YOU will notice a new address to the business. To obtain a better rate of increase and to produce even better quality bulbs we have moved our stocks to the country's best bulb land. They will be grown under ideal conditions and under the care of longtime experts. I am happy to hand over day to day work to Johnny Walkers who has had a major role in the success story of the world's largest bulb marketing organisation handling 10,000 tonnes of bulbs each season. He has been responsible for the quality of those bulbs and on advising growers how to achieve that quality. Johnny will become a familiar figure with Jefferson-Brown exhibits. His expertise gained over many years firstly from his father who was a bulb-grower and then over the last 18 years as agronomist at Lingarden Ltd, will be invaluable. Johnny has already suggested several new varieties for us to include in our lists that he has seen on his travels in Europe. We are confident of an even more successful future for the business.

I will be retaining my breeding stock in Herefordshire and look forward to having more time to devote to the development of new and better varieties.

We look forward to hearing from you. Happy gardening.

NEW 1986

AVALANCHE 2-3 **8WY**
By no means a 'new' variety as those who read the tail piece to the Daffodil Society summer news letter will know. A strong stem with a plethard of white and yellow flowers on the top. Sixteen flowers per stem is by no means uncommon. The most outstanding tazetta yet superb on the show bench or in pots. **each £3, 10 for £25, 50 for £110.**

GREENSTAR 2
A most distinctive flower first discovered in Scotland and hailed as the only green daffodil known. Grows fairly short. Order early. Every grower will want this one in his collection. **each £10.**

ST. KEVERNE 1-2 **2YY**
I never feel that words can do this variety justice. First registered in 1949 it has been widely used by Barbara Fry in her breeding work at Rosewarne because of its resistance to basal rot. A deep golden yellow the petals form a perfect background to its sharp trumpet like cup. Because of its resistance to basal rot it is a long lasting garden plant. **each 60p, 10 for £5, 50 for £23, 100 for £40.**

FILLY 3-4 **2WW**
One of the new pinks bred in Holland by Van de Werld. The white well formed petals frame the soft pink cup which has a beautiful cerise edge to it. Very prolific and certainly one for the future.

REVIVAL 4 **4WR**
Gaytime x Rockall
This noteworthy newcomer was given its name by one of our customers. The tall boldly posed flowers are vividly snow white and orange red. Silken texture in one of the best formed doubles with broad triangular petals. An ideal show and garden flower. Strong bulbs. **each £10.**

NEW 1985

IMPERIAL **4Y**

4-5 Gay Time x Camelot.

There have been huge improvements in double daffodils over the past few years but curiously the all yellow doubles have been more or less left aside. Now we have Imperial to take a lead in this field. It is a strong tall flower of reasonable size and very neat form. It is not over double but looks exceedingly well groomed with outer petals of rich yellow and inner layers of deeper gold and rich yellow. A splendid flower and bulb. **each £15.**

PUPPY **7Y**
1-2 A real cyclamineus character. Glowing golden blooms with long narrow trumpets neatly serrated and opened at the brim. The petals are long and pointed; they are held at right angles or just slightly reflexed. Each petal is very evenly and attractively twisted. A very pleasing happy Puppy. 10". **each £10.**

Tripartite

TRIPARTITE **11Y**
5-6 April Tears x Bacarrat.
We regard this as one of the most important daffodils we have introduced. We believe that in the next two decades Tripartite will become one of the standard kinds offered to gardeners. We expect acres to be grown.

Tripartite is late flowering. It is a strong plant with an outstanding rate of increase and prolific blooming capability. Most of the 10-12" stems carry two flowers, but it can have three, secondary stems will usually carry one. The colour is a uniform shining lemon gold. Petals are of good form and texture, the crown is split following Bacarrat's lead, being heavily lobed and laid back on the petals, anthers and stigma protruding. The effect is graceful and utterly pleasing even to those to whom split corona daffodils are anathemia. It is most unusual, a unique and magical flower.

The demand is likely to far outstrip our limited supply. The magnificent rate of increase is the only reason for the relatively modest price. **each £28. 3 for £80. 10 for £255.**
Please order early.

EVENDINE **2W**
4 Pontresina selfed.
We have watched this seedling for the past few years hardly daring to hope it would remain as consistently good as in fact it has. A most lovely smooth flower with flawless perianth of firm white petals and a crown spun almost flat on to the petals. Just a touch of colour in the young flowers especially around the brim, a soft yellow but soon all is virtually white. Strong stems. A most lovely leading show flower and a fine garden plant named after the hamlet (to which we have moved after 24 years at Lakeside) **each £15.**

PASSIONALE 3-4
We knew when we introduced this marvellous plant that we had a winner in our hands, but I do not think we realised just how it was going to dominate pink daffodil trading and showing. It won all possible awards in very short time including First Class Certificates for both show and garden use. Bulbs have gone to all parts of the globe where daffodils are grown. It has proved one of the most successful of bulbs and is now sold by the ton.

An abundance of immaculate finely textured blooms snowy white and shining rosy pink. Any bloom would grace a show bench. Extraordinary grower and increaser.
