"GLADLAND"

LEBANON, OREGON, U. S. A.

A new flower fancier. Our little girl, Eileen, reaching for a daffodil which her mother holds. The flower she is about to take is nearly as large as her head.

A critical judge. Whether the frown is from the bright sunshine or from the seriousness of her decision as to the merits of this Glad is left to your judgment.

FOREWORD

Perhaps some will be disappointed this year in the more brief descriptions given to the Glads than have formerly been used, but we have felt that the savings to us in the use of less catalogue space could be passed on to you in the form of more discounts than are usually given in our spring catalogue. For more complete descriptions of varieties, kindly refer to last year's catalogue. If you do not have a copy, one will be gladly mailed on request. Please do not order from last year's catalogue however, as some of the varieties listed then are not available now and in many cases, prices are lower this year.

As you will notice, we are listing our Daffodils along with the Glads this year and are giving them more space than the Glads for the reason that we do not have a complete descriptive list of these available in previous catalogues. Orders for Daffodils may be sent along with your Glad orders or they may be sent any time until September 1st. To help us avoid errors, kindly order Daffodils on a separate sheet from that used for Glads.

TERMS

Please send cash, or 25% down with order and the balance may be sent before delivery. Five bulbs may be purchased at the ten rate and 25 at the 100 rate unless quoted otherwise and providing item does not total less than 10c. Prices prepaid in the United States on orders of \$1.00 or over. As noted above, we are making a little larger discount this year than usual and offer 15% off on orders of \$5.00 or more and 20% on orders of over \$25.00. Our stock is fumigated several times and we aim to send out only vigorous healthy stock, free from thrips. Should any stock prove untrue to name, I shall gladly make adjustment. See under Daffodil section the terms applying to their sale.

For instructions on growing Glads, see last year's catalogue. We repeat some of the variety comments from our fall price list for the benefit of those who did not receive our fall list.

VARIETY COMMENTS

This past year there were fewer new varieties added to our list than commonly and to limit remarks to these would mean but a description of very few varieties. This being the case, we shall give our impressions here of a few of the newer varieties and of some not altogether new.

Taking up our list alphabetically we find that **Allegro** is still about the best medium "blue." While **Alchemy** in common with some other yellows does not hold its size after being cut and is very subject to crooking in hot weather, it is the most beautiful yellow I have seen. Of the bright reds, **Algonquin** is near the top of the list. I think **Amulet** is about as fine in the buff class as any. **Avalon** should be good both as a commercial and exhibition variety and **Barcarole** remains the most beautiful orange but is rather temperamental. Some do not like blues to have white throats but **Bluet** is a favorite here. In light rose salmon, **Capeheart** just about stands supreme. **C. W. Gannett** exhibited some smoky tints in its salmon ground this year. It makes huge spikes. In deep rose shades, **Chamouny** is a leader.

Colonial Maid does not have big florets but gives consistently of its tall straight strong spikes. **Colossus** and **Conquest** are two varieties that remain among the favorites for cut flowers. **Coral Glow** is perhaps the most outstanding in its color class. In light rose purple **Cordelia** stands out. **Diane** is a fine late blooming tall orange salmon. For very tall spikes and large flowers, **Don Bradman** is very impressive. Much has been said about **Ethel Cave Cole** and one season's experience indicates that it should be a fine commercial and exhibition Glad. When a new lavender is introduced, we are usually skeptical but **Elizabeth the Queen** in one year's trial looked outstanding. **Flora Farmer** and **Glamis** are two fine pinks with lighter throat, entirely distinct from each other. **Greta Garbo** is one of the finest imported things that I have grown in several years.

Happy Days appears a competitor of **Barcarole** for beauty and while they are altogether different, the former seems to have better growing habits and it should become a leading commercial. In deep reds **Hindenburg's Memory** looks about as good as anything we have and has been taller this past year than before. Those liking Glads with many open blooms should grow **Intrepid**. Perhaps the Glad most resembling an orchid is **Joseph Haydn**. We wish we could persuade it to refrain from sprouting in storage. **King Cardinal** is a very tall large bright red. In the purples **King Lear** seems the best variety we have.

