Division 1: Trumpet Daffodils

The cup measures as long as, or longer than the petals.

Each stem has only one flower.

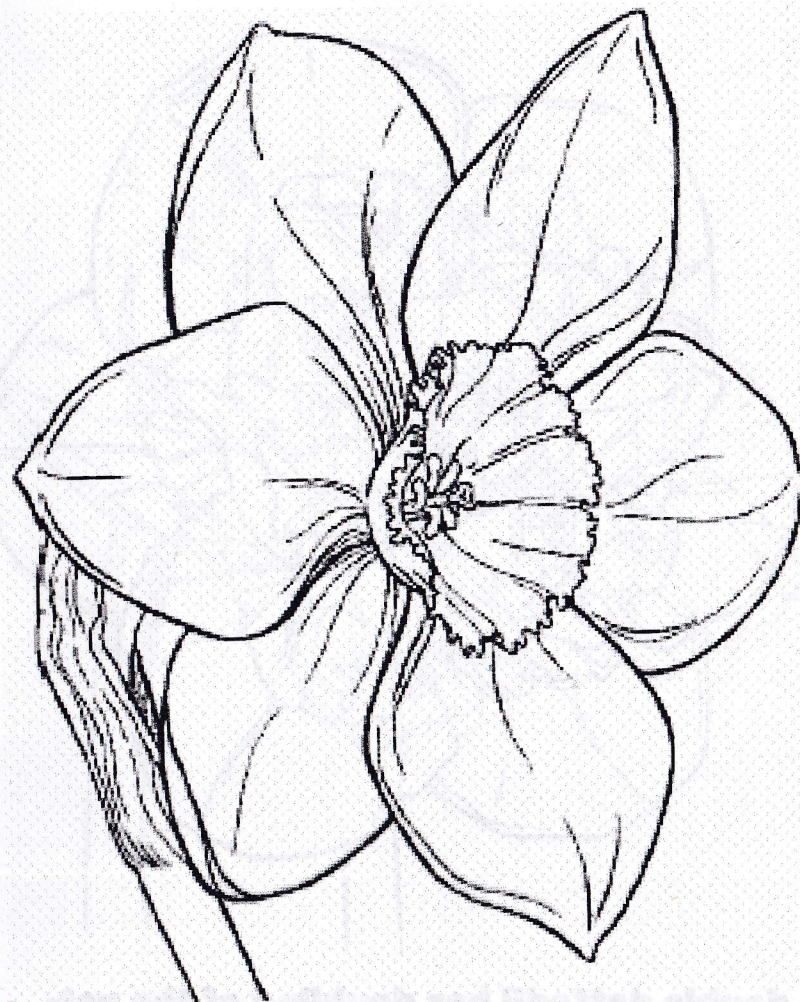

Division 2: Large-Cupped Daffodils

The cup length measures more than $\frac{1}{3}$ of, but less than equal to the length of the petals.

Each stem has only one flower.

Division 3: Small-Cupped Daffodils

The cup length measures not more than one third of the length of the petals.

Each stem has only one flower.

Division 4: Double Daffodils

A double daffodil has doubling of the petals, or cup or both.

Sometimes there can be more than one flower on each stem.

