GRIFFITH @ TURNER CO.'S

WW BULBS FOR AUTUMN OF 1903

GENERAL DIRECTIONS TO OUR PATRONS:

BULBS PLANTED For forcing purposes late in the season are not as satisfactory to the grower as when planted early, and the grower is oftentimes inclined to find fault with the stock

Our early customers are always sure of the best results in selecting varieties from our own direct importation, as they get the stock at its best, and also have the advantage of early planting.

ALL BULBS are mailed free at the price named in the Catalogue, except when otherwise noted.

PLANTS should be sent by express whenever possible. Of course, in places where there is no Exprsss Office, Plants have to be sent by mail.

WE CANNOT, however, send Potted Strawberry Plants by mail.

REMITTANCES.-Remit by draft, postal money order or registered letter.

Orders from unknown correspondents must be ac= companied with the cash.

Address All Orders to GRIFFITH @ TURNER CO. MAIN OFFICE

205, 207 @ 209 N. Paca Street, Baltimore, Md.

GRIFFITH & TURNER CO. gives no warranty, ex= pressed or implied, as to description, quality, produc-tiveness or any other matter of any Seeds, Bulbs or Plants they send out and they will not be in any way responsible for the crop. If the purchaser does not ac= cept the goods on these terms, they are at once to be returned.

-How to Cultivate Bulbs.

A NY good garden soil, well pulver-ized, is suitable, but good sandy boam is preferable. A dressing of fine bone meal will be found very beneficial. Plant the large bulbs about four inches below the surface, the smaller bulbs not so deep. The usual time for planting is in October or No-vember, but any time during the win-ter will answer if the surface only is vember, but any time during the win-ter will answer, if the surface only is frozen. After the bulbs are planted, if hard, deep frosts set in, cover with a light litter that may be raked off in the spring. The bulbs will then shoot and flower without further trouble. If early spring should prove dry, water well. The arrangement of the bulbs in the beds is much a mat-ter of taste and situation. They may be plauted in rows in masses in circle be planted in rows, in masses, in circles, or half circles. Each color by itself, or divided, or mixed. No matter how ar-ranged, they will always prove interesting and beautiful

After they flower and die down, the bulbs may be allowed to remain in the ground to flower the next season, or if beds are required for other plants may be taken up, soaked in water for about twelve hours, then dried and laid away for replanting. Bulbs are so reason-able in price that it does not pay to keep the old ones, especially as the flowers of the new ones are for equation to the old. are far superior to the old.

MIXED SORTS.

THESE are carefully selected, well-ripened bulbs, comprising different shades of the various colors, that will produce fine blooms. If properly treated, they will do well in pots, but are chiefly used for outdoor culture; not to be confounded with the cheap mixtures some-times offered for outdoor planting.

CULTURE of BULBS IN POTS OR BOXES.

POTS for single bulbs should be twice the diameter of the POTS for single bulbs should be twice the diameter of the bulb. The same proportion of room should be observed when planting in boxes or in pots holding more than one bulb. The boxes or pots should have proper drainage, so that no wa-ter will lie in the bottom. The soil used should be good, sandy loam, mixed with bone meal. After planting, place the boxes or pots in a dark, cool place for three weeks, until the roots are well started, then gradually bring them to the full light.

To Grow Hyacinths in Glasses.

F ILL the glass with water. Place the bulb in the glass with the bottom touching the water. Place the glass or glasses in a dark, cool place for about three weeks, or until the roots are three or four inches in length and the flower stem one inch high. After they are brought out and acclimated, the more sunlight they get the better.

As the water evaporates it must be renewed and changed as often as it becomes discolored or impure. When the flower bud begins to swell, the water may be brought higher up on the bulb. The tem-perature should be as even as possible. A few drops of harts-horn in the water will help the bloom.

A MONG hardy bulbs, the Hyacinth deservedly stands foremost; it is not only a general favorite for the garden, but is exceedingly popular as a winter flower, from the facility with which it may be forced into bloom, either in pots or glasses. The named varieties of Dutch Hyacinths are becoming popular for bedding purposes, regularity in height. They are espe-cially recommended for parlor or greenhouse culture in pots, boxes, etc.

TULIPS. FOR FORCING AND OPEN GROUND. There is an increasing domand for Tulips, especially La Reine, Keizerkroon, Yellow Prince, Townsol for Tulips, especially La Reine, Keizerkroon, Yellow Prince, Tournesol

HE letters A, B and C indicate earliness of blooming. Those marked A are earliest, B next, and then C. L stands for late. stands for late.

