

Barr's "Gold Medal" Daffodils

AWARDED

Twenty-eight Gold Medals and a Ten Guinea Challenge Cup,

Also many First-class Certificates and other high awards.

NEW CLASSIFICATION OF THE DAFFODIL.

FOR some years past a general want has been felt by Daffodil exhibitors for a wider classification of the Daffodil than the existing one, which has not been found sufficiently elastic to take in several new forms of the Narcissus family raised by hybridists since the great Daffodil Conference of 1884. The Narcissus Committee of the Royal Horticultural Society was approached on the subject, and to meet the case appointed in 1909 a sub-committee to carefully go into the matter, and see how far the existing classification could be modified or altered so as to facilitate the placing of the many new seedlings now being raised. A good deal of time and careful study was given by the members of the sub-committee to the subject, and the revised classification which they brought forward was almost unanimously accepted by the full Narcissus Committee of the Royal Horticultural Society. In the following pages we have adopted to a great extent this classification, which we hope will be of valuable assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, 10 distinct divisions have been made together with a section (Div. XI.) at the end to take in a few unclassified species and hybrids. With each division we have given the distinguishing character.

BARR & SONS,

11, 12 & 13 King Street, Covent Garden, London

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

Soil and its Treatment.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry and sandy nature, it should be deeply dug, if possible at least a season before planting the bulbs, well-decayed cow manure being added, and a potato or other vegetable or annual crop grown on the ground. Before the bulbs are planted a sprinkling of quick-lime should be spread on the surface and then dug in. If it is not convenient to first take off a crop of Vegetables or Annuals, then, in digging, mix with the soil crushed bones at the rate of $1\frac{1}{2}$ oz. to the square yard. The ammoniacal properties of stable manure are injurious to the Daffodil; considerable risk is therefore incurred by using it. On good retentive loamy soils stable manure is not required and should not be used, but a dressing of lime once in every three years, with an annual dressing of Basic Slag, at the rate of $7\frac{1}{2}$ oz. to the square yard, may prove beneficial.

FRESHLY DUG SOIL should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are sometimes drawn under considerably below their proper depth, and the bloom in consequence is apt to be weakened and retarded the first season.

The BEST AND SAFEST MANURE TO USE is Crushed Bones or Basic Slag (*for price see page 38*). This should be applied at planting time, and may be mixed with the soil; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or $7\frac{1}{2}$ oz. to the square yard. We recommend for light soils Crushed Bones (provided they are genuine) in preference to Basic Slag. On very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH (*for price see page 38*), to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 cwt. to the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, a condition so essential to the perfect development of the Daffodil. We also recommend the use of Phytobroma in autumn and spring (*see particulars, page 38*).

IN EARLY SPRING, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains; a handy tool for this purpose will be found offered on page 37. Where practicable it is advisable to cover the ground in November with some light covering material (the idea is to prevent the autumn rains from beating down the crust of the ground, and to break the severity of a sudden frost). We use for this purpose pulled heather; cut furze or gorse, however, answers the same purpose; cut fern or bracken is bad, as it lies too wet; old pea sticks laid across the ground are good, or on flower beds sprays or small branches of cut evergreens stuck into the ground answer the purpose and look decorative; these of course need renewing when they get shabby. Do not mulch the beds with manure.

Planting and Lifting.—The best time to plant, to obtain the finest flowers, is early Autumn (as early as possible), *although bulbs may be put in as late as Christmas with fairly satisfactory results*; we have planted some Daffodils as late as the second week in February, and had some very good blooms the third week in May. We recommend, however, *early* planting for best results. The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted if possible immediately or as early as is convenient. Never plant when the ground is wet and sticky. Do not put silver sand around the bulbs of Narcissi except in the case of *N. corbularia*.

DEPTH TO PLANT.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base. On light sandy soils the bulbs may be planted a trifle deeper than on heavy stiff soils, and in the North of England and in cold localities they should be put in a little deeper than in the warmer southern districts.

