## HORTICULTURAL CLASSIFICATION

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

### Notes

- The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
- Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

## Cultural Notes

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

**DIVISION 3 - SMALL CUPS**

**"Aintree"** 3W-O. Early mid-season. Bred by John Williams (Park Springs x Shinning Light). This is an excellent show variety with smooth, chalky white broadly overlapping perianth segments, good poise, a neat goblet shaped cup of rich orange, at maturity the perianth does take slight reflex in a manner similar to its parent. An excellent plant and fine flower both for show or the garden . . . . .£2.50 each or 3 for £6.00

**"Bethal"** 3Y-Y(LM) S342 (Aircastle x Montego) When first shown this interesting variety won Best Bloom in the Southwest Championship class. I think it has improved since then, and last year was to gain top place at the national show in its class. The flower opens with a whitish yellow to the broad perianth and soon develops in colour to become a lovely citrus lemon throughout . . . . .each £12.00

**"Cheesewring"** 3W-WWY(L) S486 (Cool Crystal x Delos) This flower is large and of good show form. The broadly ovate perianth shows off the shallow bowl shape corona which is pale primrose yellow and white at the base. Tall stem, also excellent as a cut flower . . . . .each £4.00

**"Crenver"** 3W-GYR. Late season. This is a very old variety that is very sweetly scented. The perianth opens a greenish white but soon whitens out to show off the poeticus style of corona and could well be useful for further breeding of the poeticus style of flower . . . . .each £1.50 or 3 for £3.50

**"Fairlawns"** 3W-YYO(M) S191 (Corofin x Kimmeridge) x Merlin). A flower with a broad well overlapping perianth of pure white and an evenly goffered small cup of yellow and a bright orange rim, good for show or the garden, and a strong vigorous plant . . . . .each £5.00

**"Feock"** 3W-YYR (Corofin x Kimmeridge) S93. Late mid-season. Shown in my winning collection at the County Festival Show, and has been much admired by several knowledgeable experts for several years. The flower is large and round with broad smooth perianth segments, and a bright yellow neatly frilled cup with a deep red rim, a strong plant and an excellent show flower . . . . .each £4.50

**"Gorran"** 3W-YYR(LM) S196 (Corofin x Kimmeridge). Here is a large flower with ovate perianth that is well overlapping and quite acute at the tips. The brightly coloured flatish cup is yellow with a dark red rim. It has won its class several times here in the Southwest and done well in other regions as a pre-released seedling, a very prolific flowerer and a rapid increaser. A large stock permits our low introductory price . . . . .each £3.00 or 3 for £7.50

**"Greenodd"** 3W-YYW. Late season. (Reg Nicholl) No 17/86. Bred and raised by Reg Nicholl, this was a seedling that he sent to me and has been much admired at National level. The perianth is broad smooth and pure white with a disc shaped corona of bright yellow fading at the base .....each £12.00

**"White Lady"** 3W-Y. Late mid-season. This very old and charming variety was raised by the Rev. GH Engleheart and registered pre 1898 and received an Award of Merit in 1898. It was a major plant in the florist industry. White Lady was grown by Dan duPlessis and his father before him, some 70 years ago. Although long discarded from the commercial markets it has survived in farm boundary hedges for well over 50 years. I am delighted to be able to offer it to you . . . 3 for £2.50

**"Winholme Jenny"** 3W-GWW(LM) S387 (Cool Crystal x Delos). Named by a notable grower and exhibitor who has had considerable success with this as an unregistered seedling. This is a large and pure white variety with a lovely green centre. A strong plant with good increase .....each £3.00

**DIVISION 5 - TRIANDRUS HYBRIDS**

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

**"Budock Bells"** 5W-W(L) S98 (Broomhill x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potential .....each £6.00

**"St. Day"** 5W-Y(LM) S717 (Merlin x Foundling) x *n.triandrus*). This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear colours .....each £15.00

**"Tater Du"** 5W-Y (Penril x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits. ....each £5.00

**DIVISION 6 - CYCLAMINEUS HYBRIDS**

"**Betsy MacDonald**" 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind. ....£8.00

Betsy Macdonald 6W-P

"**Carclew**" 6Y-Y (ST. Keverne x n.cyclamineus) S6 Early Season. Carclew 6Y-Y

"**Coombe Creek**" 6W-O (LM) S431 (Kea x Foundling). "**Crofty**" 6Y-Y (E) S271 (Perimeter x n.cyclamineus). We have been admiring this charming little variety in our trial beds for some years now, and when shown at the Royal Horticultural Society hall to several distinguished authorities, achieved much acclaim for its dainty charm and cyclamineus characteristics, the cup is short and neat, with a very broadly overlapped perianth of soft golden yellow, excellent for show and the garden. ....each £3.50

