

GREETINGS from OAKWOOD DAFFODILS!**March 2019**

Welcome to Oakwood Daffodil's 36th annual listing of Midwestern-raised, bred, and acclimatized daffodils. I have grown daffodils on a singular basis since 1971 and bred them on a regular basis since 1976. I can proudly state that I have the largest collection of Narcissus hybrids in diversity, quality, and quantity, in the United States. I have tried to offer the American gardener and daffodil lovers worldwide the greatest chance of enjoying their favorite flower. Midwestern-grown daffodils will do better in most of the USA and better than those from other climates and countries. While emphasis is on Midwestern varieties, I am also listing bulbs from Australia, New Zealand, and the United Kingdom.

My daffodil list is sent out by email and snail mail, to those who require that service. You can find my catalog on the American Daffodil Society's (ADS) web page under the specialty bulb grower section. Contacting us directly is always acceptable, too. Bulbs are dug to order in late May and June, and then shipped in late September and October, thus it is important to order early. I always include bonus bulbs with each order.

This year's Catalog is just a small fraction of the 10 acres of bulbs we grow here. Last year's season was cut short due to bad weather, making selections and crosses very difficult. I hope to do better this year. Once again the St. Joseph Valley Daffodil Society will be having a daffodil show at the Fernwood Botanical Garden and Nature Preserve 13988 Range Line Rd, Niles, Michigan 49120 on April 24-25. Contact Dan Bellinger for more information. 330-608-4882 (text please only) or email at rdanielbellinger@gmail.com. Please come out and join us.

Due to high demand Larry Wier has pulled his bulbs from the listing this year to increase stocks. We do have his Makers Mark here and will offer it in our general selection. Next year we will have a larger number of Mitch Havens bulbs for people if they wish to obtain them.

Join us and savor our beauties. Help the daffodil world and the ADS grow stronger and show more of these attractive flowers. Please take note of the final dates for ordering bulbs as we try to stop digging by the end of June. Sorry, but no credit cards are accepted at this time. Orders are taken in sequence by the date received. We have also added hyperlinks to the names and by double clicking on the name it will send you to Daffseek, where you can see pictures of the flowers as they are available.

Our best wishes,

John Reed, D.O.
Julie Martin

OAKWOOD DAFFODILS
 2330 W Bertrand Road, Niles Michigan U.S.A. 49120

 EMAIL: oakwooddaff@hughes.net or juliesnyder4@yahoo.com

INSTRUCTIONS FOR ORDERING

1. All orders must be received by **July 1st, 2019** to be assured availability. **AFTER THAT DATE**, up until shipping has started, orders will be accepted and filled according to availability. You will receive an acknowledgment of your order as they are processed, either by e-mail or phone (if we have your e-mail address or phone number).
2. Please make checks payable to **OAKWOOD DAFFODILS**. We are sorry, but due to rising costs of credit card processing, we are unable to accept credit cards.
3. Bulbs will be shipped via USPS unless otherwise specified, so please include your **COMPLETE** shipping address. We are basing our shipping charges on the cost of the USPS medium flat-rate box. This has been our most common box size over the last few years. As usual, we always give gratis bulbs with your orders. For those smaller orders, we will give additional free bulbs to compensate for the additional shipping charge. If you have any concerns or problems with this, please let us know. This is being done to simplify the shipping expenses to you. Overseas shipping will be billed at cost, plus the phytosanitary certificate and inspection fees.
4. Bulb shipments will hopefully be finished by the third week of September; sooner, if possible. Please specify if you require a particular shipping date and we will do our best to accommodate.
5. Visitors are welcome, but please make arrangements in advance to avoid disappointment due to variation in blooming or unfavorable weather.

TELEPHONE: (269) 684-3327 FAX: 269-684-0738 EMAIL: oakwooddaff@hughes.net

6. You will receive information about planting and care for your bulbs with your order. Please note that they should be in a location that receives natural rainfall that drains off quickly. Daffodils do not like wet feet!
7. The format used in this catalog lists the daffodil's registered name, followed by its classification and color code, then its hybridizer and country of origin. After the description, the pedigree (seed parent x pollen parent) is listed, then its flowering time, and then the price for each bulb.

NEW INTRODUCTIONS for OAKWOOD DAFFODILS 2019

BIG RED HONKER 2W-R (Dr. John Reed, USA)

The name says it all. With its big trumpet shaped corona, it made me think of a honking goose. Almost a full trumpet. There's nothing like it, hence its name. Was Reed seedling 99-144-1

(Larry's Gift x 87-10-1(Magician x Obsession) Mid-Season \$60.00

GREAT LAKES 2 W-Y (Dr. John Reed USA)

Giant of a flower. A very commanding flower for the garden. Suitable for the show bench. Named for the naval training center my father and grandfather were stationed. Limited stock.

(Pike Lake x Irish Affair) Midseason \$40.00

HALLMARK 1 Y-Y (Dr. John Reed, USA)

Chosen by Mike Berrigan as the best yellow trumpet seedling selected that nice spring day. All the usual attributes. Named for the street Mike lives on.

(Celtic Gold x Dream Prince) Mid Season \$15.00

St. GEORGE'S CATHEDRAL 2 W-P (Dr. John Reed, USA)

Broad petals excellent stem and neck make it an outstanding show flower. Named to honor last year's royal couples wedding.

(Lydick x Dear Me) Mid Season \$25.00

WHITE LANTERN 1 W-W (Dr. John Reed, USA)

Early tall stems flowers held well above foliage. Wide overlapping very smooth perianth in the same plane. Outstanding show flower impressive.

Was Reed 2002-27-1

(Kathy Anderson x (Leesburg x Virginia Walker) Early Midseason \$50.00

GENERAL DAFFODIL LISTING FOR 2018

AL LAUREYS 3Y-R (Dr. John Reed, USA)

This is the smoothest small cupped 3Y-R I have flowered. Of smaller size, the smooth flat perianth segments are positioned in the same plane with excellent poise. Named for Al a friend that helped me so much with the daffodils for 10 years. Al was always there when I needed him. Though of slight build his heart was huge and the best! Was Reed seedling 92-106-1.