Position and Grouping for Effect.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping Daffodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious selection, a constant succession of flowers can be maintained. *On page 14 we denote the rotation of blooming.*

Naturalising Daffodils in Grass, Etc.—All Daffodils may be planted in grass with perfect success. To produce the best effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet's Narcissi with the Star Narcissi. In planting, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are not found in nature. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface.

DAFFODILS never look more beautiful or are seen to greater advantage than when growing on grassy slopes or banks, and we strongly recommend our customers to avail themselves of such situations for naturalising Daffodils.

VARIETIES SPECIALLY SUITABLE FOR NATURALISING IN WOODLANDS, GRASSLANDS, GLADES, ETC., DELIGHTING IN PARTIAL SHADE.—The following are mostly free seeders, and will therefore spread naturally; they are mostly wild plants—*Abcissus*, *Countess of Annesley*, *Excelsior*, *Golden Spur*, *Henry Irving*, *Obvallaris*, *Spurius*, *English Lent Lily*, *Princeps*, *Scoticus*, *Albicans*, *Pallidus Præcox*, *Moschatus* of Haworth

Naturalising Daffodils in Grass, Etc.—continued.

(very pretty in grass), *Johnstoni* Queen of Spain (in our opinion the most beautiful of all for this purpose), and all varieties of *Poëticus*, including the old Double White. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in woodlands, grass, or meadowland they flourish.

Varieties for Naturalising in Grasslands, Parks, Meadows, on Lawns, etc.—The following fine trumpet varieties are all good strong growers, as well as being distinct and effective—EMPEROR, EMPRESS, P. R. BARR, GOLDEN SPUR, QUEEN OF SPAIN, W. P. MILNER, HORSFIELDII, MADAME PLEMP, MRS. THOMPSON; of the chalice-cupped varieties the following are best suited to the purpose—INCOMPARABILIS BEAUTY, FRANK MILES, STELLA SUPERBA, SIR WATKIN; LEEDSII M. M. DE GRAAFF, DUCHESS OF BRABANT, MINNIE HUME, and MRS. LANGTRY; BARRII CONSPICUUS, FLORA WILSON, CROWN PRINCE, ELLEN BARR, FALSTAFF, JOHN BAIN, ODORUS and O. RUGULOSUS; of the Poets' *Narcissi* for planting in grass we recommend POETICUS ORNATUS, ALMIRA, GRANDIFLORUS, HERRICK, and POETARUM and the late Pheasant's Eye (POETICUS RECURVUS); of the double-flowered daffodils, the Old Double Yellow (TELAMONIUS PLENUS), BUTTER AND EGGS, EGGS AND BACON, and CODLINS AND CREAM may be used.

For Lawns and Tennis Courts which have to be mown early we recommend the dainty *Minimus*, *Cyclamineus*, *Minor*, *Nanus*, and *Lobularis*. Being very early varieties the grass may be safely mown in May.

Varieties for Planting by the Water Side.—Daffodils produce a charming effect when growing at the water's edge. The following varieties we can strongly recommend for this purpose—*Odorus* and *Odorus rugulosus*, with their rush-like foliage and graceful golden flowers; *Duchess of Westminster*, *John Bain*, and the old late *Pheasant's Eye Narcissus* (*Poëticus recurvus*), with their graceful starry flowers; *Emperor*, *P. R. Barr*, and *Empress*, three noble trumpeters; *Sir Watkin*, *Barrii conspicuus*, *Stella superba*, *Beauty*, *Frank Miles*, and the *Double White Poëticus* or *Gardenia-flowered Narcissus*, etc. In choice spots near the water's edge the charming little *Cyclamineus* should be planted, as also the sulphur-coloured Hoop Petticoat *Narcissus* (*N. Bulbocodium citrinum*), both of which luxuriate in moist grassland.

Method of Planting Daffodils in Grass.—We recommend for this work our SPECIAL BULB PLANTER (see illustration, page 37). By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular piece of turf 2 to 2½ inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with. The soil is not in any way tightly pressed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could hardly detect that the grass had been touched. If the ground is very poor and thin, a compost of fresh soil with an abundance of *Crushed Bones* (7 lbs. to a bushel) should be made and dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. (For price of Barr's Special Bulb Planter, see page 37.)

