## INTRODUCTION FOR 2006

*Greetings to you all,*

Last year we were proud to receive seven Gold Medal awards for our Displays throughout the Country, including the Highly coveted Best Exhibit in Show at Boconnoc, Bath and the Royal Horticultural Society show at Cardiff.

We were delighted with, and thank you all for the responses and calls from you our customers, and finally on being awarded the 'Williams Memorial Medal' which is given annually by the R.H.S. for the best exhibit at a show during the year, also the Mrs F.E.Rivis prize for excellence in cultivation.

We have for some years now been growing and offering many of John Pearson's wonderful varieties, we are proud to say, we are now growing all of his introductions in our fields here in Cornwall, this year we are pleased ensure perpetuation and to include in this catalogue his complete range, and shall be adding to the collection as stocks increase, also many of his new and exciting seedlings as they become available.

Our Web Site [www.qualitydaffodils.co.uk](http://www.qualitydaffodils.co.uk) has undergone a complete redesign which will we hope will add to your enjoyment and hopefully encourage many of you to order perhaps that little something special, we are happy to send anywhere in the World, and if you would like to send that unique present to a friend or for a special occasion we will be pleased to assist in any way we can, remember all bulbs are sent out from the END OF AUGUST, THROUGH SEPTEMBER, AND EARLY OCTOBER.

Please order early to avoid disappointment, it is best before the end of July for overseas and the End of August for the UK, we do supply later but often the stocks can be sold out and by October we are all re-planted.

This year we are featuring Displays at,

Devoran 11th March

## HORTICULTURAL CLASSIFICATION

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

### Notes

1. The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
2. Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

**DIVISION 1**  
TRUMPET DAFFODIL CULTIVARS  
One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

**DIVISION 2**  
LARGE-CUPPED DAFFODIL CULTIVARS  
One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

**DIVISION 3**

**Cultural Notes**

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

**DIVISION 3 - SMALL CUPS**

"Aintree" 3W-O. (EM) (Park Springs x Shinning Light). This is an excellent show variety with smooth, chalky white broadly overlapping perianth segments, good poise, a neat goblet shaped cup of rich orange, at maturity the perianth does take slight reflex in a manner similar to its parent. An excellent plant and fine flower for show .....£3.50

"Bethal" 3Y-Y(LM) S342 (Aircastle x Montego) When first shown this interesting variety won Best Bloom in the Southwest Championship class. I think it has improved since then. The flower opens with a whitish yellow to the broad perianth and soon develops in colour to become a lovely citrus lemon tone throughout.....each £5.00

"Cheesewring" 3W-WWY(L) S486 (Cool Crystal x Delos) This flower is large and of good show form. The broadly ovate perianth shows off the shallow bowl shape corona which is pale primrose yellow and white at the base. Tall stem, also excellent as a cut flower .....£2.50 each or 3 for £5.00

"Fairlawns" 3W-YYO(M) S191 (Corofin x Kimmeridge) x Merlin). A flower with a broad well overlapping perianth of pure white and an evenly goffered small cup of yellow and a bright orange rim, good for show or the garden, and a strong vigorous plant.....each £3.50 or 3 for £7.50

"Falmouth Bay" 3W-GWW (LM) S389 (Cool Crystal x Delos) This is a large very broad flower of pure White with a hint of Green in the centre of the frilled cup, has already won many prizes on the show benches, and always in demand for decorative use, the stem is tall and a very vigorous plant. ....each £6.00

"Feock" 3W-YYR (LM)(Corofin x Kimmeridge) S93. Shown in my winning collections at the County Festival Show, and has been much admired by several knowledgeable experts for several years. The flower is large and round with broad smooth perianth segments, and a bright yellow neatly frilled cup with a deep red rim, a strong plant and an excellent show flower.....3 for £7.50

