HATFIELD GARDENS
1983 Catalog

22799 Ringgold Southern Road Stoutsville, Ohio 43154
Phone: 614/474-5719

Greetings,

First, I want to thank all our customers for their orders the past year and hope I can continue to serve you in offering quality daffodils, daylilies, and Hostas. Again this year, some new items have been added to both the daylily and Hosta sections. A new daffodil section has finally been added. Also a few more hybrid peonies and companion plants have been added in the back of the catalog. So perhaps you will find something you will want to add to your garden and will honor us with your continued orders.

As an added thank you for your mailorder, please make several suggestions on what I may send you as a bonus plant. I will try to send what you suggest if stock permits.

In daffodils, many new hybrids are being grown here. If you are hunting for a certain one, please let me know. If I have it, I will be glad to quote you a price. I hope many of our friends will come see them during the daffodil season and you can make your selections for fall planting. Open garden in the central Ohio area will be on Sunday, April 17th. Peak bloom is usually in late April.

The daylilies are usually at their peak in mid-July. On Saturday, July 9th, the garden will be on tour for the AHS Region 2 Meeting. Then on Sunday, July 10th, the garden will be open for visitation in the central Ohio area.

The garden is always open for visitors during the growing season, mid-April to September. Usually someone is here all the time, but to avoid disappointment, write or call in advance.

Good Gardening in 1983
Handy Hatfield

Hatfield Gardens is located at 22799 Ringgold Southern Road, about 4 miles east of Circleville. Follow U.S. 22 to east edge of Circleville, then turn onto the Circleville-Stoutsville Pike at the Fairgrounds and follow it for 3 miles. Turn right onto the Ringgold Southern Road and continue for one mile to Hatfield Gardens on the right.

DAFFODILS

Summary of the daffodil classification of the Royal Horticulture Society.

The classification of a daffodil cultivar is based on the description and measurements submitted by the person registering the cultivar. Colors applicable to the description of daffodil cultivars are abbreviated as follows: W = white; G = green; Y = yellow; P = pink; O = orange; R = red. The daffodil flower is divided into the perianth (petals) and the corona (cup). The letter or letters of the color code most accurately describing the perianth follow the division number. The letter or letters of the color code describing the zones (one to three) of the corona follow, separated from the perianth letters by a hyphen. Daffodils are classified as follows: **Div. 1** - Trumpet, one flower to stem and trumpet (corona) as long or longer than the perianth segments. **Div. 2** - Long-cupped, one flower to stem, corona more than one-third but less than equal to length of perianth segments. **Div. 3** -Short-cupped, one flower to stem, corona not more than one-third the length of the perianth segments. **Div. 4** - Double daffodils, corona replaced by additional perianth segments. **Div. 5** -Triandrus daffodils, one or more bell-shaped, pendulous florets, perianth segments reflexed, fragrant. **Div. 6** - Cyclamineus daffodils, usually one flower with swept-back perianth, early bloomer. **Div. 7** - Jonquilla daffodils, scape tall and slender with 2 to 6 florets often clustered to a stem, very fragrant.

Numbers following the name indicate time of flowering (No. 1 the earliest to No. 6 the latest).

Note: Daffodil orders must be received by **August 1.** All bulbs are offered subject to crop and being unsold on receipt of order.