The Best Time for Planting in Grass is with the advent of the autumn rains, when the ground is in a fairly moist condition, it being impossible to plant whilst the ground is hard and solid from the summer heat; moreover, nothing is gained by planting in hot dry ground, to say nothing of the cost and labour of planting.

CUTTING DAFFODILS FOR DECORATION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud is bursting, placed in water and allowed to expand in a greenhouse or sitting-room. The blooms opened in this way are larger and finer in texture and purer in colour than those which develop out of doors.

CULTURE OF DAFFODILS IN POTS OR BOXES.

TIME OF POTTING.—Pot as early in autumn as possible to obtain the finest results and earliest blooms.

THE BEST COMPOST to pot Daffodils in is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand and not passed through a sieve, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. *Phytobroma* (see page 38) to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet; never pot in soil that is wet or sticky. Barr's Fertilised Fibre, Shell and Charcoal may also be used; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting. (See page 38.)

THE POTS should be carefully washed or wiped clean before using. Never pot in dirty or wet pots.

GOOD DRAINAGE should be secured by placing three or more pieces of broken crocks over the hole, placing the crocks with bevelled sides uppermost, then cover crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with crocks, a good layer of rough fibrous loam placed at bottom of box, or a layer of leaf soil to ensure perfect drainage.

IN POTTING, the larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot so as to allow of watering when in growth. The small bulbs of the miniature species should be covered with half an inch of soil.

AFTER POTTING, stand the pots or boxes outside in the open, on a firm bottom such as a bed of ashes or gravel path to prevent the entrance of worms. The pots should be plunged bodily in Cocoa Fibre, old decayed leaf soil, or very old ashes, free from sulphur, so as to be surrounded with the covering material and with their tops 2 inches below the surface. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots remain buried they will require no watering.

Culture of Daffodils in Pots or Boxes—*continued.*

THE POTS OR BOXES SHOULD REMAIN PLUNGED for a period of not less than twelve weeks, after which first-early sorts (marked 1 in catalogue), such as GOLDEN SPUR, HENRY IRVING, OBVALLARIS, etc., may be transferred to a greenhouse or sitting-room where the night temperature does not exceed 55° and that of the day 60°. A higher temperature should not be given if well developed blooms are wished for. If the pots are taken into a sitting-room they should be kept during the day in a sunny window and at all times should be protected from draughts and gas heat. Later-flowering Daffodils (marked in catalogue 2, 3, and 4) should be brought into warmth later and in succession, thus sorts marked 4 should not be removed from the plunging bed until February or March. *No Daffodils will bear hard forcing or bottom heat.* After the bulbs are out of the plunging bed, give the plants as much light and air as possible, and once a week a very little weak liquid manure water until they come into bloom.

Of the stronger growing sorts use three to six bulbs, according to size of bulb, for a pot measuring 4½ to 6 inches in diameter; of the small miniature kinds, such as N. Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Corbularias, use twelve to eighteen bulbs for a 4½ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may be had in bloom in January:—Minimus, Minor, Nanus, and Cyclamineus, and these may be mingled with *Scilla sibirica* and *Chionodoxas*, as both bloom at the same period and produce a charming contrast. For pot-culture the largest bulbs only of *Minimus*, *Cyclamineus*, *Triandrus*, and *Corbularias* should be used, as being collected when in bloom there is an uncertainty in their flowering the first season. The White Hoop Petticoat *Narcissus* should be potted in almost pure sand kept well moist, and if placed at once in a cold frame after potting may be had in bloom by Christmas. (*See Rock Garden Collections of Miniature Daffodils, page 8.*)

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes, giving same culture as recommended above for growing in pots. Of the best varieties to grow for early forcing in boxes, the following command a first place: *First early sorts*—Queen of Spain, Henry Irving, Golden Spur, Sir Watkin, Old Double Yellow Daffodil; *Second early sorts*—Emperor, Empress, Horsfieldii, P. R. Barr, Barrii conspicuus, Incomparabilis Beauty, and Stella superba.

