INTRODUCTION FOR 2002

The Spring of 2001 proved to be a memorable one for Daffodils the Flowers were of superb quality, the growth strong and healthy, and marred only by the severe weather conditions which at times prevented us from attending all the shows, we were delighted to be able to present our customary display at the national Daffodil society Show, and receive their highest Award.

Sadly on the 20th September, Dan duPlessis died suddenly, he was of course my Uncle but also a very close Friend and Mentor to me, also affectionately known to a great many in our Daffodil Fraternity as "Uncle Dan", he will be remembered for his gift of friendship to all he met, his great love of the Daffodil and for the lifetime of service he gave to the industry, the Family and all who knew him sadly miss him.

We shall over the next few years be continuing to grow and assess Dan's seedlings and hopefully introduce a few surprises to you.

This year's catalogue continues to expand, with several new varieties of our own raising, and as stocks from our International collection increase in quantity to permit introduction, we hope you will enjoy this edition, please pass it on to a Friend when you have finished with it, or why not send a Friend a special gift for this Autumn, we are very happy to make up any collection, just enclose a personal card and tell us how much you wish to spend, give me the date guide you wish the parcel to arrive, and leave the rest to us.

We shall again be featuring displays at:-

Penzance Show on the 14th, 15th and 16th March.

Falmouth 30th, 31st March and 1st April.

Probus Gardens 6th and 7th April.

R.H.S. London 9th and 10th April

Cornwall Garden Society Show on 1st, 2nd, 3rd and 4th May

HORTICULTURAL CLASSIFICATION

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

Notes

- The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
- Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

DIVISION 1

TRUMPET DAFFODIL CULTIVARS

One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

DIVISION 2

LARGE-CUPPED DAFFODIL CULTIVARS

One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

DIVISION 3

New Horticultural Classification

(taken from the International Daffodil Register by kind permission of the Royal Horticultural Society)

Cultural Notes

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

The flower has the perfect poise and form for top exhibition it is large and has broad smooth perianth segments that show off the bright Pink corona, slightly paler at the base but in perfect balance. "Greatwood" 1Y-Y(M) S305 (Ormeau x (St. Keverne x New Zealand 1Y-Y seedling)).

We bred this from parents that possessed the strength and vigour that is looked for in good Daffodils, St. Keverne seems to resist basal rotting and the N.Z. seedling had the form and breadth of perianth of a top show flower. DIVISION 5 - TRIANDRUS HYBRIDS

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

"Budock Bells" 5W-W(L) S98 (*Broomhill* x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potentialeach £6.00

"St. Day" 5W-Y(LM) S717 (*Merlin* x *Foundling*) x *n.triandrus*). This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear colourseach £12.50

"Tater Du" 5W-Y (*Penril* x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits.each £5.00

DIVISION 6 - CYCLAMINEUS HYBRIDS

"Betsy MacDonald" 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind. £6.00

"Carclew" 6Y-Y (ST. Keverne x n.cyclamineus) S6 Early Season. A undisputed Division 6 which has been much admired both at shows and in the field trial beds, the perianth segments are narrow and fully reflexed, the flower is of bright golden yellow, held on a short neck and stiff stem, and is an ideal plant for the windy situation £5.00

"Coombe Creek" 6W-O (LM) S431 (Kea x Foundling). The short stiff stem makes this a perfect plant for the more exposed situation, but the flower is also well suited for the show bench, the ivory white perianth is broad, well overlapped and strongly reflexed, with a long corona of orange with pinkish undertones.

