

LARRY WIER'S DAFFODILS 2015

My daffodil friend, Larry Wier, who has been breeding and selecting seedlings for 20 years, offers the following introductions. His standards are very high and you can be sure that his flowers are superior, distinctive, and healthy. He has acquired some of Charles Wheatley's stocks and is introducing them, as well.

THE BULBS LISTED BELOW ARE POST-PAID FROM LARRY. ORDERS FOR THEM AND PAYMENT BY CHECK SHOULD GO TO: LARRY WIER, 13469 NORTH MAIN ROAD, BUCHANAN, MI 49107-9149, USA. Larry's phone is: (269) 695-6486.

ANIMAL CRACKERS 2YYW-WWY (Larry Wier, USA)

This name was chosen from the Marx Brothers as only they would mix sweets and liquor, the parents of this beautiful bloom. The perianth segments are very round and large. The medium sized cup expands slightly to the mouth where it is flanged. As with most reverses, it opens all yellow and takes time to mature with the small yellow rim. A show flower. Was seedling 88-2. Resists rot well so far.

(Lemon Candy x Gin and Lime) Midseason post-paid \$10.00

ELEGANT TOUCH 2W-W (Larry Wier, USA)

A beautiful, rounded and true white perianth are the best characteristics of this medium to large flower. Inner petals are spade shaped and smooth. Corona tends to be short and flaring with a crinkled edge. Tends to be a good early white. Was seedling # 89-4.

(Brierglass x Rhapsody) Early Season post-paid \$10.00

FLASHPOINT 1W-P (Larry Wier, USA)

The white perianth with ovate segments of good substance are the background for a trumpet that tapers gradually making for a more massive corona. This trumpet is darker pink inside and has a fairly heavy frill at the mouth. A climate milder than Michigan's will result in bigger and better colored flowers. A vigorous grower here (This was the "flash point" that Larry needed to start registering his daffodils. Almost a red-pink in the best of years—JR)

(Magician x Melancholy) Midseason post-paid \$ 10.00

MAKER'S MARK 1Y-O (Larry Wier, USA)

This is Larry's most successful cross so far to get a better colored show flower here in the orange trumpets. The strong yellow color of the overlapping perianth is a good foil to the cylindrical shaped corona with little expansion of the trumpet. The perianth is not starry nor widely overlapping but very pleasing. The stems are tall and strong with bulbs having good increase. Breeding both 1 and 2 Y-Os. A well-grown specimen won the Single Bloom 1 Y-O class at the National ADS Show in St. Louis, beating Magic Lantern. Was Wier 87-1. Proving to be a good parent for Peter Ramsay.

(Glenfarclas x Trumpet Call) Midseason post-paid \$ 7.00 or 3 for \$15.00

MERLIN'S PAL 3W-YYO (Charles Wheatly, USA)

This flower is another tribute to Charlie's breeding skill. Blossoms are quite large, bigger than both parents. Tall flower stems in the field makes these bright showy blossoms easy to find. This division 3 small cup has size and beauty to spare. Was seedling 89-98-1.

(Merlin x Palmyra) Midseason post-paid \$ 12.00

MINERAL WELLS (previously WINTER MOON) 1W-Y (Larry Wier, USA)

This white perianth is quite rounded with spade-shaped segments (no double triangles here). The medium bright lemon trumpet has length to spare making for a good bicolor blossom. The corona is more narrow than average with a frill at the mouth. Color has been good in Michigan's climate. Was Seedling # 89-3

(Tudor Dance x Helsal) Midseason post-paid \$ 9.00

MONGO 1 Y-P (Charles Wheatly, USA)

This name in the Miami-Illinois language means "In the loon land". Charlie lived in this Indiana town for several years. Name is pending. In '09, this bulb was a gratis in orders, so some growers will have it under seedling number of 09-1. Colors are pastel with outer petals touching making for a pleasant and artistic flower.

(Breeding unknown) Midseason post -paid \$ 10.00

N. assoanus (13Y-Y)

A species from Southern France and Eastern Spain that grows in limestone areas. Flowers are 1-3 in number on 10-12 stems. These are pot grown in heavy grit with a limey pH. This is the first of the jonquilla group to flower, mid-late season in Michigan. Blossoms are fragrant and well-formed despite Michigan's climate. Unknown as to how many will be available.

Mid/late season post-paid \$ 20.00

OUTER RIM 1W-W (Larry Wier, USA)

This flower has inherited the best characteristics of both of its parents. Especially a true and pure white color. Inner petals are spade shaped and almost touching. The trumpet is expanding to a moderate flange that is slightly frilled. Is stocky in overall shape. This blossom was the real star of seven selections from this cross. Seedling number 91-4. Name is pending.

(Pitchroy x Lady Slim)

Midseason

post-paid \$ 10.00

PINK SUNDAY 2W-P (Charles Wheatly, USA)

The red-pink color of this bowl-shaped cup against the rounded and wide petaled perianth of this flower is its major attraction. Refrain as the seed parent has provided form. Artful as the pollen parent has added to a beautiful cup color. (Was Seedling # 91-82-13).

(Refrain x Artful)

Midseason

post-paid \$ 10.00