CULTURE OF DAFFODILS IN VASES AND BOWLS In Barr's Special Fibre Mixture.

A charming effect can be obtained by growing Daffodils in fancy vases or bowls, with or without drainage holes, by simply using our specially prepared Fertilised Fibre, Shell and Charcoal Mixture (ready for use, 3s. 6d. per bushel, 1s. per peck); the mixture is light, clean, and nice to handle, and *remains sweet*; indeed, it is preferable to soil where Daffodils and other bulbs are grown in fancy bowls and vases.

Three bulbs of *N. Queen of Spain* growing in Barr's Fertilised Fibre in a 4-inch "Doulton-ware" Vase, without drainage hole.

at any time to become dry, even for a day, the buds will go blind; should by any chance too much water have been given, the bowls may be drained by carefully tipping them on their side. If obtainable rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting-room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, it being necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

 For Bowls and Barr's Fertilised Fibre Mixture, see page 38.

Culture.—Fill the vase or bowl with the Fibre, Shell and Charcoal Mixture up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them; the mixture may be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, either of the following plans may be adopted:—

(a) The bowls or vases may be plunged outdoors on a bed of cocoa fibre or ashes, and covered entirely with cocoa fibre, leaving them thus for 8 to 12 weeks, when the bulbs will have made some top growth.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark *airy* place, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, etc., as they will, of course, have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to the rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to keep the fibre damp enough to encourage root action. As soon as the bulbs are well rooted, water should be given more freely, the fibre mixture being then kept quite moist; if the mixture is allowed

COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS AND POT CULTURE.

UNNAMED SEEDLING DAFFODILS.

The following are beautiful flowered Seedlings from crosses between **Weardale Perfection**, **Madame de Graaff**, **King Alfred** and fine varieties of **Poeticus**. They have not been selected out and named as they resemble too closely other named Seedlings which are in commerce. Many fine varieties suitable for exhibition may be selected out.

Seedlings of Weardale Perfection x Madame de Graaff, containing many fine new *White Trumpet* and *Bicolor Trumpet* Daffodils, per 100, £5 5s. ; per doz. 15/-

Seedlings of King Alfred, containing large and handsome *Yellow Trumpet Daffodils* of good form, tall growers, per 100, £5 5s. ; per doz. 15/-

Seedlings of Large-flowered Poeticus, containing many fine new varieties, per 100, 30/- ; per doz. 4/3

BARR'S INEXPENSIVE DAFFODILS.

For Naturalising in Woodlands, Shrubberies, Orchards, and in Grass, etc., and to plant for cutting.

All strong flowering bulbs.

1000 in 20 fine showy sorts (Trumpets, Peerless, and Poets), 40/- ; in 30 fine sorts, 45/-
 500 in 20 " " " " " " 21/- ; in 30 " " 24/-
 100 in 10 " " " " " " 4/- ; in 20 " " 4/6

Full descriptions of the following Daffodils will be found in body of catalogue.

For Inexpensive Mixtures of Daffodils for naturalising and large plantings, see page 8.

Barr's Inexpensive Mixtures of Daffodils.

To Naturalise in Shrubberies, Orchards, on Grassy Slopes, etc., and for cutting.

Single Trumpet Daffodils, Mixed, including *Princeps*, *Queen of Spain*, *Horsfieldii*, *Emperor*, *Rugilobus*, *Spurius*, etc., etc., for naturalisationper 1000, 37/6 ; per 100, 4/-

Single Chalice-cup or Star Narcissi, Mixed (*Incomparabilis*, *Leedsii*, and *Barrii* varieties), for naturalisation in grass, etc. The grand effect of these light graceful Daffodils, when naturalised, must be seen to be realised. Their value as cut flowers for bouquets and vases cannot be over-estimated.....per 1000, 32/6 ; per 100, 3/6

White Poet's Narcissi, in Mixture, comprising varieties of early and late *Poeticus*, for naturalisation in grass, etc. For cutting, the flowers are greatly prized. Of these Poet's Narcissi Mr. William Robinson writes, referring to Gravetye: "Five years ago I cleared a little valley; through this runs a streamlet, and we grouped the Poet's Narcissi near it, and in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture, such as one might see in an Alpine valley."per 1000, 35/- ; per 100, 3/9

Splendid Mixed Daffodils of Many Sorts, for naturalisation, including Trumpet, Chalice-cup, and Poet's Narcissi, a special mixture of Daffodils of all kinds suitable for large plantings in Grass, Woodlands, etc.per 1000, 25/- ; per 100, 2/9

Barr's Choice Mixtures of Daffodils for Flower Borders.