(Sabine Silk x Burning Bush?) Late Midseason \$10.00

AMADEUS 2 W-R (Grant Mitsch, USA) (Richard & Elise Havens USA)

Tall and vigorous. This is one of the last red pinks from Grant. In this climate a more orange-red than a true red. Healthy good for show and garden. Scarce.

Precedent x Magician Late Midseason \$14.00

AMERICAN CLASSIC 2 Y-WYY (Richard & Elise Havens USA)

In my opinion this is the finest daffodil released by the Havens. It's the highest level for show and breeding. Very healthy.

(Sun Gem x Lemon Lyric) Late Midseason \$14.00

AMERICAN COWBOY 2Y-R (Dr. John Reed, USA)

Peter Ramsay and I made this cross at about the same time. This is probably the best early well-formed and colored show flower that I selected from the cross. Held high with excellent poise and strong stems. The colors are quite intense. An improvement over both its parents. Stock is still small. Was Reed seedling 98-1-1.

(Cowboy x Loch Lundie) Early Season \$20.00

AMERICAN DREAM 1 Y-P (Richard & Elise Havens USA)

Large smooth commanding show flower. Always winning awards. Stock is small.

(Memento x Lorikeet) Midseason \$20.0

BUTTER SILK 2Y-Y (Dr. John Reed, USA)

I was taken by this flower's bright yellow color and extreme petal smoothness when I first saw it, hence the name. It has excellent petal overlap and a strong medium length stem. Admired by Larry Weir at his place. It is giving excellent seedlings including my best-ever pale 1Y-Y for show. Was Reed seedling 92-22-1.

(Camelot x Dream Prince) **Early Midseason** **\$7.00**

BURR OAK 2W-R (Dr. John Reed, USA)

A number of seedlings were planted adjacent to one of the great trees at Oakwood by my helpers when I had major health issues and was not able to do it myself. When they planted the bulbs they failed to make planting diagrams and used ink labels that faded quickly. This probably was a 1997 seedling, possibly related to Crimson Beauty. Evaluated over the years this selection showed more staying power in bad weather, and overall superior qualities to its stem and flower. Originally called RED Oak by me but the name was taken. It has smooth overlapping white petals all in the same plane held on tall strong stems above the foliage with glorious red cups. These qualities have been hard to get in 2 W-R daffodils. Stock is still small and it will be in demand for a long time. Was Reed seedling Red Oak.

Parentage 1997 cross ? **Midseason** **\$40.00**

CAPTAIN AMERICA 2W-R (Dr. John Reed, USA)

Appropriately named for a super hero. Tall stems and wide petals are a foil for an amazing large deep red cup. It can be shown. Striking in the garden. Pollen is fertile and occasionally sets seed, too. Wind protection gives smoother, taller blooms. The red color fades with time, especially in the sun. Was Reed seedling 95-5-1.

(Cordial x Magician) **Midseason** **\$15.00**

CARROT JUICE 1O-O (Dr. John Reed, USA)

I could not take my eyes off this when it first flowered. While smaller than average, its petals were a uniform shade of light orange. I could see no yellow in the petals with my eyes. This is not a suffusion or a sheen. While this is not a top show flower, it is showable at its best. It is a real color break and its color is being passed on to its seedlings which are of a higher quality, too! Was Reed seedling 96-18-1.

[78-17-3N (Trumpet Call x Orange Way) x 82-108-4 (Zuni x Glenfarclas)]
Early Midseason **\$9.00**

CASSOPOLIS 2Y-R (Dr. John Reed, USA)

Possible my best 2Y-R, this is a well-engineered daffodil with an exemplary smooth very flat wide perianth supported by a strong stem and neck. A row of blooms is almost military-like in their bearing. Alas, the deep colored cylinder-like cup burns easily and needs protection for show. It can flush the petals with red at times. Named for a local Michigan town where I have purchased my Ford trucks. Was Reed seedling 82-200-3.

[(Air Marshall x Caracas) x Creag Dubh] **Early Midseason** **\$5.00**

CEDAR HILLS 3W-GYY (Mitsch & Havens, USA)

This sets the standard for beauty and quality in the late division threes. A show and garden flower of the highest caliber. Tall stems support the very large flowers with excellent poise, and color contrast.

(Impala x Green Hills) **Very Late Season** **\$5.00**

CELTIC PRINCE 1Y-Y (Dr. John Reed, USA)

This smaller 1Y-Y, possibly an intermediate, has consistently given superb well-formed yellow flowers while being down for eight years. It has freely open pollinated every year, perhaps because the bees like it so well, too? This is from the reciprocal cross of 'Millennium Perfection'. Was Reed seedling 87-40-2.

(Dream Prince x Celtic Gold) **Early Midseason** **\$5.00**

CHICAGO GOLD COAST 1Y-Y (Dr. John Reed, USA)

Named for the ritzy area of Lakeshore Drive in Chicago with high-end apartments and homes. This flower is similar to 'Chicago Gold' but slightly deeper in color and the petals are not as wide. Stock has increased enough to finally offer it. An excellent show flower of medium size. Was Reed seedling 93-1-7.

(Celtic Gold x Dream Prince) **Early Midseason** **\$7.00**

CHICAGO HOPE 1Y-GYY (Dr. John Reed, USA)

The name says it all. Besides using the famous TV show's title, I had hoped that it would win the Rose Ribbon when shown some years ago in Chicago. But that honor went to a sibling of 'Haunting'. It is a well-balanced, medium sized, smooth yellow trumpet capable of giving superb blooms. The smooth overlapping wide petals were inherited from 'Dream Prince' and the vigor imparted from 'Golden Jewel'. Proving to be a very good breeder, too. Was Reed seedling 85-7-2.