We have given special attention to the selection of our We have given special attention to the selection of our Tulips, and our collection is unusually fine, embracing the choicest leading varieties. For early forcing the Duc van Thol and early spring sorts are best. They should be started in September, and treated the same as Hyacinths. Early in November they may be removed into heat. The greater part ought to be potted from the middle of September to the end of October. For outdoor planting they should be set three to four inches deep, and four to six inches apart, according to the size of the bulb. A few bulbs planted here and there produce but little effect, but when planted in masses, or in small groups, they become at once brilliant and grand, and surpass in variety of coloring and picturesque effect almost any other flower. any other flower

DOUBLE TULIPS.

DOUBLE Tulips have massive flowers of brilliant and varied colors, shades and markings, and, being double, the flowers last much longer in bloom than single vari-eties, and in consequence, when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. They are robust growers and exceedingly effec-tive. When ordering by mail, add 5c, per dozen to the price tive. When ordering by mail, add 5c. per dozen to the price for postage. Per Doz. Per 100.

JAPAN FERN BALLS.

T HESE have been found by florists to be one of the best paying investments.

They are perfectly hardy; a ctual hard freezing does not injure them. They take but little space, as they can be suspended from the rafters of a greenhouse.

DIRECTIONS FOR STARTING.

Place ball in water for fifteen minutes and then suspend in any desired position; repeat every 2 days till growth is started, after which sprinkle occasionally as required. To use in ferm dish, cut ball in halves, placing flat side down, thus getting 2 dishes of beautiful ferns. The Fern Ball may be allowed to dry up at any time and be set away, and start again by watering, as before.

SCILLA SIBIRICA.

T HIS is one of the prettiest early spring blooming bulbs of dwarf habit, with sprays of exquisite rich blue flowers. Grown in masses, in conjunction with Crocus, Chionodoxa, and Snowdrops, the effect is charming.

Per dozen..... Per 100.....

If by mail, add 15c. per 100 for postage.

CHIONODOXA.

Glory of the Snow.

CHIONODOXA LUCILIAE, a most exquisite early spring flowering plant, thoroughly hardy, and will thrive well in any soil; flowers of a briliant sky-blue color, with white centre. 15c, per dozen; 90c, per 100.

PRICES OF JAPAN FERN BALLS.

DORMANT BALLS:

20c!

\$1.50

First Size.—30c. each; three for 75c. Large Size.—35c. each; three for \$1.

By mail, 10c. extra.

SNOWDROPS.

THE charming Snowdrop is the first of all flowers to herald the approach of spring. It can frequently be seen in bloom when the ground is white with snow, as it takes every advantage and hastens to display its graceful snowwhite bells before winter has disappeared. In conjunction with Chionodoxa and Scilla a matchless effect can be produced.

SINGLE SNOWDROP (Galanthus nivalis).—Pure white, graceful bells. Early flowering, 15c, per dozen; 75c, per 100.

DOUBLE SNOWDROP (Galanthus nivalis fl. pl.).-Flowers perfectly double; pure white. 20c. per dozen; \$1.25 per 100.

NARCISSUS OR DAFFODILS.

THERE are no hardy plants which havemore points of merit than the Narcissus. Perfectly hardy in all latitudes; if planted in well - drained ground, they multiply and increase in attractiveness each year. They are as easily forced as the Hyacinth, and a const ant succession of flowers may be had from January to the middle of May. The flowers are among the

blooms, very lasting and of endless variety of form and coloring. It is important that they be not too strengly forced, otherwise the culture is very simple.

Double Von Sion.

DOUBLE NARCISSUS.

N^O collection is complete without the double flowering sorts. While not as attractive as many of the single varieties, they possess a charm peculiarly their own. They are excellent for forcing, and thrive equally well in the house or open ground, being perfectly hardy.

VON SION-Large Double Noses.-35c, per dozen; \$2.25 per 100; \$20.00 per 1000.

INCOMPARABLE (Butter and Eggs).-Orange and yellow, of large size and good shape. 20c, per dozen; 75c, per 100.

ORANGE PHOENIX (Eggs and Bacon).-Light citron and orange; an excellent flower for forcing. 25c. per dozen; \$1.25 per 100.