Made up specially from beautiful named varieties only.

Large-flowered Trumpet Daffodils in Mixture, containing Yellow, Bicolor and White Trumpets, as follows:—*Excelsior*, *Glory of Leiden*, *Henry Irving*, *Maximus*, *Van Dyck*, *Emperor*, *Empress*, *Mdme. Plemp*, *Victoria*, *Albicans*, and *William Goldring*, etc.per 100, 10/6 ; per doz. 1/6

Chalice-cup Daffodils in Mixture, including some of the better kinds of the *Incomparabilis*, *Leedsii*, and *Barrii* varieties, such as *Sir Watkin*, *Beauty*, *C. J. Backhouse*, *Queen Catherina*, *Yesuvius*, *Barrii conspicuus*, *Sensation*, *Leedsii Mrs. Langtry*, *M. M. de Graaff*, etc.per 100, 10/6 ; per doz. 1/6

Miniature Daffodils for the "Rock Garden."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularias* (except *Corbularia monophylla*) and *Cyclamineus* like moisture, and should therefore be planted at the foot of the rockery. *Corbularia monophylla* flourishes in a warm dry sheltered situation, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Daffodils, the ground may be carpeted with close-growing surface-rooting plants, such as *Arenaria caespitosa*, *Thymus serpyllum* vars., *T. lanuginosus*, *Herniaria glabra*, *Mossy Saxifragas*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

☞ Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

☞ For Daffodil Seed for Autumn Sowing, see page 37.

Barr's New Seedling Daffodils for 1911.

The following list of Daffodils comprises some of the finest novelties, and includes new seedlings of our own raising and those of the Rev. G. H. Engleheart, the Rev. G. P. Haydon, Mr. J. C. Williams, Mr. P. D. Williams, Mrs. Backhouse, and Mr. E. M. Crosfield, the most successful hybridisers of recent years. We would specially draw attention to the following grand exhibition kinds: **Bedouin, Caesar, Charm, Cossack, Dresden, Empire, Eros, Furnace, Jasper, Lewis Carrol, Lord Kitchener, Marie Louise, Mermaid, Messina, Michael, Michael Angelo, Mrs. George H. Barr, Peter Barr, Red Beacon, Red Chief, Seraphine, Sirdar, Sir Galahad, Snow King, Socrates, St. George, Tennyson, Timon, and White Standard**—all of great beauty. We would mention that we purchased in 1910 from Mr. Charles Dawson (who has given up growing Daffodils) his "Rosemorran" Daffodil seedlings, containing many beautiful varieties, and at the same time took over his Daffodil garden for the rearing of our new seedling varieties. Visitors at the London and Birmingham Shows will well remember the high quality of Mr. Dawson's "Rosemorran" flowers. We have also now removed from our Surbiton Nurseries to Taplow, where in future a fine display of our Daffodils and Tulips may be seen in Spring.

☞ Where we have a record, we give in inches the heights as registered at our Nurseries.

