INTRODUCTION

The ADS Daffodil Journal report of the 1988 Shows mentions by name no less than 16 Ballydorn bred cultivars which appeared in the winning Quinn and Green Ribbon awards, and we are told that there were several other flowers bred here which also were in these exhibits.

It was a pleasure to read of these successes for the growers whose skills produced such good results, and also to see that N. Churchman had two Gold Ribbons, while N. Golden Amber added another White Ribbon to its score.

We are introducing some seven new cultivars this year which we have named after good reports on their performance overseas, and we think that all are distinct enough to make valuable additions to the world wide family of narcissus.

We again make a forecast for the £ sterling/dollar rate of \$1.75 to the £1 sterling, and will as usual make good any shortfall with extra bulbs if this should prove to be out of line when cheques are received.

Payment should be in £ sterling or US \$ by cheques or Bank drafts payable on demand in London.

Early orders recommended as bulb lifting will be completed by 1st July next.

CHOICE NEW DAFFODILS

ARRANGEMENT OF LIST, AND CODING SYSTEM

The list has been arranged in alphabetical order with the Division and Classification of each cultivar shown in the margin. The classification is in accordance with the Revised System adopted by the R.H.S. Colours are abbreviated as follows:

w—white or whitish; g—green; y—yellow; p—pink; o—orange; r—red.

For the purpose of description, the daffodil flower is divided into perianth, and corona. The perianth is described by the first letter following the number of the Division to which the cultivar belongs.

The corona is treated as having three zones: An eye zone, a mid-zone and an edge or rim. The description of the corona is separated from the description of the perianth by a hyphen and the letter then following the hyphen describes the corona colour starting with the eye zone. If however the corona is of a single colour, only a single letter of the colour code is used to describe it.