As a commercial, the large bright pink **Laddie** should go well. **Margaret Beaton** has been very fine for several years now and it will be sometime before there is enough stock to go around even though it is a good propagator. Another tall bright red is **Master Myron**. Mine crooked some in hot weather this year but that may not be normal for it. As an exhibition white **Matterhorn** seems the finest thing we have. **Myrna** is a very satisfactory ruffled cream. **New Era** is the most beautiful pink Glad but it does not do well everywhere. **New Zealand Splendour** makes large spikes of fine pink flowers. One of the most sought after cut flowers we have is **Oregon Rose**. Among early Glads, **Osmond**, a bright orange, is among the best. Very softly and daintily colored with most slender graceful spikes, but yet tall and large is **Queen Marilyn**. **Red Ensign** is striking with its large white blotches. **Rima** is a favorite with florists and the deeper colored **Rosa van Lima** is going to be another good commercial. **Ruffled Princess** is a beautiful ruffled deep pink with cream throat. **Sensation** is well described by its name, a huge flower on very tall spikes. In the deep red, **Timbuctoo** stands out. While much different in type, **Winston** and **White Gold** look like very outstanding additions to the cream colored Glads.

Then there is the fine light red **Valeria**, the large light pink **Merry Widow**, the somewhat darker **Stella Antisdale**, the big pink and white **Mermaid** and many others that deserve attention.

We wish especially to call your attention to a few of our originations if you are not already growing them. We do not claim these to be superior to those from other growers but if you have not planted any of these, we believe that you are missing some of the good ones.

Ariadne is gaining in popularity and has quite a list of prizes at major shows to its credit. It is a very consistent performer, and is quite distinct in its color class. Early flowers are much in demand and while **Colossus** is not the earliest Glad, it is usually one of the first to bloom and is very large and of attractive color. **Conquest** is still a favorite with local florists, its soft colors and nice form having a strong appeal. One of the most vigorous growers that I have is **Irak**. **Rima** is quite a general favorite as a cut flower and were it a more rapid propagator it would be one of the largest selling Glads, I believe. Medium size bulbs seem to sell out early. **Zuni** is a very popular smoky, both here and in Australia, while from the same parentage, **Xerxes**, a much different flower, is coming to the fore. **White Gold** is not one of my own but I aided in the introduction of this variety from Dr. Scheer along with several other growers, and it is proving one of the largest, most striking and outstanding of the cream colored Glads. You should include this in your 1942 garden.

GLADIOLUS BEAUTIFUL

Oh, stately Gladiolus! Oh, flower of sunset hue!
Whence comest all thy radiance? Did'st thee the sun imbue
With loveliness that only is expressed in splendour rare?
Or why hast thou outrival'd e'en the fairest of the fair?

I now can see thine aureate swords
Reflect the golden sun;
Again vermilion turns me towards
A scene where fire elves run.

O'er there's an azure petaled show
Of tall spikes in a line.
And here's one niveous as the show:
Immaculate, sublime.

The gorgeous blaze of color
Is softened here and there
By delicate and dainty tints—
Describe them? I despair.

A giant towering yonder
Bespeaks Utopia's king;
Methinks I'll stop and ponder
While birds their anthems sing.

Why hath this wondrous beauty
Been given us by God?
These flowers of every color
Grown from uncomely sod?

Oh, stately Gladiolus! Oh, flower of sunset hue!
Thou art the garden's fairest, the King of Flowers, too.

—G. E. M.

RIMA

What a desolate place the world would be without a flower! It would be a face without a smile, a feast without a welcome. Are not flowers the stars of earth, and are not stars the flowers of heaven?

—MRS. BALFOUR.

To analyze the charm of flowers is like dissecting music; it is one of those things which it is far better to enjoy than to attempt to understand.

DAFFODILS

These beautiful harbingers of spring are now taking a prominent place in our planting and we take pleasure this year in offering one of the finest selections of Daffodils available in America, a number of varieties of which we believe are not procurable elsewhere in this country. Many of the marvelous new things from Ireland, England, Scotland, Holland, New Zealand and Australia are such great improvements over the old varieties commonly grown in gardens that there is little comparison. They vary in color from the deep yellow of the now familiar King Alfred to light lemon yellows, bicolor white and yellows, and various combinations of white or yellow with orange or red; and in a few cases, pink, buff, and apricot.

There is considerable confusion prevailing as to the use of the terms, Daffodils, Jonquils, and Narcissi. As the Royal Horticultural Society uses the name Daffodil for all varieties and types of the genus, they will so be considered here. And, of course, Narcissus is the botanical name of all members of the group. Florists frequently incorrectly call yellow trumpet varieties jonquils, but the true jonquils are members of the group having rush shaped leaves and bearing several sweet scented yellow blossoms on a stem. Gardeners frequently call the yellow trumpet varieties Daffodils and the poeticus and poetaz varieties Narcissus. We shall designate all varieties as Daffodils. An abridged form of the Royal Horticultural Society's classification follows:

Division 1—Trumpet as long or longer than perianth segments.