(Golden Jewel x Dream Prince) **Early Midseason** **\$6.00**

CLERIC 2 W-YYW (Dr. John Reed, USA)

A very refined "White Collar" daffodil of trumpet character, measuring division 2 by only 2mm. Smooth, wide, overlapping petals are the backing for a light yellow trumpet-shaped corona that has a wide band of white at its edge. Upfacing with strong stems. Every bloom fit for show. Named for its white collar, like a priest's. Was Reed seedling 98-26-20/4A.

(Irish Affair x Three Oaks) **Midseason** **\$17.00**

COLOR MAGIC 2YYW-P (Richard & Elise Havens USA)

Limited stock.

(Lorikeet x Magician) **Mid-late Season** **\$20.00**

COMPUTE 1 W-Y (D. Jackson, Jr. TAS, AUS)

One of the largest bicolor trumpets ever seen here. Strong tall stems support a flower with a long deep yellow trumpet. Poise and neck excellent. The perianth is smooth. For show and garden. Fertile both ways.

(Helsal x Lenz) **Early Midseason** **\$8.00**

COWBOY 2Y-O (David Jackson, Tas AUS)

A Large well colored bloom for show and garden. Excellent breeder, and vigorous!

(Craze x Coope) **Midseason** **\$ 5.00**

COPPER MINE 2O-O (Dr. John Reed, USA)

When initially seen I was hard-pressed to code the petal color. Not a yellow but not a true red, either. The flower has become bigger, stronger and brighter as the stock as grown. Still scarce but very desirable for showing and breeding. Tall stems and large flowers guide your eyes to it! Was Reed seedling 97-104-1.

(Cowboy x Burning Bush) **Midseason** **\$25.00**

CREATION 1W-W (Grant E. Mitsch, USA)

This is the most vigorous, non-rotting, early show-quality white trumpet here. The trumpet is flanged and the flower is fertile.

(Trousseau x Paradise) x (Seedling A39/1 x Panach) **Early Season** **\$5.00**

CRIMSON BEAUTY 2W-R (Dr. John Reed, USA)

Bulbs of this were given to Larry Force to try in his Mississippi climate. Shown the following spring at the ADS National Show by Larry, it took first place in the single bloom class for its colors and size. It caught the eye of many exhibitors, including David Burdick. David stated the color of the large cup "Shouted across the room!" getting his attention. The blooms have overlapping wide, very white and smooth petals, all in the same plane with a strong neck and upward poise. A healthy grower. Name was chosen by Larry Force. Was Reed seedling 97-86-1.

[(Decoy X Culmination) X Magician] **Late Midseason** **\$16.00**

CRIMSON PRINCESS 2W-R (Dr. John Reed, USA)

A very large flower on medium, strong stems with good poise and petal overlap. Good for show and garden. Was Reed seedling 97-101-2.

(Magician x Candy Man) **Midseason** **\$22.00**

DARKER SHADE 3Y-Y (Dr. John Reed, USA)

This is a good growing, tall flower with a strong stem, and an outward facing poise. Originally I wanted to name it 'Honeydew', but the name was taken. It reminds me of the color of that melon, not quite yellow or green. The color develops from off-white initially. The form is similar to its pod parent 'Irish Mint'. An intriguing and lovely bloom of medium size. Was Reed seedling 98-125-10.

(Irish Mint x Green Hope) **Early Late Season** **\$35.00**

DENIS DAILY 2O-R (Dr. John Reed, USA)

Named for our Oakwood guest, friend, and a major figure in the Minnesota Daffodil Society until his untimely passing in 2012. Bred to put a color-fastness gene into 'Sabine Hay'. A large, round flower that needs protection for its best color, which is strong and distinct. Potential breeder. Was Reed seedling 87-9-1.

(Spelter x Sabine Hay) **Midseason** **\$7.00**

DINGUS DAY 2W-P(R) (Dr. John Reed, USA)

After the original cross made in 1988 flowered, it was repeated with even better results in 1994. This flower has better form and is more consistent in its intense cup color, ranging from deep pink to red-pink. A most imposing flower supported with tall stems here. It has been in bloom on Dingus Day (the Monday after Easter Sunday), a Polish holiday celebrated in South Bend, Indiana annually by politicians with beer, Polish sausage, and speeches. Was Reed seedling 94-14-1.

(Dear Me x Culmination) **Early Midseason** **\$10.00**

EDIE 2W-P (Dr. John Reed, USA)

Named for our wonderful daffodil helper, Edie Godfrey. She has been there to help, especially with sending out orders. Edie actually was at my bedside to help when I had a pulmonary embolism. This is my first very pure pink cup named from 'Lavender Hope'. The stems are long, supporting pure pink cups against white overlapping petals. It is showable and fertile. This is the flower you want if you desire REAL, in this climate, PINK COLOR. See Daffseek photo. Was Reed seedling 97-76-1.

(Lawless x Lavender Hope)**Midseason****\$15.00****ENERGIZER 2O-R (Dr. John Reed, USA)**

Early in my breeding I was determined to improve the all-orange-red daffodils by breeding and selecting for more color intensity and colorfastness as they flower here. My early seedlings and those of Brian Duncan's from 'Altruist' would only show a deep perianth color in the best of seasons and none ever showed the intensity that 'Gypsy' or 'Fiery Flame' did in Oregon. Only two selections were kept from this intensely "hot" cross and this one has demonstrated the best combination of form and color resistance here. Hopefully its name says it all. Like the little pink bunny with its beating drums it will energize your spring garden, show table and breeding program. Increase has been slow. Was Reed seedling 87-6-2.

(Sabine Hay x Stylish)**Early Midseason****\$9.00****FENCOURT JEWEL 8 W-P (Wilfred Hall, New Zealand)**

As it was bred and first flowered in New Zealand, it was named after a farming community in Waikato, New Zealand. Has yellowish white spreading plane to concave perianth segments, with margins sometimes slightly incurved, heavy substance and overlapping half. First real pink poetaz. Generally has 2 flowers per stem.