ALBA PLENA ODORATA.-Double pure white; very sweetscented. This beautiful variety cannot be forced, but millions are grown in the open ground for supplying the cut-flower markets of Europe. 15c. per dozen; 75c. per 100; \$7.25 per 1000.

POLYANTHUS NARCISSUS.

Beautiful, free-flowering, deliciously sweet-scented flowers, of the earliest culture; suitable for forcing or for garden decoration. They bear tall spikes of bloom, with from six to twenty flowers each.

PAPER WHITE.—Large-flowered. The flowers are starshaped, very beautiful, and emit a delicious odor. Three for 10c.; 25c. per dozen; by mail, 40c.; \$1.25 per 100; \$10.00 per 16:0.

NEWTON.-Fine yellow, with orange cup. 5c. each; 30c. per dozen; by mail. 40c.

STATES GENERAL.-Clusters of white flowers, with citron-colored cups, shading to white. Very early. 5c. each; 35c. per dozen; by mail, 50c.

GLORIOSUS.-Immense trusses of pure white, with primrose-colored cups. Very early; splendid to force. 5c. each; 40c. per dozen; by mail, 50c.

GRAND MOXARQUE.-Large white flowers, with lemonyellow cup. Can be successfully grown in water. 5c. each; 40c. per dozen; by mail, 55c.

GRAND SOLEIL D'OR.-Rich yellow, with reddish orange cup-a favorite bedding and cutting variety. 5c. each; 35c. per dozen; by mail, 50c.

DOUBLE ROMAN.—Clusters of white flowers, with double citron-colored cups. It is very early and is grown largely for forcing. 5c. each: 30c, per dozen; by mail, 45c.; §4.50 per 10o,

WHITE PEARL-Large, pure, satiny-white; beautiful. 5c. each; 35c. per dozen; by mail, 50c.

SINGLE NARCISSUS.

VON SION.-The famous old Dutch Daffodil; a lovely shade of golden yellow; flowers large and of fine form. 25c, per dozen; \$1.50 per 100; \$12.00 per 100.

This section includes all varieties having long, trumpetshaped flowers. They are the earliest to bloom.

HORSEFIELD. the "Queen of the Daffodils."-Very large flowers of pure white, with rich yellow trumpet. Flowers are the largest of this class; very early and free blooming; a grand cut flower. 5c. each; 30c, per dozen; \$2.00 per 100.

GIANT PRINCEPS.-Very early. This is one of the most popular winter-flowering and forcing varieties grown. Flowers large, perianth sulphur, with an immense rich yellow trumpet. 5c. each; 20c. per dozen; 85c. per 100; \$8.00 per 1000.

TRUMPET MAJOR.—Flower large and almost of a uniform deep golden. Highly prized as an early forcing sort and largely planted for outside bedding. 20c. per dozen; \$1.00 per 100; \$9.00 per 1000.

STELLA.—One of the first in flower and wonderfully free blooming. White, star-shaped flowers three inches across, with bright yellow cups. 15c, per dozen; 75c, per 100.

EMPRESS.—A magnificent large variety; bold and erect. A rare beauty. Some give this the palm of being the best of the two-colored trumpets. Perianth white and of great substance; trumpet rich yellow. 5c. each; 40c. per dozen; \$2.75 per 100.

POETICUS.—The "Pheasant's Eye." or "Poet's Narcissus." Pure white flowers, with orange cup, edged with crimson; splendid cut flower, 10c, per dozen; 45c, per 100; \$4.00 per 1000.

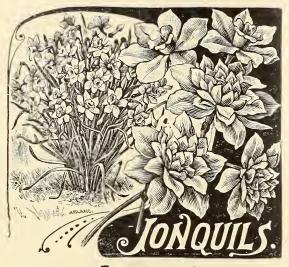

ORNATUS.—The improved Poeticus. A grand flower for cutting purposes. Larger and more symmetrical than the old variety, and considerably earlier. **15**c, per dozen; **85**c, per 100.

EMPEROR.—One of the finest Daffodils in cultivation; entire flower of the richest yellow, trumpet of immense size, and the perals of the perianth are so broad that they overlap and measure 3½ inches across. Grand for cutting. Sc. each: 50c. per dozen; **\$3.00** per 100.

LEEDS11.-Pure white, star-shaped flowers; fine for cutting. 15c, per dozen; 75c, per 100,

Empress.

Jonguils.