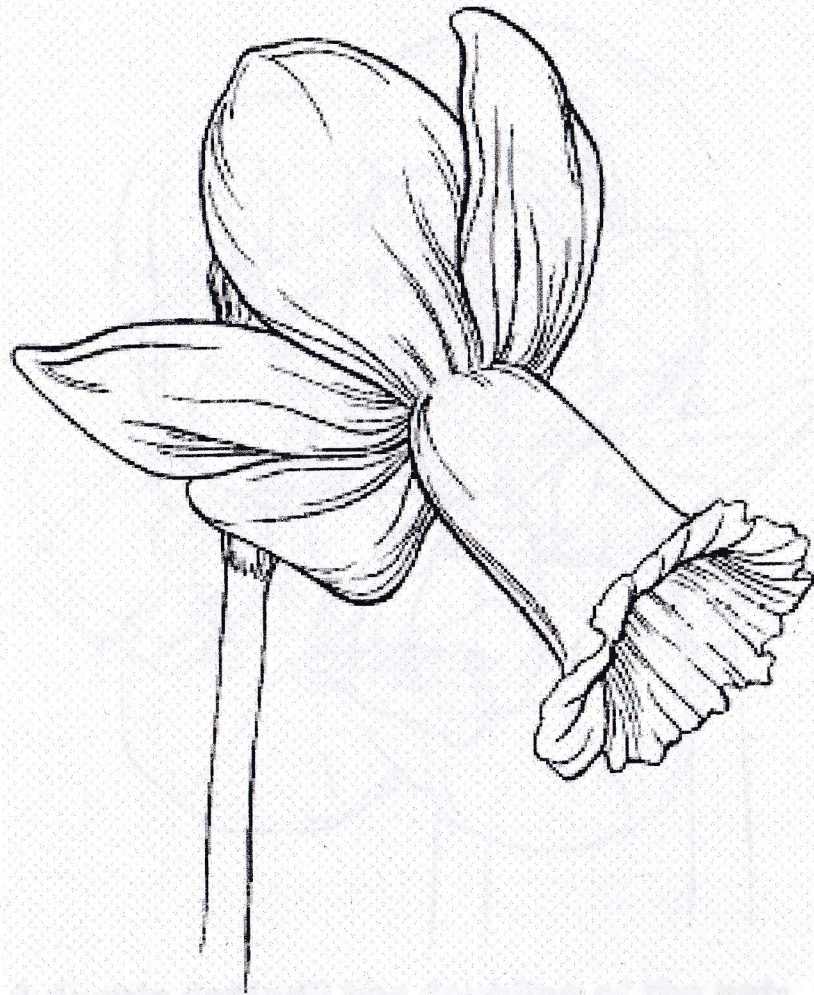

Division 5: Triandrus Daffodils

The flowers hang down like bells.

Sometimes there can be more than one flower on each stem.

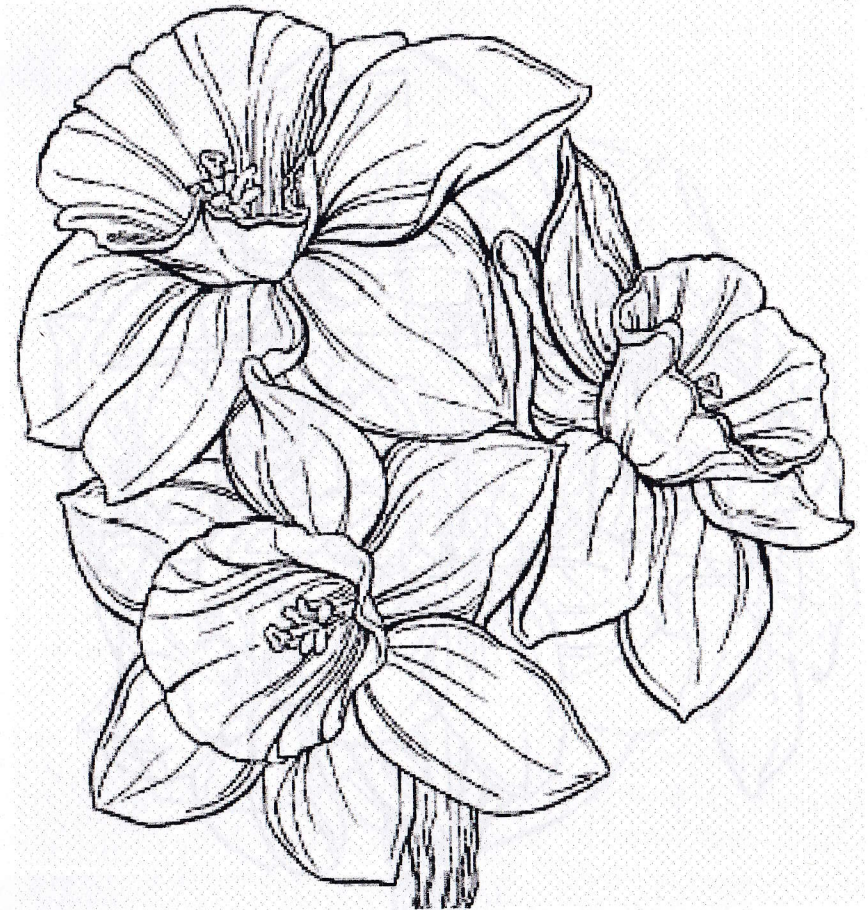

Division 6: Cyclamineus Daffodils

The petals appear wind-swept.

Each stem has only one flower.

Division 7: Jonquilla Daffodils

From their narrow reed-like leaves, one or more fragrant flowers bloom on each stem.