The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being earliest, (5) being latest.

	each.
	£ s. d.
Adonia (Barrii) (4), <i>new</i> 1909, raised by Mr. E. M. Crosfield, perianth cream, broad and elegantly formed, cup fiery orange-scarlet, prettily fluted; the colour is very lasting, ht. 12 in.	1 5 0
Ailsa (Trumpet Daffodil), xxxx, raised by Mr. E. M. Crosfield, a beautiful chaste flower, perianth pure white, trumpet white, large and bold with recurved margin. AWARD OF MERIT R.H.S., 1907.....	5 0 0

Uncle Robert (Trumpet Daffodil), xxxx, raised by Mr. E. M. Crosfield, the LARGEST OF THE WHITE TRUMPET DAFFODILS, flower of immense size, perianth white, broad and campanulate, trumpet cream with wide open mouth elegantly frilled at margin, ht. 18 in. ...	18	18	0
Warley Scarlet (Barrii), (4), xxxx, a very beautiful flower of good size, having a creamy perianth and a very striking open fluted crown of a brilliant orange-scarlet almost to the base, a tall grower	4	4	0
Whitewell (Incomparabilis), xxx, flower large and of fine form, with broad, rounded, creamy perianth of good substance, and a large expanded chrome-orange crown 1½ in. across and prettily fluted, tall grower	0	15	0
Wildfire (Barrii) xxx, <i>new</i> 1911, raised by Mr. C. H. Cave, a very distinct and pretty flower, perianth sulphur shaded cream, crown fiery brick-red shading down to a green centre, ht. 14 in.	0	15	0
William Baylor Hartland (Trumpet Daffodil) (2), a fine early bicolor variety, with large rounded and imbricated white perianth and a soft golden-yellow trumpet	1	10	0
Yellow Prince (Incomparabilis), xxx, <i>new</i> 1910, a nice rounded flower, with broad well-imbricated perianth of a light primrose-yellow and bold globular rich yellow cup elegantly crimped at margin, ht. 16 in.	0	7	6

NARCISSUS CLEOPATRA.

A magnificent variety in way of *Monarch*, but larger ; very broad yellow imbricated perianth and long bold deep yellow trumpet. *Raised at our own Nurseries.* AWARD OF MERIT R.H.S. AND AT BIRMINGHAM. See page 15.

Barr's General List of Daffodils

For Alphabetical Index, see page 2 of Cover.

The following list of Daffodils embraces the highest class and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. It represents the cream of our Collection (over 500 kinds), and the best of the newest varieties in commerce up to 1911, several being offered to the public for the first time this season.

During the past few years we have rejected many of the older kinds which we considered had been superseded by better sorts at equally moderate prices. We can, however, generally supply such if required, as, although we do not catalogue them, we keep a small stock of them at our Nurseries.

Time of Flowering.—The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus :

- (1) 1st early, flowering from February to early March.
- (2) 2nd early, flowering in March.
- (3) Varieties flowering in mid-season, or early in April.
- (4) Late-flowering varieties, from middle to end of April.
- (5) Very late-flowering varieties, opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

Height.—In most cases we give also the heights in inches as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—* The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are, however, also splendid border varieties.

§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

Any Daffodil not offered in this Catalogue we can generally supply, if required.

DIVISION I.—TRUMPET DAFFODILS.

DISTINGUISHING CHARACTER.—TRUMPET OR CROWN AS LONG AS OR LONGER THAN THE PERIANTH SEGMENTS.

(A) YELLOW AND SULPHUR-COLOURED TRUMPET DAFFODILS.

Varieties with Yellow, Lemon or Sulphur-coloured Trumpet and Perianth of same shade or lighter (but not white).

KING ALFRED (much reduced).
(Example of a Flower in Division I.)

- ***Abcissus** (4), x, a native of the French Pyrenees, perianth sulphur-yellow, long straight yellow trumpet; the latest flowering of all Trumpet Daffodils, and recommended for naturalising in grass, woodlands, etc., where, when established, it flowers freely, ht. 12 in. per doz. each. s. d. s. d.
per 1000, 45/-; per 100, 5/- 0 9... —
- †**Admiral Togo** (3), xxx, large handsome flower, broad yellow perianth and bold golden trumpet with expanded mouth, strong grower and free bloomer, ht. 15 in. 30 0...2 9
- †**Alma** (1) xxx, a seedling from *Maximus*, and of same elegant form, colour nearly a self, soft canary-yellow, trumpet very large with bold open mouth, deeply flanged, perianth gracefully twisted, flower measuring to 4½ in. across; likes a deep moist soil, ht. 20 in. 48 0...4 6
- ***Ard Righ** (*syn.* **Yellow King**) (1), xx, a native of Ireland, full yellow perianth, trumpet large and deep yellow, *early*. This Daffodil requires shade or planting in grass, ht. 15 in. per 100, 12/6 1 9...0 2