"**Kathy's Clown**" 6W-WWP (M) S432 (Kea x Foundling). Here is a lovely little dwarf plant that has stood the trials in our windswept fields, it is beautifully formed for showing purposes with the broad well overlapped perianth strongly reflexed, the cup opens with pinkish yellow tones but quickly fades to a clear pink and neatly frilled rim, this one we love and highly recommend. each £4.50

**DIVISION 7. JONQUILLA HYBRIDS.**

This Jonquilla section is for hybrids that have been bred with the species *n.jonquilla*. The resulting plants vary in stature from quite dwarf to very tall, however they are generally on good stiff stems that can stand a fair amount of wind. Most of the stems do have several flowers on each and without exception all are sweetly scented, which makes them ideal for indoor decoration.

**"An-Gof"** 7W-GYO(LM) S727 (Lancaster x *n.jonquilla*).

This we believe to be the first of this colour in the Division, it has up to 3 florets on the stem but mostly twos, very scented and of excellent show form, the plant is strong and of good increase . . . . .each £12.00

**"Boscastle"** 7Y-Y(L) S111 (Aircastle x *n.jonquilla*).

2 or 3 sweetly scented flowers to a stem with broad smooth and well overlapping perianth segments make this an ideal show quality flower, bulbs often give secondary stems which can only add to its benefits as a perfect plant for the garden or cutting . . . . .

. . . . .3 for £2.50 or 5 for £4.00

**"Hugus"** 7O-R(LM) S768 (Altruist x *n.jonquilla*).

A brightly coloured flower with 2 to 3 sweetly scented blooms sometimes 4 to a stem, the colours are yellow with orange undertones when first open, but as the bloom matures they turn to a distinct orange flush with a cup of dark orange-red, a good plant and has been much admired when shown as a seedling . . . . .

**Division 8. The Tazetta Hybrids.**

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"Hugh Town" 8Y-O(VE) Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you .....

**Division 9. The Poeticus Hybrids**

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

**"Blisland"** 9W-YYR(L) S584 (Corofin x Lady Serena). We have had many successes with this on the show bench, the flowers are pure white with a shallow corona of yellow rimmed in red, of good substance and delightfully scented, we have a good stock available ..... each £5 or 3 bulbs for £10

**"Kabani"** 9W-GYR(L) S742 (Woodland Star x Lady Serena). I have successfully shown this for several years. The perianth is broad and well overlapped to show off the round flat evenly split corona to its best. ...each £3.00

**"Jack Wood"** 11aY-YYO (M) S540 (St Keverne x Tiritomba)

We think this is probably the best show form flower in his division we have yet; beautifully balanced and very smooth the colours are rich golden shades with a touch of orange at the rim the vigour of both its parents have been passed on to this plant to make well suited to the Garden, for cutting and for the Showbench. each £8.00

**"Jantje"** 11aY-O(EM) S113 (Brandaris x Paricutin). Pronounced 'Yan cher' this was named at the special request of the Dalton family for Jan a popular figure in the daffodil fraternity, we are very pleased to release this excellent variety to you. The colours are bright, the plant strong and vigorous, with a proven show record. It has been admired in our trial beds for several years .....each £4.00 or 3 for £10.00

**"Max"** 11aY-YRR(M) S412 (Gironde x Falstaff). Affectionately named after my mother Mary Louise, this is we believe to be one of the best Collar Daffodils yet available. The vigour of this plant is inherited and clearly evident from both the parents, as is the neatness of the round flat coronal segments, beautifully enhanced by the broad well overlapped perianth. A super show flower that we believe will be much sought after .....each £15.00

**"Menehay"** 11aY-R (Paricutin x Top Hit) S155. Mid-season. Good perianth with a flat evenly split cup of clear colours, it is of excellent show form, a good plant with stiff stem .....each £4.50

**"Sparnon"** 11aW-GYY (M) S118 (Pearlax x Audubon).

One of our earlier crosses in this Division but we were reluctant to name it, but as the stock built up the vigour and quantity of blooms has made this a most desirable plant for the garden or for cutting, but we have also had some success with it on the show benches, it always attracts attention in our fields, the flowers are white with a soft canary yellow frilled corona with greenish tones at the centre, well liked by our florist friends. .... 3 bulbs for £4.00 or 5 for £5.50 or 10 for £6.00

**"Rosannor Gold"** 11aY-Y (E) S363 (Obelisk x Tamar Fire).

An excellent plant for the garden, or cutting and for show, it is clear golden yellow throughout with broad well overlapped perianth segments and a slightly frilled corona laying flat and closely overlaying the perianth. ....each £6.00

**DIVISION 13 - The Species and Wild Forms**

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.