(Grand Monarque x Little Jewel)**Mid-Season****\$15.00****FLORIDA ORANGE 2W-O (Dr. John Reed, USA)**

The first of the "near-trumpet" 1 W-O crosses to be released. This is a vigorous growing, well-contrasted 2W-O with strong stems. The flowers are bright with a trumpet-shaped corona of deep orange against the very white petals. Petals are overlapping, wide, and all in one plane. The poise is excellent. Stock is still small. Was Reed seedling 98-48-1.

(Ivory Orange x Carrot Top)**Early Midseason****\$22.00****GREAT SCOTT 2 W-O (Dr. John Reed, USA)**

Tall stems hold a large flower with a wide bowl-shaped cup that is a strong shade of orange. This is strictly a flower for the garden or breeding. A slow grower. Was Reed seedling 80-41-1.

(Kilworth x Johann Strauss)**Midseason****\$10.00****GREEN ENVY 3W-GWW (Dr. John Reed, USA)**

Combining the better qualities of its parents, we have a tall, well-formed late white that consistently has a deep, green eye to the small spreading slightly frilled cup. A strong plant that multiplies very well and is later than the much smaller 'Jade'. The really deep, mossy green center when seen can make one green with "envy". Was Reed seedling 91-73-2.

(Limey Circle x Dunley Hall)**Very Late Season****\$6.00****GREEN HORNET 6Y-Y (Dr. John Reed, USA) 2018 Release**

Typical cyclamineus form but it is spectacular in its color of the foliage. Yellowish-green similar to 'Cantatrice'. It really stands out; a must-see for the garden display. Unique! Was Reed seedling 84-182-1.

(The Alliance o.p.)**Midseason****\$20.00****HALOGEN 2Y-W (Dr. John Reed, USA)**

This is the best, brightly contrasted, large cup reverse bicolor that I have raised. It takes several days to develop its intense, luminous color. The DaffSeek photos speak loudly for themselves. Fertile both ways. Was Reed seedling 98-180-1.

(Impressive Dream x Altuna Ha)**Midseason****\$30.00****HANKY PANKY 11aY-Y (Dr. John Reed, USA)**

Named for a rock 'n roll song by Tommy James, originally from Niles, Michigan. A great improvement over 'King Size'. Has won its class in the ADS National Show. Good breeder. Was Reed seedling 90-29-1.

(King Size x Dream Prince)**Midseason****\$6.00**

HAROLDS FAVORITE 2W-PPW (Dr. John Reed, USA)

Massive waxen substance is the hallmark of this unique daffodil. The broadly ovate petals overlap and the minors almost touch, forming a very round flower. It is supported by a strong stem with an excellent neck. The petals are very smooth but occasionally catch ala Vahu. The deep strawberry colored cup has a lacinated edge sporting a thin white border that occasionally has a speck of red in it. Was Reed Seedling 79-26-1.

Precedent x Vahu **Midseason** **\$6.00**

HERMANN 1Y-Y (Dr. John Reed, USA)

Consistency and perfection have been the hallmarks of this very nice yellow trumpet. Smooth, well balanced blooms supported by strong stems and well poised, with wide overlapping petals form the perianth. Color is a pleasing yellow, to both the petals and corona. Named in tribute to Joy and Cindy Haeffner's home town, in Missouri. Was Reed seedling 88-34-12.

(Phil's Gift x Dream Prince) **Early Midseason** **\$10.00**

HILLSTAR 7YYW-YWW (Grant Mitch, USA)

Bright lemon yellow. Very vigorous excellent breeder, both seed and pollen fertile. Good for garden and show.

(Day Dream x N. Jonquilla) **Mid Late season** **\$6.00**

HONEYBOURNE 2W-Y (Clive Postles, England)

Div.2, almost a trumpet with an unusually honey colored corona. Excellent show flower.

(Cristobal x Pennine Way) **Early Midseason** **\$10.00**

ICE CAPEDES 1W-W (Dr. John Reed, USA)

In keeping up with the former Mitsch Daffodils's catalog that offered a garden daffodils section, I felt it was time for me to finally do this, too. Over the years some daffodils do so well except not having ultra-perfect show blooms. Combining the best qualities of their parents but not always well formed or smooth enough for show. Flowers are VERY white, floriferous, and healthy with great bulb increase. Quite a sight in the garden. Was Reed seedling 94-129-1.

(Rhapsody x Chaste) **Early** **\$6.00**

INDIANA UNIVERSITY 2W-R (Dr. John Reed, USA)

Named for my alma mater owing to its brilliant colors of red and white. This is the best-colored and formed selection from this cross. While very capable of being shown, it is not the epitome of white red breeding. But its earliness and brilliant red color make it very unique and desirable. Very fertile both ways. Color develops quickly. Was Reed seedling 83-69-1.

(Magician x Quasar) **Midseason** **\$7.00**

INNER GLOW 2W-P (B S Duncan, N IRE)

A beautiful reddish-pink from Brian Duncan. For show and breeding.

(Clouds Rest x Fragrant Rose) **Late Midseason** **\$10.00**

IRISH AFFAIR 2W-Y (Dr. John Reed, USA)

This is by far the best 2W-Y I have raised and named till American Affair. After opening, the petals and cup expand and take on a more notable appearance. Heavy substance, bright crisp colors, large size with an excellent stem and neck characterize this flower. Fertile, but seed shy. Named for the romance between my stepdaughter, Michele and her boyfriend, John, when she spent a year in Belfast going to the University of Ulster. (Irish Wedding celebrated their marriage in Northern Ireland). Also, a combining of the names of both daffodils. This is a great flower that needs to be seen to be appreciated. Great in the garden and shows, too. Was Reed seedling 84-34-1.