- a. Yellow.
- b. White.
- c. Trumpet yellow, perianth white or nearly white.

Division 2—Incomparabilis. Cup or crown not less than one-third but less than the length of the perianth segments.

- a. Yellow, or yellow and red.
- b. Bicolor, white perianth and yellow cup.

Division 3—Barrii. Same as division 2 but with cup less than one-third the length of the perianth segments.

Division 4—Leedsii. Perianth white with crown white or pale yellow, or in pinkish tones.

- a. Same dimensions as Incomparabilis.
- b. Same dimensions as Barrii.

Division 5—Triandrus hybrids.

Division 6—Cyclamineus hybrids.

Division 7—Jonquil hybrids.

Division 8—Tazetta—includes polyanthus varieties.

Division 9—Poeticus.

Division 10—Doubles.

Division 11—Various.

PLEASE NOTE: ALL ORDERS FOR DAFFODILS SHOULD BE RECEIVED BEFORE SEPTEMBER FIRST. You may rightly say that Daffodil bulbs may be purchased much later than this but as we grow mainly novelty varieties and all Daffodils benefit by early planting, we aim to plant in September; hence, we ask that orders may be received before September 1st to avoid disappointments. Orders may be held for shipment in September or October, however.

PLEASE READ

In common with our practices on Glad sales, Daffodils are offered for cash or 25% down and the balance before delivery or bulbs may be shipped c.o.d. for balance. All stock offered subject to prior sale. On orders of \$10.00 or more, 10% extra value in bulbs may be selected in place of the cash discount offered with Glads. I aim to send out double nose bulbs except in case of a few varieties that usually make mostly round bulbs. Most of these should give two blooms.

I appreciate your stating whether or not to substitute if I am out of a variety ordered. Kindly order Daffodils on separate sheet from Glads as it saves time here and may avoid mistakes. Prices quoted are prepaid.

Remember: Please Order Daffodils Before September First.

Cultural Instructions

Daffodils are not difficult to grow but like other flowers they appreciate proper care and the meeting of certain conditions. Nearly any good well drained soil is suitable and while there are somewhat divergent opinions among growers, it seems rather generally conceded that feeding with fertilizers makes comparatively little difference in the size or quality of blooms but they do want plenty of water, especially in the few weeks just before blooming; and, of course, proper cultivation is beneficial. This should consist of stirring the surface of the soil and keeping weeds out. Deep digging near the plants will disturb the root system.

The ground should be deeply worked before planting and bulbs should be planted so that about three or four inches of soil covers the top of the bulb. They should be dug and replanted every two or three years. Digging should be done in June or early July, as soon as the foliage is mostly dead and replanting may be done in August or early September for best results.

- KILLIGREW** (P. D. Williams) 2a. A very tall early midseason flower with broad rich deep lemon petals of very nice texture and large crown of rich deep orange. A very fine cut flower variety. Very prolific and should prove a good commercial variety. 75c each.
- KILTER** (P. D. Williams) 3b. A flower after the order of Firetail and sometimes referred to as a glorified Firetail. Larger than that variety but the eye is not of as solid red color as that variety. Very good, though. \$1.50 each.
- KIMBA** (Brown) 2a. Quite early yellow flower with bright rich red cup. \$1.20 each.
- KING ALFRED** (Kendall) 1a. This grand variety is undoubtedly grown in much larger quantities by commercial growers than any other daffodil. It is now an old variety but its fine large rich yellow flowers borne early on tall strong stems merit the wide spread favor bestowed upon it. 15c each, \$1.50 per doz.
- KING OF MAY** (G. L. Wilson) 1a. A large late flowering yellow trumpet. Some years it is about the last trumpet sort to bloom but at times is much earlier by comparison. A nice flower. 30c each.
- KING OF THE NORTH** (Brodie) 1a. Another early large yellow trumpet of good form. This has been used much in breeding for good yellow trumpets. 20c each.
- KNAVE OF DIAMONDS** (G. L. Wilson) 9. Blooming as it does, at the end of the season, this is a very worthwhile flower. Pure snowy white perianth with rounded reflexing petals and red eye. 60c each.
- LADY KESTEVEN** (Mrs. Backhouse) 3b. Midseason flower of great attractiveness. White perianth with brilliant cherry red cup. This fades considerably if left in the open but is beautiful and striking, nevertheless. \$7.50 each.

