into position with moss.

Many varieties are excellent pot plants for the cool greenhouse. Pot as early as possible using good loam with a little peat and sharp sand and a slight dusting of bonemeal. Crock the pots well and just cover the noses of the bulbs with soil. After potting plunge the pots in a sheltered plot in the garden, putting slates under the pots to prevent the entry of worms; filling in between and covering the pots with about two inches of soil. Before plunging cover the pots with a little moss to prevent the soil of the plunging bed becoming mixed with the potting compost.

The pots can be lifted in batches as required from early January onward. As the days lengthen growth will be rapid. The secret of successful pot cultivation is ample ventilation and plenty of water both in the pots and on the benches and floor to ensure a moist atmosphere.

The following are a few of the best for pots :—

Amongst trumpets, Ardclinis, Ballygarvey, Broughshane, Cantatrice, Cromarty, Leinster, Kanchenjunga, Kingscourt, Rathkenny and Trousseau.

Large-cupped varieties include Ballymarlow, Bellevue, Craigywarren, Crebilly, Dunfane, Dunkeld, Glenocum, Golden Torch, Irish Charm, Kilworth, Ludlow, Mexico, Ormeau, Parkmore, Polindra, Red Ranger, Rustom Pasha, Saltash and the doubles Mary Copeland and Texas.

Angeline, Ballycastle, Chinese White, Enniskillen, Glenwherry and Mahmoud are suitable small-cupped flowers.

Notes

For easy reference this catalogue is arranged in alphabetical order. After each name the division in the R.H.S. Classification of Daffodils to which the variety belongs is given, followed by a number to indicate the approximate time of flowering, No. 1 being the earliest and No. 6 the latest. This is followed by the name of the raiser in brackets.
