# DAFFODILS & NARCISSI

## Cultivation

**Naturalizing Daffodils and Narcissi in Grass etc.** Most Daffodils and Narcissi are suitable for naturalizing but in very heavy soils, preference should be given to stronger growing kinds e.g. Trumpet varieties and many Large-Cupped. They are all admirably adaptable for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately, scattered on the ground and planted where they fall.

**Soil and its Treatment.** Daffodils and Narcissi will thrive in any well-cultivated and well-drained garden soil. In preparing the ground for planting, dig deeply and if well-rotted stable or cow manure is available this may advantageously be worked in 10 to 16 inches deep so as not to come into immediate contact with the bulbs. Never use fresh manure of any kind at planting time. On poor and dry sandy soils we recommend a dressing of bone meal at a rate of about 1 oz. per square yard to be sprinkled over the surface of the ground after planting. The bulbs should be covered with soil to a depth of once and a half to twice its own depth, measuring the bulb from base to shoulder.

**Growing Daffodils in the greenhouse or indoors.** Many Daffodils and Narcissi are suitable for this purpose some varieties responding better than others to forcing. Pot up the bulbs on arrival and if ordinary pots are used take a good loamy soil, adding sufficient sand and peat to keep the mixture open. A light dusting of bone meal is also useful. Pot firmly in well-crooked pots. For bowls without drainage holes use a good fibre. Plunge the pots and/or bowls in the coolest place of your garden and in the absence of garden space the pots may be placed in a cool cellar (35-40°F) where watering from time to time is necessary. When the shoots are about 4 inches long and the flower buds well out of the neck of the bulbs, the pots may be removed into a warm room. Heat should be gradually increased from 50° to max. 60°F. It is advisable to remove the foliage of the sideshoots, if these do not show a flower bud. Just before the buds are open, water should be sprayed lightly over the buds, when they are in bloom less water should be applied.

The beauty of the Daffodil and the Narcissus is unquestioned and the fascination of the new varieties which appear each year gives proof of the ever growing interest and keen competition to obtain new varieties both by the professional grower and the amateur, many of whom spend a life-time in experimenting and hoping to raise new varieties. Some confusion sometimes arises when Daffodils are referred to as Narcissi. The term Narcissus is the correct botanical name of the whole genus and Daffodil is the popular name but nevertheless of considerable antiquity and acceptance. 'Daffodils' are generally understood to be that section of the genus which possess long trumpets and the commonly called Narcissi are the short-cupped and poeticus types.

*The daffodils and narcissus listed in our catalog are holland grown and are the top size, double nosed bulbs, producing or 3 flowers from each bulb.*

### Div. 3c

Perianth white, corona white, not paler than the perianth

**ANGEL** (16). Upon seeing the angelic flowers produced from the first bulb, the late Guy Wilson was so impressed, that there and then he gave it the name 'Angel'. This lovely large pure ice-white 3c has a most exciting cup, starting white then shading from pale to deep green in the base of the eye. This very large flower, which measures 4-5 inches in diameter, is of quite faultless form and quality, with the perianth reflexed just enough to suggest wings. A superb show flower, vigorous plant with a fine tall stem.

N 304—\$6.00 each

**CUSHENDALL** (17), A.M., of faultless form, quality and splendid substance, broad, smooth, circular, overlapping perianth of purest sparkling Poeticus-white, very shallow saucer crown edged with a delicate cream colored frill, centre is a lovely mossgreen, very late.

N 305—80 cts. each; \$8.00 per doz.

**FRIGID** (18), F.C.C., one of the very latest to bloom in May, broad smooth pointed perianth with smallish fluted almost flat crown, the whole flower is purest icy-white throughout except for a most lovely vivid emerald-eye.

N 306—80 cts. each; \$8.00 per doz.

**POLAR ICE** (16), A.M., a very charming flower, snow-white perianth with a very small flat white crown shaded emerald-green in centre, ideal as a cut-flower, always attracts much attention at our Shows, late flowering.

N 307—\$4.95 per doz.; \$34.00 per 100

**PORTRUSH** (17). A lovely late-flowering variety with broad flat, pure white perianth of great substance and almost flat white crown with deep green eye. Tall, vigorous plant with good stem and very free flowering.

N 308—75 cts. each; \$7.50 per doz.

## DOUBLE NARCISSI Div. 4

**Acropolis**

**ALBUS PLENUS ODORATUS (DOUBLE WHITE POETICUS)** (16), double snowy white Gardenia-like blossoms late in May: cool soil. Not suitable for forcing or bowl culture and it requires to become established before flowering freely

N 309—\$4.50 per doz.; \$30.00 per 100

**ACROPOLIS** (18) (Richardson). A really magnificent double, the brilliant clear red petals interspersed with white at the centre contrasting perfectly with the perianth of purest white. A full yet delicately balanced bloom that is certainly outstanding in its class.

N 310—\$4.00 each

**Top: Texas**

**Bottom: Golden Ducat**

**GOLDEN DUCAT** (18), F.C.C., this sport of the well-known Daffodil King Alfred is a fine full double variety, of which the larger segments are canary-yellow and the smaller segments interspersed between the larger, are aureolin yellow.

N 311—75 cts. each; \$7.50 per doz.

**INGLESCOMBE** (16), A.M., a fine beautiful flower of very fine quality and form, one of the best doubles of this section, producing a large flower of a uniform primrose colour, a vigorous grower.

N 312—\$4.25 per doz.; \$28.00 per 100

**Irene Copeland**

**IRENE COPELAND** (14), a most wonderful fully double flower, its creamy-white segments are interspersed with apricot. Fine garden plant and naturaliser.