"Gorran" 3W-YYR(LM) S196 (Corofin x Kimmeridge). Here is a large flower with ovate perianth that is well overlapping and quite acute at the tips. The brightly coloured flatish cup is yellow with a dark red rim. It has won its class several times here in the Southwest and done well in other regions as a pre-released seedling, a very prolific flowerer and a rapid increaser. ....each £2.50 or 3 for £6.00

"Greenodd" 3W-YYW. (L) This has been much admired at National level. The plant is vigorous and the stem is tall and stiff. Apart from the impeccably smooth perianth and very pretty bowl shaped cup, it is the very pronounced green in the throat of this flower that makes it a super show flower and a must for the exotic flower arrangements.....each £7.50

"Halloween" 3W-YYO (LM) S863 (Lysander x Feock) Lovely rounded and brightly coloured flower, like many of this type it likes to be given a little protection from the sun to preserve the colours, but is perfect for the show bench has been best bloom in this division on several occasions here in the southwest. ....£15.00 each

**DIVISION 5 - TRIANDRUS HYBRIDS**

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

**"Budock Bells"** 5W-W(L) S98 (Broomhill x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potential ..... each £6.00

**"Morvah Lady"** 5W-W (LM) S614 (Foundling x *n.triandrus*) This is super little variety that has consistently stood the tests of our field trials the stem is short with up to 3 blooms on a stem and a gentle reflexed perianth, we think this will be an ideal variety for the Rock Garden or front of the boarder, we have also had some success on the show benches. .... £5.00 each or 3 Bulbs for £12.00

**"St. Day"** 5W-Y(LM) S717 (Merlin x Foundling) x *n.triandrus*. This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear colours. .... each £12.50

**"Tater Du"** 5W-Y (Penril x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits. .... each £5.50

**DIVISION 6 - CYCLAMINEUS HYBRIDS**

"Betsy MacDonald" 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind. . . . . £3.00

Betsy MacDonald 6W-P

"Coombe Creek" 6W-O (LM) S431 (Kea x Foundling). The short stiff stem makes this a perfect plant for the more exposed situation, but the flower is also well suited for the show bench, the ivory white perianth is broad, well overlapped and strongly reflexed, with a long corona of orange with pinkish undertones. . . . . each £6.00

Chickadee 6Y-O

"Creed" 6W-Y (LM) S851 (Regal Bliss x Pink Silk) xn.cyclamineus) This has been greatly admired for several years in our field trials, it is a little larger than some, but has proved itself to be durable plant and will be excellent for the Garden or for the show bench where it has many successes. . . . . £10.00 each

Kathy's Clown 6W-WWP

"Crofty" 6Y-Y (E) S271 (Perimeter x n.cyclamineus). We have been admiring this charming little variety in our trial beds for some years now, and when shown at the Royal Horticultural Society hall to several distinguished authorities, achieved much acclaim for its dainty charm and cyclamineus characteristics, the cup is short and neat, with a very broadly overlapped perianth of soft golden yellow, excellent for show and the garden. . . . . £2.50 each or 3 for £5.00

"Frogmore" 6Y-Y (LM) S210 (Ormeau x n. cyclamineus) We have named this at the request of several successful exhibitors and enthusiasts, it is a little larger than many in this division but does show all the natural characteristics, and has been very successful on the show benches, beautiful solid colour and a strong plant. . . . . £3.00 each or 3 for £7.50

Frogmore 6Y-Y

"Kathy's Clown" 6W-WWP (M) S432 (Kea x Foundling). Here is a lovely little dwarf plant that has stood the trials in our windswept fields, it is beautifully formed for showing purposes with the broad well overlapped perianth strongly reflexed, the cup opens with pinkish yellow tones but quickly fades to a clear pink and neatly frilled rim, this one we love and highly recommend. . . . . each £3.50

"Katrina Rea" 6W-WOO (EM) The highly reflexed petals are very broad and over-lapping which show the Brick toned cup to its best, a short stemmed weather resistant flower well suited to the more exposed site. . . . . £5.00 each 3 Bulbs for £12.00