.....each £6.00

"Crofty" 6Y-Y (E) S271 (Perimeter x n.cyclamineus). We have been admiring this charming little variety in our trial beds for some years now, and when shown at the Royal Horticultural Society hall to several distinguished authorities, achieved much acclaim for its dainty charm and cyclamineus characteristics, the cup is short and neat, with a very broadly overlapped perianth of soft golden yellow, excellent for show and the garden. each £3.50

"Frogmore" 6Y-Y (LM) S210 (Ormeau x n. cyclamineus)

We have named this at the request of several successful exhibitors and enthusiasts, it is a little larger than many in this division but does show all the natural characteristics, and has been very successful on the show benches, beautiful solid colour and a strong plant. £5.00 each

"Kathy's Clown" 6W-WWP (M) S432 (Kea x Foundling). Here is a lovely little dwarf plant that has stood the trials in our windswept fields, it is beautifully formed for showing purposes with the broad well overlapped perianth

"Kea" 6W-YP (Jenny x 2W-P seedling) S217. Late mid-season. Successfully shown at the R.H.S. under number 1-2-80. This has a good cyclamineus form, the colour could be better, and does need a little time to develop each £5.00

"Penril" 6W-O. Mid-season. Another seedling acquired from Brian, this is a much shorter plant and has a typical cyclamineus growth habit. The perianth is not quite pure white but does reflex naturally and the slightly expanded goblet cup is a most interesting coppery orange tone, a very good plant admirably suited to the garden or show5 for £2.50

"Percuil" 6Y-Y (St Keverne x *n.cyclamineus*) S3. Early season. A true Division 6 flower with narrow naturally reflexing perianth segments and a typical trumpet, short stemmed and very nice in pots.each £4.00 or 3 for £8.50

"Roscarrick" 6W-P. Late season. Raised by Brian Duncan, this is a seedling stock that I purchased some time ago, and is a particularly fine plant that increases well and is a pretty flower, much admired by all who see it. A little large for some Division 6 critics, but has had many successes on the show benches both here in Cornwall and at national level - very smooth lovely colours3 for £4.50

"Sumo Jewel" 6Y-Y (Arctic Gold x *n.cyclamineus*) S213 Early season. A sturdy plant with lovely graceful flowers that last a long time on the plant, the reflexing perianth segments of deep yellow do have a slight twist, and the long and narrow waisted trumpet is neatly flanged at the mouth, all to make this a perfect flower for both show and garden.each £3.50

"Trehane" 6Y-Y (St Keverne x *n.cyclamineus*) S212. Early season. Another good Division 6. A strong plant that produces many fine blooms that last a long time on the planteach £2.50

"Treverva" 6Y-Y (Foresight x *n.cyclamineus*) S2. Very early season. Very early to flower - not the best of show form but a true Division 6 character, very nice in arrangement when picked young. The flower is small but grows when left on the plant.3 for £2.50

DIVISION 7. JONQUILLA HYBRIDS.

This Jonquilla section is for hybrids that have been bred with the species *n.jonquilla*. The resulting plants vary in stature from quite dwarf to very tall, however they are generally on good stiff stems that can stand a fair amount of wind. Most of the stems do have several flowers on each and without exception all are sweetly scented, which makes them ideal for indoor decoration.

"An-Gof" 7W-GYO(LM) S727 (*Lancaster x n.jonquilla*).

This we believe to be the first of this colour in the Division, it has up to 3 florets on the stem but mostly twos, very scented and of excellent show form, the plant is strong and of good increaseeach £12.00

"Boscastle" 7Y-Y(L) S111 (*Aircastle x n.jonquilla*). 2 or 3 sweetly scented flowers to a stem with broad smooth and well overlapping perianth segments make this an ideal show quality flower, bulbs often give secondary stems which can only add to its benefits as a perfect plant for the garden or cutting
.....3 for £2.50 or 5 for £4.00

"Hugus" 7O-R(LM) S768 (*Altruist x n. jonquilla*). A brightly coloured flower with 2 to 3 sweetly scented blooms sometimes 4 to a stem, the colours are yellow with orange undertones when first open, but as the bloom matures they turn to a distinct orange flush with a cup of dark orange-red, a good plant and has been much admired when shown as a seedling
.....Sold Out