(Irish Mist x Flash Affair) **Midseason** **\$6.00**

JOHN EMMETT 2Y-O (Clive Postles, Eng,UK)

This sibling to 'Cutting Edge' is bigger, more vigorous and a far superior flower. Alas, just short of a trumpet. It has suffered with some rot here but far less than its parent and sibling. Recommend for the highest level of showing and breeding. Excellent breeder. Was Postles seedling 1-27-89.

(Lea 1-14-76 x Hampton Court) **Midseason** **\$20.00**

KIWI DREAM 3 W-WWO (Spud Brogden, N.Z)

Small beautiful Div 3, excellent for show and garden. Very scarce.

Cadiz x Nola **Mid Late Season** **\$20.00**

KOOP 1Y-O (Dr. John Reed, USA)

This small orange trumpet had a flag next to it after the 2008 ADS National Show bus trip visited us after the 2008 Show. The flag said Koop because Dr. Koopowitz liked it and put his abbreviated name to it. The name stayed with it and was registered "Koop" in his honor. The flower is apparently an intermediate and vigorous. Quite smooth with overlapping petals. May be a useful breeder? Stock is small. Was Reed 97-47-1

Trumpet Call x Bailey **Midseason** **\$20.00**

LADY DIANA 2W-W (Broadfield Daffodils,Tas, AUS)

An early and outstanding, top-shelf show flower. Easily capable of being a Best in Show bloom. Don's Best! Excellent breeder.

(Lady Slim x Gwyn) **Early Midseason** **\$5.00**

LAKE SUPERIOR 1 W-Y (Dr. John Reed, USA)

This is the most consistent show quality flower 1 W-Y that I have named so far. Shown twice, it has been a Rose Ribbon winner and a Best in Show. Lake Superior is the largest of the Great Lakes and this daffodil is so named! Always smooth. Great colors, substance, smoothness, and poise. Slow increaser. Fertile both ways. Price reflects its scarceness and desirability. Was Reed seedling 98-26-16.

(Irish Mist x Flash Affair) x Three Oaks **Early Midseason** **\$30.00**

LAVENDER BELL 1Y-P (Dr. John Reed, USA)

From the cross that gave 'Pink Climax' came a full trumpet with a rolled fragment corona. Very vigorous and healthy. The lavender colored trumpet is a perfect topping to the light yellow overlapping perianth. Exceedingly beautiful to my eyes, I love it. Ample stock allows a lower price. Was Reed seedling 92-169-?. Name pending.

(Qantasia x Fidelity) **Midseason** **\$10.00**

LEMON SPICE 3 Y-Y (Peter Ramsay, NZ)

Peter Ramsay's best 3 Y-Y at Oakwood. Scarce

(Golden Aura x Gold Gem) **Midseason** **\$25.00**

LOUISE RANDALL 2W-W (Dr. John Reed, USA)

This is a beautiful daffodil named for a very special lady who loved daffodils. For many years Louise and her son, Bob, would help me plant daffodils especially when I got behind. She even helped in the snowy November weather when she was in her 80s. This is the **most consistent early midseason white for show** that I have named so far. It is also great in the garden. By combining the best attributes of its parents, it never lets you down. Neither did Louise! Flower grows and develops on maturity Don't pick when immature. Was Reed seedling 89-9-1.

(Misty Glen x Rhapsody) **Early Midseason** **\$6.00**

LYDICK 2W-R (Dr. John Reed, USA)

Offered for breeding and garden use. The original stock clumped up very fast and bulbs were dug to fatten them up again. It has been a good breeder for deep pink/red flowers. A great improvement over Spaceship. Very healthy, excellent stem, neck and wide petals. Named for a small local Indiana town.

(Spaceship x Culmination) **Early Midseason** **\$5.00**

MACILYNN 3W-YYR (Dr. John Reed, USA)

It seemed logical to cross the vigorous and colorful 'My Sweetheart' with 'LaPaloma'. This is possibly the best all-around show flower of the seven selections kept. It is named for Oakwood's own sweetheart, Christy Wagoner's little baby-turned-helper, Macilynn. This is a strong grower and increaser! Was Reed seedling 95-34-2.

(La Paloma x My Sweetheart) **Midseason** **\$16.00**

MAKER'S MARK 1Y-O (Larry Wier, USA)

This is Larry's most successful cross so far to get a better colored show flower here in the orange trumpets. The strong yellow color of the overlapping perianth is a good foil to the cylindrical shaped corona with little expansion of the trumpet. The perianth is not starry nor widely overlapping but very pleasing. The stems are tall and strong with bulbs having good increase. Breeding both 1 and 2 Y-Os. A well-grown specimen won the Single Bloom 1 Y-O class at the ADS National Show in St. Louis, beating 'Magic Lantern'. Was Wier seedling 87-1.

(Glenfarclas x Trumpet Call) **Midseason** **\$ 7.00 or 3 for \$15.00**

MEMORIAL DAY 2W-P (Dr. John Reed, USA)

Named in honor of the Memorial Day daffodil dig that has become a tradition here, sharing our excess bulbs with the daffodil clubs who come to help us dig the fields. A late, smooth, large pink with excellent vigor increase and show quality. Blooms held on strong stems. Was Reed 90-75-3. Click on Daffseek.org to see the intensely violet-shaded cup!

(Everpink x Kerstin) **Late Midseason** **\$9.00**

OH CINDY! 2Y-P (Dr. John Reed, USA)

A.D.S member Cindy Haeffner was smitten by this vigorous intermediate bloom while still in the unselected seedling beds. Initially verging on miniature size the clump opened with very little color and the cup was somewhat “squatty” in form. By the afternoon the colors had changed to a very strong pink and now had an improved corona. The well-formed petals were a pleasing light yellow. It has copious pollen and is fertile. A true intermediate with strong short stems but held high above the leaves. The blooms look at you! An amazing flower and very healthy so far. Was Reed seedling 2000-36-1.