V ERY popular flowers on account of their easy cultiva-tion and delightfully fragrant golden yellow blooms. They can be readily forced in the house, or planted in the open ground for early flowering. If planted in the same situation with Anemones, both will bloom at the same time, and form a charming contrast. The single are the most desirable.

SINGLE .- Rich yellow; pcrianth deeply lobed. 10c. per dozen; 60c. per 100.

CAMPERNELLES.—The best of the Jonquil Section; pe-rianth six-lobed, spreading, and of light yellow color. Six for 10c.; 15c. per dozen; 75c. per 100.

REGULOSUS (The Giant Jonquil).—Broadly imbricated pe-rianth with large wrinkled cup. Full yellow. 15c. per dozen; 90c. per 100.

By mail, add 10c. per dozen.

Oxalis. VARIOUS KINDS.

Charming little half-trailing or bushy plants, particularly adapted for pot culture and hanging baskets. The foliage alone is very attractive, and when in flower they are exceed-ingly pretty. The pots should be well filled, from six to a dozen bulbs in a five or six-inch pot: they may be potted at any time during the winter and placed near the glass or wire here there there there are drawn in the second start of the secon window to keep them stocky and dwarf.

BOWEII .- Vivid rosy crimson, large. 20c. per dozen; \$1.25 per 100.

MIXED OXALIS.-Two for 5c.; 15c. per dozen; 75c. per 100.

The Bermuda "Buttercup" Oxalis.

An Unrivaled Winter=Flowering Pot Plant of the Easiest Culture, Succeeding With Everybody.

THIS is one of the finest winter-flowering plants for pot

This is one of the finest winter-flowering plants for pot culture; it is such a strong, luxuriant grower that one bulb will be sufficient for a six or eight-inch pot. Place in a dark, cool place for several days to root thoroughly, and remove to a sunny situation in the window or conserva-tory in a temperature of about 60 degrees Fahrenheit, and the profusion of bloom produced in uninterrupted abundance for weeks will astonish and delight you. Extra large bulbs. 25c. per dozen; \$1.25 per 100.

Cyclamen.

We offer a magnificent strain of this most charming win-ter and spring blooming bulb, producing flowers of extraor-dinary size and substance, and of great beauty. Ready in October. Each, Per Doz

Freesias.

THESE are among the most beautiful of all Cape Bulbs, possessing a peculiar grace of form, and their fragrance is most delightful, one pot of five or six bulbs being sufficient to perfume a whole house. As cut flowers they are extremely valuable; the unexpanded blooms opening in water fill the air with the most delicate perfume, and their endurance is really remarkable. They force very easily, and can be had in flower at Christmas, and continue in succession until June.

FIRST SIZE.-10c, per dozen; 75c, per 100; by mail, 90c.; \$4.50 per 1000.

EXTRA SIZE.-15c. per dozen; \$1.00 per 100; by mail, \$1.15 per 100.

Double Peonies.

T HESE noble plants are exceedingly effective. The profusion and duration of bloom, combined with handsome, massive foliage, accommodating habit, and easy culture, render them one of the most popular hardy plants grown for lawn and garden decoration, or for mingling with shrubs or herbaceous plants in borders and wild garden. Ready in October.

MARY LOUISA .- Universally used.

Good plants of either of the above varieties at \$1.00 per dozen, or \$6.00 per 100.

Chinese Sacred Lily OR Joss Flower.

THIS is a variety of Polyanthus Narcissus, grown by the Chinese from time immemorial to decorate their sacred temples or joss houses on their New Year's Day, which occurs in February. By methods of culture original to them, they succeed in growing large, solid bulbs, which produce a profusion of bloom in an incredibly short time; usually not more than four to six weeks from the time of planting. The growth of foliage is exceedingly plentiful and luxuriant and of a dark green color, which, surmounted by a wealth of large, satiny white flowers with golden yellow cups, lends to the whole an aspect

of tropical magnificence of which the eye never wearies. This splendid flower increases in popularity every year, and immense quantities of bulbs are annually imported into this country.

CULTURE.

Being partially aquatic, this plant must have plenty of water. If grown in soil, make it light and sandy, but they are usually grown in vases or dishes of water. Put an inch or two of sand and gravel in the dish in which they are to be grown, set the bulbs on this, and put enough gravel around them to keep from falling over; fill the dish with water and set in a dark closet for a few days until the roots start freely ; then bring to the light and keep in any ordinary living room. A dozen bulos started this way at intervals will give a succession of bloom throughout the winter.