"Kea" 6W-YP (Jenny x 2W-P seedling) S217. Late mid-season. Successfully shown at the R.H.S. This has a good cyclamineus form, the colour and does need a little time to develop . . . . . each £5.00

"Penril" 6W-O. Mid-season. Another seedling acquired from Brian, this is a much shorter plant and has a typical cyclamineus growth habit. The perianth is not quite pure white but does reflex naturally and the slightly expanded goblet cup is a most interesting coppery orange tone, a very good plant admirably suited to the garden or show . . . . . 5 for £2.95

**Division 8. The Tazetta Hybrids.**

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

**"Hugh Town" 8Y-O(VE)** Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you, highly scented. ....

**Division 9. The Poeticus Hybrids**

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

**"Blisland"** 9W-YYR(L) S584 (Corofin x Lady Serena). We have had many successes with this on the show bench, the flowers are pure white with a shallow corona of yellow rimmed in red, of good substance and delightfully scented, we have a good stock available . . . . .each £5 or 3 bulbs for £10

**"Colville"** 9W-GYR (Corofin x Crenver) x Crenver) S131 Late season. Named at the request of several enthusiasts, this flower has already featured in the prize winners on several occasions, the perianth opens with greenish undertones, but soon whitens to form a good foil for the brilliantly coloured corona, like all flowers of this kind it will not tolerate the sun and does need to be picked young. . . . .each £7.00

**"Kabani"** 9W-GYR(L) S742 (Woodland Star x Lady Serena). This is a tall strong growing plant of good constitution, a very consistent show quality flower with a broad well overlapped perianth and a shallow corona of bright yellow and a dark red band with a lovely green centre, we have successfully shown this on several occasions . . . . .£4.50

**"Merthan"** 9W-YYR (L) S734 (Corofin x Lady Serena) The flower is a little larger than some of this kind and is held on tall strong stems, the pure white perianth is broad and smooth and shows the flat brightly coloured corona off to perfection, a regular winner at shows and has been Best Bloom of its class at the National Show. . . . .£5.00 each or 3 for £12.50

**"Penjerrick"** 9W-GYR (L) S554 (Woodland Star x Lady Serena) This is a larger flower on the style of Lady Serena, but with much more substance and a smoother perianth the shallow crown is very rich in colour with a hint of olive in the throat, I have show this with success on several occasions at the RHS shows in my 5 to 9 group. . . . .£2.50 each or 3 for £5.00

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.

Many of these varieties have been re-classified from the Miniature section as being just too large in bloom size for the show classes, however the plants are much dwarfier in stature than the standard cultivars and most are well suited for the intermediate classes at show or for the Border and rock Garden.

"Pentire" 11aY-R (M) S686 (Falstaff x Brandaris) (AMe)

We have been growing this for many years and almost put it aside except for the perfection of bloom and its size, but the vigour and increase has now made this a indispensable and valuable little variety for the "Intermediate" sections the plant and flowers are dwarf and much smaller than its counterparts, but the quality of this little flower is such that it has already won on several occasions both here and in the U.S.A. where it received the accolade of Reserve in the entire Show. .... £7.50 each or 3 for £18.00

"Pretty Baby" 3W-GYO (LM) A perfectly proportioned sized bloom with many top awards to its credit at major shows, just 74mm diameter with broad rounded petals and a shallow cup of yellow rimmed in Red and a deep green eye, a "Pretty Baby" ..... £9.00 each 3 for £25.00

"Radjel" 4Y-R(M) S298 (Paricutin x Tamar Fire). A perfect intermediate size bloom that won its class at the National Shows. The stems are tall and stiff with a small formal double flower of bright golden yellow with rich red petaloids. Like its parents a good grower. .... each £5.00

"Salakee" 2Y-Y (E) S401 (Ristin x n.cyclamineus). This lovely little flower is a true intermediate, very dwarf and a good grower, despite its pollen parentage there is no reflex in the perianth, but it has inherited the rich golden colour and smoothness of "Ristin", and has many times been a winner in the intermediate classes. .... each £4.50
