Fall Selection

Bulbs by the Bushel

About graded blooming size bulbs. Bulbs in these bushels are comprised of all sizes that will bloom reliably (aka 'field run grade'). Because the size of the flower is directly related to bulb size, we suggest that you purchase our largest blooming size bulbs for formal plantings. However, if you want bulbs for naturalizing, perennializing, or large-scale informal plantings, the items listed below are your best value.

Daffodils by the Bushel 400 average bulb count per bushel, in graded blooming sizes, 10-16 cm. Will bloom this spring. Ideal for naturalizing. One bushel will cover an average of 75 square feet when planting in sweeps or 125 square feet using naturalizing techniques.

Code	Product #	Description
[A]	2DFB-20	'Fortune' Yellow petals with orange tinted cup fading to yellow. Very prolific.
[A]	2DFB-30	'Ice Follies' The best two-tone white with large yellow frilled corona. Outstanding grower and naturalizer.
[A]	2DFB-40	Naturalizing Mixture Customers tell us they receive up to 8 weeks of blooms from this mixture.
[B]	2DFB-50	Yellow Trumpet Mixture King Alfred type flowers. Blend of 4 yellow trumpet flowers to give an extended blooming season.
[A]	2DFB-45	'St. Keverne' Yellow. Basal-rot free; one of the best varieties we have ever grown. Very floriferous!

Daylilies by the Bushel 100 average plant count per bushel, in graded blooming sizes, 1-2 fan divisions. One bushel will cover an average of 150 square feet when planting in sweeps. Most economical choice for large border plantings.

Code	Product #	Description
[B]	3DYB-20	Daylily Mixture
[B]	3DYB-25	Daylily Red
[B]	3DYB-30	Daylily Pink
[B]	3DYB-35	Daylily Yellow

Hostas by the Bushel 100 average plant count per bushel, 1-2 eye divisions. One bushel will cover an average of 150 square feet when planting in sweeps.

Code	Product #	Description
[C]	3HSB-20	'Royal Standard' Green foliage with fragrant white flowers. Tolerates direct sun.
[C]	3HSB-30	Hosta Mixture A mixture of green, blue-grey and variegated leaf varieties.

Irises by the Bushel Siberian and Japanese. 100 per bushel. Covers 100 square feet.

Code	Product #	Description
[B]	3SB-011	Siberian Iris 'Caesar's Brother'.
[B]	3JPB-10	Japanese Iris Iris ensata 'Rising Sun'.

Lilies by the Bushel 300 average bulb count per bushel, in graded blooming sizes, 1 1/2 cm. One bushel will cover an average of 100 square feet when planting in sweeps or 160 square feet using naturalizing techniques.

Code	Product #	Description
[C]	3ASB-20	Asiatic Lily Mixture A rainbow mixture of Asiatic lily varieties known for their showy, long lasting blooms. These bulbs can be interplanted among existing bulb/perennial beds to fill in the flowering gap between spring and summer blooming plants. You can expect to see blooms over a 4 week period with this mixture!

Liriope by the Bushel 100 average plant count per bushel, 2-3 eye divisions. One bushel will cover an average of 100 square feet when planting in sweeps.

Code	Product #	Description
[A]	3LRB-20	Liriope spicata 'Creeping Lily-turf'. Evergreen leaves with pale pink flowers in late summer. Excellent for underplanting trees or replacing turf in difficult to maintain areas.

Daffodil

Narcissus (Zone 4)

Sugg. planting rate: 3/ft²; Sun-partial shade

Daffodils are probably one of the easiest bulbs to grow. They usually begin welcoming Spring to our farm in mid-February. One can see them all along the ditchbanks at first, their presence a direct result of spills during our annual harvesting and replanting. While this is not necessarily a tribute to mechanization, we think it certainly is to nature! All daffodils are DNII size (14-16 cm in circumference) unless noted otherwise.

Trumpet Cup equal to or longer in length than the petal segments. One flower per stem.

Large Cup Cup is more than one third but not equal to length of the petals. One flower per stem.

Code	Product #	Description
------	-----------	-------------

- [B] 2DF-0100 '**Holland Sensation**' White petals with yellow trumpet. (mid-season, 18")
- [A] 2DF-0102 '**Counsellor**' Golden yellow. Very strong grower. (very late, 18")
