Narcissi-Daffodils

Truly nothing gives greater delight than to anticipate the glorious possibilities of the fat narcissus buds thrust up so bravely in early spring and then to gaze upon the radiant flowers which unfailingly thrill us with their beauty.

Whether you prefer the common English name of daffodil or the more correct botanical name of Narcissus, this family is the glory of the early spring garden and it would hardly seem like spring without them, "blithe and yellow as canaries." Their ease of culture, freedom from pests and prolific increase combine to make them ever more popular. The newer varieties are a revelation in size and beauty with many new shades and combinations.

In borders they are lovely carpeted with small growing plants like Myosotis, Phlox divaricata, Iberis, Alyssum saxatile and Primroses to name just a few. Behind them could go Gypsophila Bristol Fairy, Dictamnus alba and Platycodons to cover the space after they have died down. They are also excellent planted among shrubs where they may enjoy partial shade. Nearly all are lovely for pot culture to cheer dull winter days.

Unless otherwise stated all bulbs are selected 1st size double-nosed bulbs. Of all varieties, however, we can supply smaller sizes at correspondingly lower prices.

The Exquisite New Pink Daffodils

After years of patient work by the world's most skillful hybridists, a glorious new strain of PINK DAFFODILS has been produced. We are one of the very few firms offering for the first time this year three choice varieties for the delectation of our customers.

As the stock of these is very scarce we are forced to limit sales to one each of the following varieties to customers whose orders total more than \$25.00:

PINK FANCY. The well-formed glistening white perianth is surmounted by a small cup of dainty bronze pink with a darker rim. Flowers are medium size, and the stems moderately short but graceful. Very free flowering and fine for pot culture. Each \$12.00.

PINK GLORY. The trumpet of this variety is the most pronounced and the deepest pink of all three; beautifully framed by the broad, well-formed perianth of pure white. Each \$14.00.

PINK RIM. The short broad cup of creamy white is exquisitely fringed with a margin of pure rose. An exceptionally fine variety. The earliest and most free flowering of all three. Each \$14.00.

As the flowers do not open well in water it is best to cut when they are fully open, not when they are in bud. For exhibition purposes flowers should be shaded somewhat against brilliant sunlight.

During the past few years one or two varieties of DAFFODILS have been called "pink," but their color has bordered on the apricot-pink. These are the first true pinks, and we are proud to be one of the firms introducing them into American gardens.

Van Tubergen's Specially Selected Mixtures for Naturalizing

If you have an old orchard or other grassy place where the grass need not be mown before the end of June, there is a fine opportunity to naturalize Daffodils. The effect of the Daffodil blooms mingling among the grass is one that cannot well be described in words. The army of graceful flowers nodding and waving in the breeze is entrancingly beautiful; and the greater the quantity used, the more pleasure derived.

To encourage the use of Daffodils in this manner, we asked our firm to put up some special mixtures of fine quality bulbs that we could offer our customers with fullest confidence in their success. Fine also for the cutting garden.

SPECIAL MIXTURE OF SHORT TRUMPET VARIETIES (N. Barri incomparabilis, Leedsii, poetaz and poeticus). First Size Round Bulbs 50 \$3.15, 100 \$5.90, 500 \$24.90.

SPECIAL MIXTURE OF LONG TRUMPET VARIETIES. First Size Round Bulbs 50 \$4.35, 100 \$8.20, 500 \$34.40.
