## CATALOGUE OF JACKSON'S DAFFODILS

### FOR 1970 DELIVERY

#### PREFACE

Tasmania produces the best daffodils in the Southern Hemisphere, and probably the best pink-coloured daffodils in the world. The name "Jackson" has been associated with the growing of seedling daffodils since the early 1920's, when my father, the late W. Jackson, commenced hybridising, and I have carried on this work since his death in 1946.

We flower some thousands of seedlings each year, but only a few hundred are selected for further trial and are given at least three years' flowering before being named.

Discard bulbs are offered for sale at \$1.00 per dozen. These contain all colours and include many good flowers.

Selected bulbs that have not been named after three years' flowering are offered for sale at \$2.00 per dozen. These contain many show blooms.

Jackson seedlings have won the Australian Seedling Cup and the Tasmanian Seedling Cup in Hobart from 1955 to 1969, Launceston 1963-64-66-67-68-69, Claremont 1963-1969 and the Australian Championships, Hobart 1964, Canberra 1968 and Launceston 1969.

The figure after a name indicates the relative time of flowering: Number 0, the earliest and Number 6, the latest.

This is followed by the name or initials of the raiser of the variety. G.L.W.—Guy L. Wilson, N. Ireland; J.L.R.—J. L. Richardson, Eire; S.J.B.—S. J. Bisdee, Tasmania; J.N.H.—J. N. Hancock & Co., Victoria; P.D.W.—P. D. Williams, England; A.O.R.—A. O. Roblin, Tasmania; P.P.—P. Phillips, New Zealand.

Bulbs will be available February and March.

## SEEDLING INTRODUCTIONS, 1970

Numbers in brackets indicate number and year of first flowering.

Owing to there being a very small stock of most of these new introductions, only a limited number of each are offered for sale.

**2B. ANYTUS.**—3 (15/64): Another Lod x Rowella seedling of good quality. Smooth white perianth with large flat overlapping minor petals. The trumpet like cup is bright orangy lemon and the colour does not run into the perianth. Very short stiff neck that gives the flower a pleasing presentation. Box Hill Cup, Australian & Tasmanian Cup, Hobart & the Launceston Cup, 1969. \$3.00.

**1C. ANITRA.**—3. (20/65): Bred from 10/60 (Astor x 59/53) x Tranquil. Pure white smooth and flat perianth of excellent quality and substance. The trumpet is well balanced and slightly serrated and rolled at the rim. Short neck on a strong stem with good presentation. Reserve Champion Hobart 1967, Australian & Tasmanian Cups 1967, Tasmanian Cup 1968, Bulman Cup 1968, Box Hill 1969, Launceston Cup 1969. Few to go. \$20.00.

**2B. ARISBE.**—3. (39/65): Bred from Lod x Palana. White perianth with large smooth shovel shaped overlapping minor petals. Large bright yellow cup that nearly measures a trumpet, set at right angles to the perianth. Very short stiff neck with good carriage and presentation on a tall stem. Bulman Cup 1968. \$2.00.

**1B. BETRIN.**—2.3. (12/64): Bred from Ammon x Rowella. White perianth with wide slightly pointed overlapping minor petals. The whole perianth is smooth, flat and of good quality and substance. The well proportioned trumpet is lemon coloured and slightly flanged and serrated at the rim. The flower is well carried on a tall strong stem. Grand Champion Bagdad 1967, Reserve Champion Hobart 1968, Australian Cup and Bulman Cup 1968, Box Hill, Launceston & Bulman Cups 1969. Few to go. \$15.00.

Bulbs will be available February and March.

## SEEDLING DOUBLES

**BANU.**—4. (50/59): A full double, bred from a seedling 2A of mine on to Mary Louise. The perianth consists of a double ring of yellow petals and the centre is full of bright red and yellow petals with red predominant. The flower has good carriage on a strong stem. None available.

**CHIMEON.**—(pink) 3. (59/59): This is a very large double measuring up to 5½ inches across the perianth. The perianth is large and white and the whole centre is pink. Half way through the centre there are six pointed folded petals. The centre is twisted pink petals which grow into the folds of the white pointed ones. Sometimes Chimeon has a stamen, and occasionally pollen, and, from it, crossed with Lawali, I have produced the full pink doubles that I have shown in recent years. Very few bulbs for release at \$40.00 per bulb.

**DOETTE.**—3: Fierenze x Kanchenjunga. Very large white and cream full double, carried on a tall stem. Small stocks. Few to offer. \$2.00.

**NORELLEN.**—(Pink). 3. (72/60): This and Chimeon are the only pink doubles I have as yet, been able to release. This is a full double, although it occasionally does have a stamen and I have used it for breeding. The flower has alternative layers of white and pink petals attractively curled and mixed in the centre like a carnation. The bloom takes a few days to develop on the plant and is carried on a very tall stem. \$2.00.

## SEEDLING SEMI-DOUBLE (Pink.)

**LAWALI.**—2-3: I have classed this flower on its own but sometimes it could be classed as a 2B (Pink) as it occasionally comes single. The pure white perianth often has additional petals. Pink frilled and nicked cup, with extra section of frilled pink cup inside. Several white petals mixed with the pink segments in the wide cup. Strong grower and multiplier. Lawali has been used as a seed and pollen parent to produce the pink doubles I have exhibited over the past years. 50c.