Chinese Sacred Lily.

The Bulbs offered by us are the true Chinese, large, solid, and well matured, which are superior to those grown elsewhere.

LILIES

CULTURE IN POTS.

HEN grown in pots. thebest soil is sandy peat, but they will flower finely in a light, rich mixture. It is advisable to begin with the smallest size pot in which the bulbs can be placed, and to shift into larger and larger pots as the plant progresses, and un-til the flower buds ap-pear, when, of course, no further shifting should be done. A cool temperature suits the best, and the plants should be liberally watered during the period of growth and flowering.

CALLA LILIES.

(Richardia Aethiopica.)

THE White Calla, or Lily of the Nile, is a well-known plant of easy culture, and in win-

easy culture, and in whi-ter is one of our best win-dow plants. To aid pro-fuse blooming, keep them White Calla. dormant from the middle of June to the last of August, repot in good rich soil, using a four to six-inch pot; give water, light and heat in abundance, and the result will be most satisfactory.

LILY OF THE VALLEY.

One of the most charming of spring flowering plants, bearing slender stems set with tiny bells which diffuse a delicious odor. They are largely used for forcing in winter, and can be flowered in the house. To secure good results the pips should be kept in a cool place until wanted for flow-

ering. The pips we offer are the best Berlin, and far supe-rior to the cheaper sorts in the market.

They are ready for delivery about last of November,

LILIUM HARRISH. (True Bermuda Easter Lily.)

BERMUDA EASTER LILY.

(Lilium Harrisii.)

THE "True Bermuda Easter Lily" is one of the grandest bulls introduced in many years. They are easy of cul-ture, early. flower quickly, and can be had in bloom for Christmas from bulbs planted as late as September. They are, however, mostly grown for Easter Flowers, and, of course, will produce more flowers when given a longer time. They have become very popular, and deservedly so, as they come quickly into bloom, and produce pure white, gracefully formed and delightfully fragrant flowers. The quantity of bloom produced is marvelous; the average production of bulbs 5 to 7 inches in circumference, even when forced, is from 5 to 8 flowers, and of bulbs 7 to 9 inches, 8 to 12 flowers.

BLOOMING PLANTS IN POTS form typical Easter offerings and presents for decoration of the window, table, house, or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every winter for this purpose.

LILIUM AURATUM.

Of all the Lily tribe, this is undoubtedly one of the finest, whether we regard its size, its sweetness, or its exquisite ar-rangement of color. Its large and graceful flowers are com-posed of six petals, of a delicate ivory-white color, thickly studded with chocolate crimson spots, and striped through the centre a golden yellow. From six to twenty flowers are produced on a stem, and as the bulbs acquire age and strength the flowers increase in size and number. It is per-fectly hardy, and thrives best in a moderately dry, rich loam, where the water does not lie in winter. Good drainage is necessary to the successful growing of this Lily. Plant six inches deep, and cover lightly during winter.

LILIUM AURATUM .- First size, 9 to 11 inches in circumference, 15c. each; \$1.25 per dozen; mailed free.

LILIUM AURATUM .- Second size, 7 to 9 inches in circumference. 10c. each; \$1.00 per dozen; mailed free.

LILIUM SPECIOSUM.

(Lancifolium.)

The varieties of "Lilium Specio-sum" comprise the most important group of any one species. They are of easy growth, and can always be or easy growth, and can always be relied upon to give satisfaction to the buyer. The flowers are very beautiful, showy and distinct, and exquisitely fragrant. Magnificent as border plants; they are excellent for pot culture.

SPECIOSUM ALBUM. — Large white flowers, of great substance, with a greenish band running through the centre of each petal; very fine. 15c. each; \$1.25 per dozen; by mail, \$1.40.

SPECIOSUM RUBRUM. - White, heavily spotted with rich crimson spots. 15c, each; \$1.25 per dozen; by mail, \$1.40.

LILIUM CANDIDUM.

The Bridal Lily of Bermuda.

The old-fashioned pure white Garden Lily. As it starts into growth very early in the fall, it should be ordered early and for this reason it is best planted in August and September. It is also con-siderably used in some localities for forc-ing. It grows about four feet high, bear-ing large clusters of snowy white, me-dium clead flowers dium-sized flowers.

GERMAN IRIS.