- MAJESTIC** (Dutch origin) 8. Three small white blossoms with yellow cups to a stem. Late midseason bloomer. 10c each.
- MALVERN GOLD** (Brown) 2a. This is perhaps about the most attractive of the very early daffodils in my planting. Rich golden yellow flowers with large flat perianths and rather short well expanded crowns. A very nice cut flower coming about ten days or two weeks before King Alfred. I believe I have the only stock of this in America. \$2.50 each.
- MARCH SUNSHINE** (de Graaff) 6. One of the few cyclamineus hybrids and I think one of the most attractive. The medium sized flowers of rich yellow coloring and attractive form come early in the season. 50c each.

- MARY LONGSTREET** (Mrs. Backhouse) 2a. Tall stems; cream perianth of good form, and quite large brilliant orange crown are the main characteristics of this flower. \$5.00 each.
- MASTERPIECE** (Engleheart) 3b. An "old-timer". Rather small flowers of creamy white with bright pure orange cup. 10c each.
- MEGAPHONE** (de Graaff) 1a. Gigantic yellow trumpet variety. The trumpet is so huge as to almost conceal the perianth. Striking novelty that is more unusual than beautiful. Slow to increase. \$15.00 each.
- MELVA FELL** (West & Fell) 2b. Very beautiful large white flower with rounded perianth and pretty wide mouthed cup with red band at the edge. A little later and not as tall as Jean Hood but more beautiful than that fine variety. \$8.00 each.
- MERKARA** (Mrs. Backhouse) 2a. Good flower with flat sulphur yellow perianth and good sized orange cup. \$1.00 each.
- MI-CAREME** (Mrs. Backhouse) 2a. Very tall early midseason variety. Large flowers of light yellow with deep yellow crown. Somewhat more coarse than more recent English varieties. 15c each.
- MITE** (?) 6. Small very early dainty little flower with much of the form of its parent, cyclamineus. Extremely rare. None for sale this year.
- MITYLENE** (Engleheart) 4a. Large late midseason flower of fine form. White perianth and large expanded light primrose crown. 75c each.
- MORAY** (Brodie) 1b. Those who desire large flowers should plant this one which is one of the largest whites, and it has good form and is very white. Not quite as refined a flower as Beersheba but a splendid daffodil. \$1.50 each.

- MORTLAKE** (West) 1a. One of the most showy and outstanding of the recent yellow trumpets that I have added to my collection, this rich deep yellow daffodil with nicely fringed trumpet adds a distinct note to one's garden. **\$2.00 each.**
- MR. JINKS** (Brodie) 3b. Pure white very large perianths which possess the sheen for which the poets are noted. The red in its cup serves to enhance its beauty. Rather late and not overly vigorous. **\$6.00 each.**
- MRS. BARCLAY** (Backhouse) 4b. Cream white flat perianth with round petals. The flat cup is yellow with an orange rim. Pretty if cut when first open. **15c each, \$1.50 doz.**
- MRS. E. H. KRELAGE** (Krelage) 1b. Often referred to as the white King Alfred. Perhaps not to be compared to Beersheba in size and form but of very nice smooth finish. Medium sized creamy white flowers. **20c each.**
- MRS. NETTE O'MELVENY** (Mrs. Backhouse) 4b. Large long stemmed flowers of white with yellow cup edged red. One of the more popular older varieties. **10c each.**
- MRS. R. O. BACKHOUSE** (Mrs. Backhouse) 4a. White flat perianth with rather narrow petals and long crown of rich salmon pink. Much criticized for its lack of perfection in form but it has the best pink color I have seen, in any of the more moderate priced varieties, at least. **\$1.00 each.**
- MRS. WALTER BREWSTER** (Backhouse) 3b. Large pure white perianth with flat lemon-yellow cup edged deep red. **15c each.**
- MYSTIC** (G. L. Wilson) 4b. One of those dainty delicate flowers to which one cannot do justice by a description. Broad creamy white perianth with quite good sized flat white crown edged with a border of pinkish orange. Late. **60c each.**
- NANNY NUNN** (Mrs. Backhouse) 3a. A quite showy flower of medium size having rounded creamy perianth and good sized bright orange cup. **15c each, \$1.50 per doz.**
- NAXOS** (Engleheart) 4a. Very tall large white flower of fine form. The large flat white perianth sets at about right angles to the large white crown. Much used in hybridizing and might be said to be the forerunner of a fine new race of tall Leedsii varieties. Unfortunately, it is not as strong constitutionally as one would like. **\$3.00 each.**
- NEVIS** (Brodie) 1b. Not a big flower but one of exceptionally fine finish and form and of good heavy texture. One of the parents of Moray and other good varieties. **40c each.**
- NIPHETOS** (Williams) 4a. A flower good both for exhibition and as a commercial. Tall stems bearing large flowers of very fine form and nice texture. Vigorous and a good increaser. **\$1.20 each.**
- NISSA** (Brodie) 2b. The flowers of this remind one some of Niphetos but this has a yellow crown. Very nice form. **70c each.**
- OLYMPIA** (van Waveren) 1a. One of the better ones of the old favorites. Very large flowers with light yellow perianths and deeper yellow much frilled giant trumpet. **15c each, \$1.50 per doz.**
- PEKING** (de Graaff) 3b. Very heavy textured white perianth of fine form with an extra large brilliant orange red widely expanded crown. A late bloomer. Very showy but one that is slow to increase. **\$14.00 each.**
- PENQUITE** (P. D. Williams) 2a. Large early flower of rich deep yellow. Heavy textured broad flat perianth and large saucer shaped crown of quite rich orange which is apt to fade if left in bright sunlight. A very fine flower. **\$5.00 each.**
- PHANTASY** (Crosfield) 1b. Quite a nice white flower. **\$1.00 each.**
- PINK A'DELL** (Brown) 4a. White perianth with pink trumpet which opens light yellow. **\$7.50 each.**
- POLINDRA** (P. D. Williams) 2b. Another of those splendid flowers from this noted raiser. Tall stems with large pure white flat perianths of much substance and good sized rich lemon-yellow crown of fine form. A noted prize winner. **\$9.00 each.**
- PORTHILLY** (P. D. Williams) 2a. Rich pure yellow perianths with good sized crown of most fiery rich orange-red. An effective bit of color which should make a fine commercial when stock becomes plentiful. Fine propagator. **\$5.00 each.**