"Kit Hill" 7Y-YWW(L) S107 (*Aircastle x n.jonquilla*). Stems usually with two sweetly scented florets, very smooth and soft pale yellow perianth segments and a neat round cup that fades to ivory white, this flower has already won its class on several occasions and much admired in our trials ..each £2.00 or 3 for £5.00

"Mowser" 7Y-OOR (LM) S557 (*Altruist x n.jonquilla*) Up to 4 florets on a stiff stem, it is very prolific of bloom with many secondary blooms with 1 to 3 florets, the blooms are neat and rounded, of dark golden yellow with a shallow crown of dark red slightly paler at the base (AM)e.each £10.00

"St. Piran" 7W-Y (*Aircastle x n.jonquilla*) S108 Late season. Like our Cornish Saint this flower has been much revered, it has had some good success on the show benches when under number, it is also a particularly good plant and well suited to the garden and stands the weather well, like most in the jonquilla section has a delightful scent, usually two or three florets on the stem.each £2.50 or 3 for £5.00

The scent is sweet and the perianth smooth and opens a soft creamy yellow which fades to white. Very long lasting. . .each £1.00 or 3 for £2.50

"Treble Two" 7Y-GYY(LM) S222 (Aircastle x *n. jonquilla*) Named at the request of several admirers of this flower. It has been successfully shown under number for many years. Two or three large rounded flowers to the stem, smooth and very broadly overlapped. A good show flower . . .Few each £12.00

"Wheal Coates" 7Y-O(M) S416 (Pinza x *n.jonquilla*) AGM This is a lovely flower of show quality, beautifully scented and a rounded well overlapped perianth with shallow cup of bright orange, usually two flowers to each stem, with bulbs sending many secondary stems to extend the season. . .£2.00 each, 5 for £7.50

"Wheal Kitty" 7W-W (Handcross x *n.jonquilla*) S219 Early season. Named at the suggestion of several noted growers as an ideal plant for the garden, the stem is short and stiff and the flower stands well in bad weather, like many from this division a great many secondary blooms are produced to extend the flowering period, the flowers open with yellow undertone but soon fades out to a clear chalky white, the perianth is broad and sometimes take on a little twist when mature, it has been exhibited with some success and we see no reason why it should not continue to do so. . .3 for £2.50 or 10 for £6.00

Division 8. The Tazetta Hybrids.

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean . They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"Hugh Town" 8Y-O(VE) Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you

Division 9. The Poeticus Hybrids

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

"**Blisland**" 9W-YYR(L) S584 (Corofin x Lady Serena). We have had many successes with this on the show bench, the flowers are pure white with a shallow corona of yellow rimmed in red, of good substance and delightfully scented, we have a good stock available each £5 or 3 bulbs for £10

Penjerrick 9W-GYR

"**Penjerrick**" 9W-GYR (L) S554 (Woodland Star x Lady Serena)

This is a larger flower on the style of Lady Serena, but with much more substance and a smoother perianth the shallow crown is very rich in colour with a hint of olive in the throat, I have show this with success on several occasions at the RHS shows in my 5 to 9 group.

DIVISION 11- Split Corona or Collar Daffodils

"Arwenack" 11aY-YYO(EM) S224 (Brandaris x Paricutin). The broad, smooth and flat perianth is well overlapped and a bright Golden Yellow, and is an excellent foil to the six coronal segments opposite and closely overlying the perianth, the outer zone being slightly frilled and deeper orange tone, the plant is vigorous and flowers of a good show quality each £2.50 or 3 for £5.00

"Bosbigal" 11a Y-O (Brandaris x Paricutin) S315 Early season. The perianth is broad and well overlapping, a little pointed, and the coronal segments are evenly split and laying flat to the perianth, a vigorous plant and very colourful flower of good show form. 5 for £4.50

"Boscoppa" 11a Y-O(M) S293 (Obelisk x Tamar Fire) This is a plant of strong vigorous growth - a stiff tall stem that holds the flower with broad overlapping perianth segments, the corona is evenly split and lays flat in six segments to almost cover the length of the perianth, many show successes, we predict this new and exciting variety will have a great future. .3 for £5.00