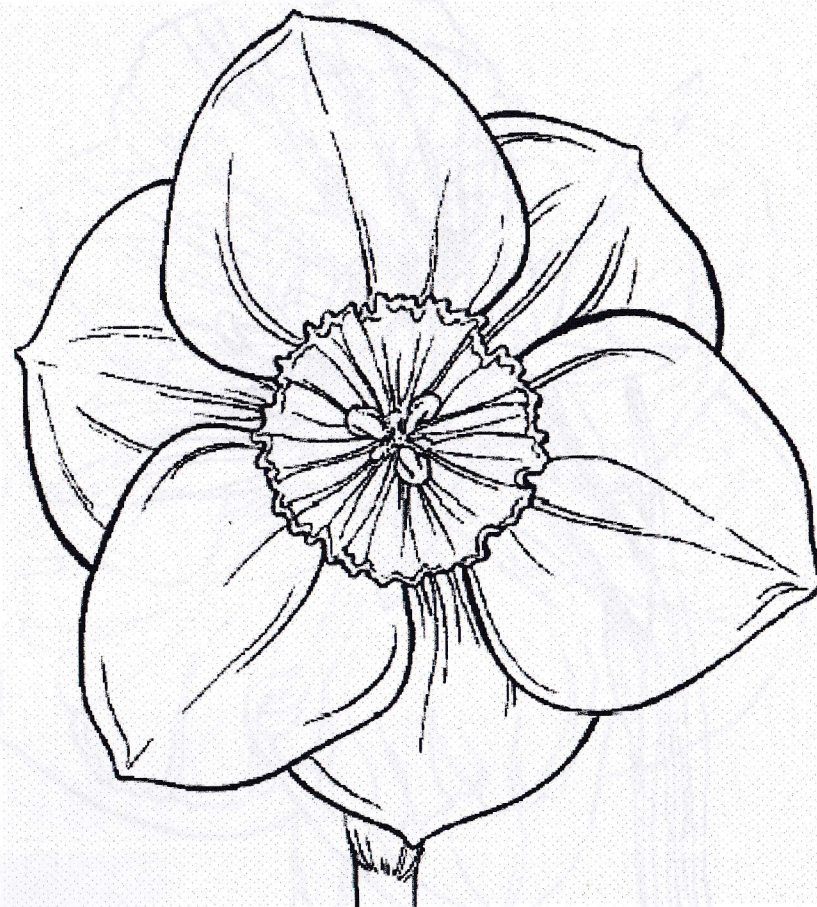

Division 8: Tazetta Daffodils

Three or more fragrant flowers bloom on each stem.

The leaves and stem are very broad.

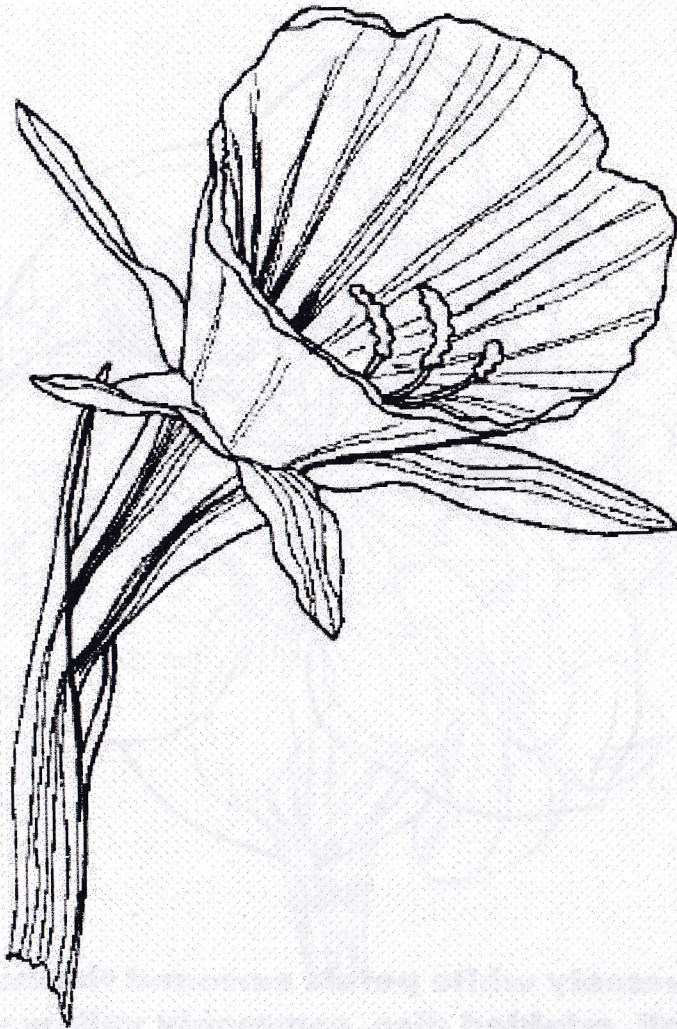

Division 9: Poeticus Daffodils

Extremely white petals surround the cup, a small, crinkled disc, commonly yellow with a green center and a red rim.

Each stem has only one flower.

Division 10: Bulbocodium Daffodils

Daffodils in the “hoop petticoat” form display large cups and tiny petals.

Each stem usually has only one flower.

Division 11: Split-Corona Daffodils

A split-corona daffodil has a cup split usually for more than half of its length.

Each stem has only one flower.

Division 12: Other Daffodils

These unique daffodils don't fit in the first 11 divisions.

Division 13: Species Daffodils

Species daffodils are wild daffodils.

They are identified or called only by their botanical, or scientific name.