(Laporte x 2 Y-P seedling) **Midseason** **\$18.00**

OREGON TRAIL 1Y-R (William F. Tribe, USA)

A well colored but smaller red trumpet for show and garden. I have a very good strong-growing stock. Multiplies very well. Shown many times in collections.

([(Arctic Gold x Brer Fox) x open-pollinated] x Javelin) **Early Season** **\$6.00**

PEGGY MACNEALE 2W-W (Dr. John Reed, USA)

Peggy was an outstanding and long-time member of the ADS that she loved. Her enthusiasm brought many new daffodil lovers to join the ADS and the SWODS group. Her trips to Oakwood were only at bulb digging time because of her ADS duties. She liked to point out particular bird calls to us novices while she hiked the wooded hills of Oakwood. Oakwood loved Peggy. This is a superb smooth show flower. Very white bloom with trumpet shaped corona on strong stems with excellent poise. Was Reed seedling 84-122-3.

(Inverpolly x Kindee) **Midseason** **\$8.00**

PINK CLIMAX 2Y-P (Dr. John Reed, USA)

This was the name that came to me when I first saw it in bloom. The flower colors are pastel and very pure. Almost a lavender pink in the trumpet shaped corona. Definitely not garish. I can only hope that David Bell has been looking down from Daffodil Heaven to see it in bloom. A must-have! Vigorous and floriferous. Was Reed seedling 92-169-1.

(Quantasia x Fidelity) **Midseason** **\$8.00**

PINK CIRCLE 3W-WWP (Dr. John Reed, USA) 2018 Release

Precisely formed and very distinguished ring of deep pink with nice overlapping smooth petals. Good for show and garden, and especially for breeding. A great division 3! Was Reed seedling 98-32-3.

(Kerstin x Havens seedlingVH20/5) **Midseason** **\$20.00**

PINK HONEYCOMB 2P-P (Dr. John Reed, USA) 2018 Release

A strong grower, well-formed and colorful. Great in the garden and for show. Very Distinctive! Was Reed seedling 2000-15-7.

(Pink Perry x Pink Flush) **Midseason** **\$20.00**

PLEASANT VALLEY 3Y-R (Colin Crotty, SI, NZ)

Perhaps the best show flower from this cross, now well acclimatized. Many Best in Show awards including the South Island New Zealand National Show. Robust grower but limited stock. Beautiful! Only offered in the Northern Hemisphere here.

(Achduart x Trudie May) **Midseason** **\$15.00**

POET'S WAY 9 W-GYR (Tom Bloomer, N Ire, UK)

Tom Bloomer's best poet and an excellent flower for show and garden.

(Smyrna x Lough Areema) **Late season** **\$4.00**

PORT NOO 3 W-Y (Carcairn Daffodils, N Ireland, UK)

An outstanding flower and near tops for show, garden vigor and colors. Strong stems support a well poised bloom. Easily a show winner either as a single bloom, 3 blooms, or best in show.

(Golden Aura x Aircastle) **Midseason** **\$10.00**

QUANTUM LEAP 10-R (Dr. John Reed, USA)

When this first flowered I was amazed to see its 'Altruist'-like coppery petals. While I have never seen that copper color again the petals do show a reasonable light orange flushing and the big trumpet has intensified in color. Jason Delany has insisted that I should code it as red, not orange. This change was made. It has tall stems that show some arching. It is fertile both ways and has been retained for breeding. It has given gorgeous orange trumpet seedlings with 'Flusher'. Was Reed seedling 94-15-2.

(American Revolution x Corbiere) **Early Midseason** **\$7.00**

SMOOTH TRUMPET 1W-Y (Charles, Wheatly, USA)

Its name says it all. The wide, white, overlapping petals are very smooth. The light-yellow trumpet is long and elegantly shaped. Poise, stem and neck are excellent. It is still very rare. I have been building up my stock for over 10 years. A show flower of the highest caliber. Small stock.

(Breeding unknown) Midseason \$10.00

SONGKET 2W-GWP (Brian Duncan, N Ireland, UK)

Rarely offered, this is an outstanding smaller intermediate. The center changes from yellow to white. I cannot emphasize how beautiful this flower is! A strong grower. Every flower can be showed.

(Pismo Beach x High Society) Midseason \$8.00

SPINDLE TOP 3 W-Y (William G Pannill, USA)

Bill Pannill's best division 3 for show and garden.

(Blarney x Aircastle) Late Midseason \$6.00

SPRING BOUQUET 2 Y-P (R & Havens, USA)

Almost a full trumpet with a deeply ruffled corona. Strong stems support large flowers with well overlapping lemon yellow perianth segments than can flush amber-pink in cool, wet seasons; a striking flower regardless! Strong neck. Corona color is variable, ranging from deep peach to reddish-pink at times. Vigorous. Was offered by Mitsch Daffodils as seedling WH27/7.

(Lorikeet x Magician) Midseason \$9.00

SPRING THAW 2 W-W (Dr. John Reed, USA)

Forming a double triangle, with perianth segments ovate shaped. Corona funnel shaped, smooth with heavy substance. Has a fragrant sweet scent. Excellent show flower. Was Reed 81-126-1 My stock was lost to rot and Mike Berrigan was nice to restock me with some of his.

(Broom Hill x Arctic Doric) Early Midseason \$12.00

STANDING TALL 2W-R (Dr. John Reed, USA)

Its name defines it. Most 2W-R flower suffers with short stems but this doesn't. From a cross of deeply red coronas, this one stood out. It was saved to use in crosses due to its good attributes of stem, neck, poise and health. Was Reed seedling 97-15-1. Name pending.

(Magician x Reed seedling 87-94-3) Midseason \$16.00

STEVE'S FAVORITE 2 W-GRR (Dr. John Reed, USA)

When Steve Vinisky visited in 1999, this was one of his favorites, color varies with season. A vigorous grower with wide overlapping very white petals. The cup is very round and a red shade with green eye. Stem and neck are excellent. Very fertile. Was Reed seedling 83-1-8.

