## INTRODUCTION

*Award of American Daffodil Society Gold Medal 1993  
for hybridisation of Narcissus Cultivars.*

We are pleased to acknowledge with sincere thanks the award to us by the American Daffodil Society of their prestigious Gold Medal for our work in raising *Narcissus* hybrids over the past forty years or so.

This was a quite unexpected award, as we have long since ceased to exhibit at international or national shows either by trade displays or in competitive exhibits, and have preferred to leave it to our customers to establish the merit of our hybrids. We now exhibit only our new seedlings at local shows to enable comparison to be made with existing named varieties, and other seedlings.

This award has encouraged us to name and introduce seven new cultivars this year which we think sufficiently different to justify adding to what has become an embarrassing large family of *Narcissus* hybrids.

● We have forecast a £ sterling/US \$ rate of £1 = \$1.50, and will as always recompense any exchange rate difference with extra bulbs.

● If advance payment has not been made with the order, then payment is due on receipt of the invoice sent with the bulb parcel, and must be by cheque or post office money order payable in London in £ sterling or US \$.

● We have reduced the charge for postage substantially this year, and this has made the exhibitor's parcels (see page 12) specially good value.

N.P. HARRISON,

Dated 1st February, 1994.

## ARRANGEMENT OF LIST, AND CODING SYSTEM

The list has been arranged in alphabetical order with the Division and Classification of each cultivar shown in the margin. The classification is in accordance with the Revised System adopted by the R.H.S. Colours are abbreviated as follows:

w—white or whitish; g—green; y—yellow; p—pink; o—orange; r—red.

For the purpose of description, the daffodil flower is divided into perianth, and corona. The perianth is described by the first letter following the number of the Division to which the cultivar belongs.

The corona is treated as having three zones: An eye zone, a mid-zone and an edge or rim. The description of the corona is separated from the description of the perianth by a hyphen and the letter then following the hyphen describes the corona colour starting with the eye zone. If however the corona is of a single colour, only a single letter of the colour code is used to describe it.