(Iris Germanica.)

This variety is the true "Fleur-de-Lis," the national flower of France. They are perfectly hardy, thrive anywhere, grow and bloom luxuriantly, particularly if plenti-fully supplied with water or if planted in moist situations, as on the banks of ponds, etc. Plants well es-tablished produce from 50 to 100 spikes of bloom, deliciously fragrant and fine for cutting. In beauty the flowers rival the finest Orchids, colorsranging through richest yellows, intense purples, delicate blues, soft mauves, beautiful claret reds, white, primroses and bronzes of every shade imaginable.

Mixed Varieties:

Per dozen....20c. | Per 100....\$2.00 Ready in November.

SPANISH IR1S.

Excellent for pot culture, and are now being grown for cut flowers. Plant in the open ground in autumn and protect slightly during the winter months. Early in April cover the beds with glass, and the flowers will be ready for cutting in May.

T HE ground should be thoroughly drained and well enriched before sowing. Work the soil until well pulverized, and have the surface as level as possible, so that the grass may present an even appear-ance. After sowing, cover seed lightly and follow with roller. The best results are obtained by using plenty of seed, four bushels to the acre being about the right quantity. One quart is sufficient for 300 square feet. Let the grass obtain a good start before cutting, and then it should be trimmed with a lawn mower about every ten days. Old it should be trimmed with a lawn mower about every ten days. Old lawns may be improved and renewed by the application of fertilizers and seeding about half the quantity of seed required for new lawns. This should be done whenever they show any thin places,

Our LAWN GRASS should not be confounded with the cheap, chaffy grasses offered at less prices.

This mixture does not contain so much of the high-priced grasses as our Evergreen Lawn Grass, but it is superior to many of the cheap grades offered, and will make a very nice lawn.

ciritorium Repeus.

The best variety for lawns, as it forms a close herbage and remains green throughout the season. It is also valuable when mixed with grass seeds for pasture. Sow in spring at the rate of six pounds per acre when sown alone, half the quantity when sown with other grasses.

Pound, 30c. 10 pounds, \$2.75.

MUSHROOM SPAWN

M USHROOMS can be readily grown in cellars, stables, sheds or pits. Many are successfully grown on a shelf in an ordinary cellar, and yield sufficient crop to compensate the grower for his effort.

The space under greenhouse benches or stagings will suit them exactly, using materials in same manner as described.

CULTIVATION.

The cultivation of the mushroom is a very simple matter, and requires only ordinary intelligence and care. The materials needed are fresh horse manure, good soil, and live spawn. The manure should not be too short, as it does not combine the necessary qualities. Long, strawy litter, plentifully mixed with short manure, makes by far the best beds, as it does not heat too violently, decomposes slowly, and retains its heat for a long period. Put in a heap and turn every three or four days to permit the escape of noxious gases and prevent burning. When ready for use it should be as hot as can be borne comfortably by the hand, and should also be

but as hot as can be borne comfortably by the hand, and should also be moist. Make the beds 3 feet wide at the base. 2½ feet high, and of any desired length. The manure, when in proper condition, should be quickly handled to prevent the loss of heat, and to be beaten down to make the heap firm and compact, and cover with long litter; when the heat has decreased to 90 degrees, the bed is ready to receive the spawn, which is

done by raising the manure with the hand and inserting pieces of spawn 2 inches square. 9 inches apart each way. At the expiration of a few days the bed may be covered with soil to the depth of about 2 inches. If the soil is poor, add a liberal quantity of bone meat.

PRICE.-12c. per pound; by mail, 30c. per pound; 10 pounds for \$1.00; \$8 per 100.

JOHNSON'S EARLY.

One of the finest early berries grown. Do not let it get too thick. Properly cared for it is the most prolific berry known.

MICHEL'S EARLY.

This is a very early berry. It ripens in this latitude about the 18th of May. It is the first table berry on the market, and as such for general excellence and delicious flavor it cannot be surpassed. It is the sort of berry that we can recommend, and especially so to growers who make a specialty of being first in the market.

Piece of about 40 yards	100
	roc.

MASTICA GLAZING MACHINE.

MASTICA FOR GLAZING.

GREENHOUSES, sashes, etc., new and old. It is elastic, adhesive and easily applied; it is not affected by dampness, heat or cold. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or machine on the outside of sash, as it makes it perfectly tight, and saves the expense of relaying the glass.