(Ken's Favorite x Quasar) Midseason \$15.00

STRAWBERRY SHORTCAKE 3W-P (Dr. John Reed, USA)

My first division 3W-P of good quality, and it breeds well. Color varies from reddish to pale pink. For show and garden. Fertile. Was Reed seedling 84-171-1.

(Pismo Beach x Everpink) Late Midseason \$8.00

SUPER HERO 2W-R (Dr. John Reed, USA)

A proven parent and good garden flower with strong tall stems that consistently hold well-colored large blooms. In 2006 its offspring gave me the largest and best formed strong red colored division 2 seedling of trumpet character that I have seen. This seedling is truly a super hero! Was Reed seedling 92-170-1.

(Ken's Favorite x Magician) Late Midseason \$5.00

SUNSTROKE 2 O-R (Dr. John Reed, USA)

It seemed only natural to cross Red Haze and Stylish. This was done and a better formed and colored "all red" flower resulted. The warm orange color is applied evenly to the flat, smooth perianth, with no streaking noted. Fertile both ways. For best show results, cut early and shade the blooms. Was Reed seedling 83-108-5.

Red Haze x Stylish Early Midseason \$8.00

TABOR HILL 2W-P(O) (Dr. John Reed, USA)

Displaying outstanding show form and it has a unique orangish-pink cup color. This attractive corona has a slightly rolled lip. It has been very healthy and is increasing well. Fertile both ways. Other pinks with orange hues are coming on here and are being bred with it, including a full trumpet from red-pink breeding. In the tradition of its seed parent, it is named for a local southwestern Michigan winery. Rated highly by several ADS judges. A must for the show.

(Cabernet x Verran Rose) Midseason \$8.00

TANGERINE DELIGHT 1W-O (Dr. John Reed, USA)

First flowering in 2004, it was an eagerly awaited outcome from my 25-year effort to breed strong, vigorous, show quality white-orange trumpets in my climate. This cross gave many nice flowers in division 1 and 2 but 'Tangerine Delight is the best. It is well-formed, has large flowers that are held on strong tall stems with excellent poise. The overlapping flat perianth segments are very white and its flared trumpet is a delightful shade of tangerine orange. Jason Delaney's photos taken in 80-degree heat says it all. Great!! Fertile both ways. Was Reed seedling 98-32-2.

(Orange Tint x Lutana) Early Midseason \$20.00

THIS LITTLE PIGGY 5 Y-Y (Dr. John Reed, USA)

Only a small number of seedlings in this cross were the desired white-pinks. This one was the most distinctive of all the rest. Shorter stems stocky and deep yellow flowers with a stem in proportion to the flower size. Supporting usually two eye-catching blooms. looking like 'little piggys' Perfect for the garden. Was Reed 83-53-6

Roseworthy x N.triandrus concolor Late Midseason \$10.00

THREE OAKS 1W-Y (Dr. John Reed, USA)

A very consistent show flower and breeder of the highest quality. with a smooth overlapping perianth that has a light yellow corona. An awesome breeder and show flower. Should be grown by all. Was Reed seedling 89-21-1.

(Bravoure x Pops Legacy) Midseason \$8.00

THUNDER ROLL 1Y-R (Dr. John Reed, USA)

I saw 'Uncle Duncan' in flower for the first time at Steve Vinisky's Cherry Creek Daffodils during the World Daffodil Convention tour in 1994. I knew I had to use it in breeding the perfect orange trumpets. Using my deepest colored 1Y-R seedling in 1995, it was crossed with my first 'Uncle Duncan' bloom. John Pearson rated this seedling as very good and near tops in color for show blooms when he first flowered it. Tall stems show well colored high quality blooms. The overlapping very smooth petals display the deep orange- red trumpets nicely. Named for a catchy county western song sung by one of Sandy's favorite singers, Garth Brooks. Was Reed seedling 95-111-1.

[Uncle Duncan x 87-19-4 (Trumpet Call x Glenfarclas)] Early Midseason \$18.00

TOM TERRIFIC 11aY-R (Dr. John Reed, USA)

Simply put, a terrific intermediate daffodil. Small blooms with perfect split coronas on tall, strong stems. It increases well and is healthy. For the garden and show. You'll love it! Won Best in Show in Baltimore and is popular on show benches coast-to-coast. Named for a childhood cartoon character. Was Reed seedling 95-101-1.

(Boslowick x Sunstroke) Midseason \$12.00

TWILIGHT ZONE 2YYW-WWY (M D Brogden, NZ)

An excellent smooth show flower, a must for breeders.

(Gold Bank x Daydream) Midseason \$9.00

TWIN TOWERS 2W-P (Murray Evans, USA)

Murray Evans's best formed W-P. Color is variable. Vigorous and super healthy as it grows here.

[Quasar x (Seedling x Ever Pink)] Midseason \$6.00

VERA ROBBINS 3W-GWW (Dr. John Reed, USA)

Named for my wonderful mother-in-law. Who passed away last year and we miss her dearly. This is my best show 3W-W. Very round blooms are held high on tall stems. A healthy plant. Was Reed seedling 85-100-2.

(Verona x Achnasheen) Early Late Season \$ 7.00

WESTMINSTER PINK 2W-P (Dr. John Reed, USA)

This flower was in bloom in April when the royal wedding took place in Westminster Abbey. It was named to honor that event for Charles and Diana. Grown for many seasons, it consistently has given good-sized blooms on tall strong stems with excellent smooth, overlapping petals of pure white and a trumpet shaped cup of a pure light pink. Was Reed seedling 93-20-1.

(Breeding unknown) Early Midseason \$7.00

WHITE STORK 1W-W (Dr. John Reed, USA)

The long, narrow trumpet made me think of a stork when I named it. Show quality with wide perianth segments overlapping well all in the same plane. The stems are tall, and strong displaying the flowers with an upward poise. The stems are a beguiling light green that I find pleasing. It can be shown and is a hit in the garden, too. Distinctive, slower growing. Was Reed seedling 85-81-1.