- QUIP** (G. L. Wilson) 1a. One of the very few orange trumpet varieties. The perianth is yellow and the trumpet opens deep yellow but soon turns to a rich golden orange which does not fade. **\$3.00 each.**

- TRUTH** (G. L. Wilson) 4a. This is, I think, the most beautiful pure white flower that I have. Good sized blossoms with very flat smooth perianth, the petals being broad and pointed; the large crown is of beautiful form. On first opening, the flower is creamy white but soon fades to nice pure white. A marvelous acquisition. **\$30.00 each.**
- TUNIS** (P. D. Williams) 4a. This magnificent variety is now becoming sufficiently plentiful so that the price is down where nearly all daffodil fanciers can buy it. Very tall large flower with cream perianth and large flaring yellow crown which soon fades to cream excepting for the rim which becomes a rich apricot buff. One of the most popular varieties that I grow. **40c each.**

- WHITE WITCH** (Mrs. Backhouse) 5. Another dainty white triandrus hybrid. **30c each.**

I WANDERED LONELY AS A CLOUD

WILLIAM WORDSWORTH

I wandered lonely as a cloud
That floats on high o'er vales and hills,
When all at once I saw a crowd,
A host, of golden daffodils;
Beside the lake, beneath the trees,
Fluttering and dancing in the breeze.

Continuous as the stars that shine
And twinkle on the milky way,
They stretched in never-ending line
Along the margin of the bay:
Ten thousand saw I at a glance,
Tossing their heads in sprightly dance.

The waves beside them danced; but they
Out-did the sparkling waves in glee:
A poet could not but be gay,
In such a jocund company:
I gazed—and gazed—but little thought
What wealth the show to me had brought:

For oft, when on my couch I lie
In vacant, or in pensive mood,
They flash upon that inward eye
Which is the bliss of solitude;
And then my heart with pleasure fills,
And dances with the daffodils.

POLINDRA

BODILLY

DAFFODILS

Fair harbinger of spring, we wait with bated breath
Thy coming; or, reluctantly we bide our time
And, in our fancy, now beholding winter's death
See thy return with beauty's garb sublime.

Could but the bards of yesteryear behold
Thy chalice cup, or see thy glowing crown;
Or visualize thy vivid eye or trumpet bold
Their words would fail, however great were their renown.

Thy beauty oft enhanced in hybridizers' hands
Surpasses all fantastic dreams of yore;
But still perfection beckons onward, and
We know not what the future holds in store.

But though we may not fathom ever
By what strange alchemy were these changes made,
Yet in our gardens we may still endeavor
To have a glorious Daffodil parade.