"Bosinney" 11a W-WPP(M) S333 (Pearlax x Audubon) A flower that has been much admired under trial, the stems are only of a medium length and flowers seem to resist the weather, to make this the perfect plant for the garden. The perianth is somewhat acute though well overlapped and shows off the very pretty slightly frilled corona to its best. 3 for £4.50

"Boslowick" 11aY-O AGM (Gironde x Paricutin) S225. Mid-season. A tall strong plant with a flower of good colour. The perianth is broad and flat, slightly pointed at the tips, with an evenly split cup laying flat against each segment. 3 for £4.50

"Bosvale" 11aW-P(LM) S685 (Chenoweth x Rainbow) x Phantom. This is a good decorative bloom, a flat smooth corona of soft peachy pink that lays nicely against the white perianth segments, has been much admired at shows and won its class on several occasions each £15.00

"Carnyorth" 11aY-R(EM) S117 (Brandaris x Paricutin) The flower appears to last an extraordinary long time and seems to stand the weather, I have used this for show for many years and has many top awards to its credit. The perianth is slightly pointed but flat and well overlapped with a flat evenly split corona, highly recommended. each £3.00, 3 for £7.50

"Gillan" 11aY-YOO(LM)PCe S411 (Brandaris x Falstaff) Has oval perianth segments that are well overlapped of rich yellow. "Gunwalloe" 11aY-R(LM) S291 (Brandaris x Falstaff) This very brightly coloured flower has been selected for its vigour and suitability for show, garden or cut flower. I have successfully shown this for several years. The perianth is broad and well overlapped to show off the round flat evenly split corona to its best. .each £3.00
"Jack Wood" 11aY-YYO (M) AMP S540 (St Keverne x Tiritomba)

We think this is probably the best show form flower in his division we have yet; beautifully balanced and very smooth the colours are rich golden shades with a flat corona of slightly darker tone with a touch of orange at the rim the vigour of both its parents have been passed on to this plant to make well suited to the Garden, for cutting and for the Showbench.each £8.00

"Jantje" 11aY-O(EM) S113 (Brandaris x Paricutin). Pronounced 'Yan cher' this was named at the special request of the Dalton family for Jan a popular figure in the daffodil fraternity, we are very pleased to release this excellent variety to you. The colours are bright, the plant strong and vigorous, with a proven show record. It has been admired in our trial beds for several yearseach £4.00 or 3 for £10.00

"Max" 11aY-YRR(M) S412 (Gironde x Falstaff). Affectionately named after my mother Mary Louise, this is we believe to be one of the best Collar Daffodils yet available. The vigour of this plant is inherited and clearly evident from both the parents, as is the neatness of the round flat coronal segments, beautifully enhanced by the broad well overlapped perianth. A super show flower that we believe will be much sought aftereach £12.00

"Menehay" 11aY-R (Paricutin x Top Hit)AGM S155. Mid-season. Good perianth with a flat evenly split cup of clear colours, it is of excellent show form, a good plant with stiff stemeach £4.50 or 3 for £10.00

Arwenack 11aY-O

"Rosannor Gold" 11aY-Y (E) S363 (Obelisk x Tamar Fire).

An excellent plant for the garden, or cutting and for show, it is clear golden yellow throughout with broad well overlapped perianth segments and a slightly frilled corona laying flat and closely overlaying the perianth.each £4.00

"Sparnon" 11aW-GYY (M) S118 (Pearlax x Audubon).

One of our earlier crosses in this Division but we were reluctant to name it, but as the stock built up the vigour and quantity of blooms has made this a most desireable plant for the garden or for cutting, but we have also had some success with it on the show benches, it always attracts attention in our fields, the flowers are white with a soft canary yellow frilled corona with greenish tones at the centre, well liked by our florist friends.

DIVISION 13 - The Species and Wild Forms

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.