(Pitchroy x Tradewind) Mid- Season \$10.00

WINDY CITY 1W-Y (Dr. John Reed, USA)

At the 2009 National ADS Show at the Chicago Botanic Gardens, this daffodil under seedling number received five awards including the White Ribbon and the Rose Ribbon for Best Seedling in the show. The White Ribbon set of three graced the cover of the June 2009 ADS Journal. Tall strong stems support very wide smooth white petals and a gently flared bright yellow trumpet. The neck is short and poise is excellent. Combining the best features of both parents, it is logical progression in breeding my ideal 1 W-Y. It is very pleasing, consistent, health shoe flower. To honor the Chicago National ADS Show, Bob Spotts suggested the name "Windy City". Was Reed seedling 97-163-1. Limited Stock.

(Irish Affair Sibling x Three Oaks) **Early Season** **\$20.00**

WOW! 2Y-Y (Dr. John Reed, USA)

The name says it all! That is exactly what I said when I first saw it in bloom and the name has stuck (all the letters are capitalized!) Though of trumpet character, it measures division 2. Its overlapping petals are very wide, smooth and very flat in the same plane and very consistent from year to year and flower to flower. A slow increaser. Its offspring are showing its best characteristics, especially those crossed with 'Millennium Perfection'. Was Reed seedling 93-18-1.

(Goldfinger x Dream Prince) **Early Midseason** **\$20.00**

YELLOW BRICK ROAD 2Y-P (Dr. John Reed, USA)

A bold, deeply colored bloom. Very vigorous, healthy, floriferous. Strong stems support large flowers. Petals are a bronzy-yellow and the pink corona is more brick colored. As it was bred from 'Ruby Red', the name seemed appropriate. Show, garden and breeding. Was Reed seedling 95-65-1. Name pending.

(Fragrant Rose x Ruby Red) **Midseason** **\$18.00**

YELLOW IVORY 2Y-Y (Dr. John Reed, USA)

A super smooth show flower. It was awarded a best in show for Kirby Fong, in its first year with him. Very pale, long yellow corona sits against a light ivory perianth. With enough time and warmth the corona will develop some pink color. Very consistent from year to year, and flower to flower. Was Reed seedling 92-71-1.

(Memento x Nanushca) **Early Midseason** **\$8.00**

YELLOW SATIN 2Y-Y (Dr. John Reed, USA)

A tall, large, outstanding show flower with a name that says it all. The petals overlap but are not massive. A refined, slower growing but healthy cultivar. Was Reed seedling 83-6-1.

(Meldrum x Gold Convention) **Midseason** **\$7.00**

ZANZIBAR 2Y-R (J.L. Richardson)

This was one of the first flowers to exhibit an orange-red flush over the petals of the perianth. Lightly washed by the intense orange-red of the straight-sided crown, the flat deep golden perianths seem to glow in their richness. Good for breeding because its color fast.

(Benghazi x Firecracker) **Midseason** **\$12.00**

ROYAL HORTICULTURAL SOCIETY SYSTEM OF DAFFODIL CLASSIFICATION

The classification of daffodils has changed many times over the years. The present system combines the RHS classification of thirteen divisions based on form and species heritage with Dr. Throckmorton's color coding from the American Daffodil Society. This combined system gives us a very useful tool for describing daffodils quickly. A single letter denotes a color and its appropriate location as found in the flower, first in the perianth and then in the corona. W=White Y=Yellow G=Green O=Orange R=Red P=Pink

For example: Arctic Gold is classified as a 1Y-Y. It is a trumpet daffodil with yellow petals and a yellow corona. Misty Glen is classified as a 2W-GWW. It is a large-cupped daffodil with white petals and a green-eyed white cup. First Born classified as a 6Y-GYP. It is a cyclamineus hybrid with swept-back, yellow petals and the corona has a greenish eye with a small transition of light yellow going to a deep pink color extending to the edge of the cup.

- | | |
|-------------|--|
| Division 1 | Trumpet Daffodils: The trumpet (corona) is equal to, or longer than, the petal (perianth) segments. |
| Division 2 | Large-Cupped Daffodils: The cup (corona) is less than the length of the petals (perianth) but more than a third. |
| Division 3 | Small-Cupped Daffodils: The cup (corona) is equal to, or less than a third, of the petal (perianth) length. |
| Division 4 | Double Daffodils: This division is for all forms of double flowers where there is more than one set of petal or coronal segments, or both. |
| Division 5 | Triandrus Daffodils: hybrid daffodils that predominate with <i>N. triandrus</i> characteristics. |
| Division 6 | Cyclamineus Daffodils: hybrid daffodils that predominate with <i>N. cyclamineus</i> characteristics. |
| Division 7 | Jonquilla Daffodils: hybrid daffodils that predominate with <i>N. jonquilla</i> characteristics. |
| Division 8 | Tazetta Daffodils: hybrid daffodils that predominate with <i>N. tazetta</i> characteristics. The stems usually will have multiple flowers. Also known as poetaz daffodils. |
| Division 9 | Poeticus Daffodils: hybrid daffodils that predominate with <i>N. poeticus</i> characteristics. |
| Division 10 | Bulbocodium Daffodils: hybrid daffodils that predominate with <i>N. bulbocodium</i> characteristics. |
| Division 11 | Split-corona Daffodils: the cup (corona) that is split for more than a half of its length. This division has two subdivisions: |
| 11a: | Collar Daffodils have the corona segments opposite to the perianth segments. |
| 11b: | Papillion Daffodils have the corona segments alternating to the perianth segments |
| Division 12 | Miscellaneous Daffodils: those that cannot be classified within the preceding divisions. |
| Division 13 | Species Daffodils: those distinguished solely by botanical name—the wild ones. |