†	Michael. See <i>New Seedling Daffodils</i> , page 11each £25				
§†	Mikado (2), xx, flower of <i>M. J. Berkeley</i> form, but much finer; colour golden-yellow, with graceful twisted perianth, and very large trumpet with wide open mouth, deeply flanged at brim; very showy and free flowering, ht. 15 in. per 100, 55/-	7	6...	0	8
	Minimus, true (1), the smallest and dwarfiest Trumpet Daffodil, flowers rich full yellow; height about 3 inches, flowering outdoors in February; a dainty little gem for edgings, nooks on rock-work, or to naturalise in grass, and for pot culture. It likes a peaty soil. In 1887, during a tour in Spain, the late Mr. Peter Barr found this charming miniature Daffodil growing freely amongst gorse, with a south aspect. <i>For our annual supply we have to depend upon collected bulbs which are taken up while the foliage is green: in consequence there is a possibility that all the bulbs may not bloom the first season, but a proportion will</i>per 1000, 100/-; per 100, 10/6	1	6...	0	2

†	Van Waveren's Giant (3), xxx, a giant Trumpet Daffodil, flowers of immense size, perianth primrose and of rather campanulate form, trumpet bright yellow with very large open mouth, flanged at brim, ht. 18 in.	—	16	6	6
§†	Willie Barr , xx, perianth soft yellow of fine campanulate form and good substance, trumpet deep yellow with elegant brim; a fine bedder, ht. 15 in. ...per 100, 42/-	5	6...	0	6

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 2). The varieties marked thus * thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.

DIVISION II.—INCOMPARABILIS.

Large Chalice-Cupped Daffodils or Star Narcissi.

DISTINGUISHING CHARACTER.—CUP OR CROWN MEASURING FROM ONE THIRD TO NEARLY EQUAL THE LENGTH OF THE PERIANTH SEGMENTS. (FOR VARIETIES HAVING THE CROWN EQUAL THE LENGTH OF PERIANTH SEGMENTS SEE DIVISION I.)

☞ The varieties of *Narcissus Bernardi* and *Nelsoni*, also the larger-flowered varieties of *Engleheartii*, are now placed under this division.

The beautiful **Star Narcissi** commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (*see page 3*). They make charming pot plants, while in beds and borders they are very showy and naturalised in grass they produce a graceful effect.

DIVISION IV.—LEEDSII.

The Eucharis-flowered or Silver-White Fragrant Star Narcissi.

Comprising all the Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream or pale citron.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the Incomparabilis and Barrii forms, seeing how distinct a "colour" section it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

NARCISSUS TRIANDRUS HYBRIDS—*continued.*

NARCISSUS QUEEN OF SPAIN
(About two-thirds natural size).

§†**Queen of Spain** (3), xxx, found by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils in cultivation, and unsurpassed either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in Fertilised Fibre Shell and Charcoal mixture, or damp pebbles and gravel, and grown thus affords an artistic decoration for the sitting-room. Awarded FLORAL CERTIFICATE at the Daffodil Conference, 1896. As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, there is a possibility that all the bulbs may not bloom the first season, but a fair proportion will

- †**Zoë** (3), xxx, perianth delicate primrose, straight lemon-coloured trumpet, very elegant, ht. 15 in.each £1 1s.

(There are many other beautiful hybrids belonging to this section, but they are not yet in commerce.)

DIVISION VI.—CYCLAMINEUS & CYCLAMINEUS HYBRIDS.

Seeing that **Cyclamineus** blood, like that of **Triandrus**, imparts such a distinct form to Daffodils, a separate division has been made for its hybrids. It has been used by many hybridisers as a parent, but as a rule the progeny has not been long-lived. It is possible, however, that we may yet obtain hybrids with a stronger constitution to come under this division.

N. CYCLAMINEUS
(Half natural size).

CYCLAMINEUS (1), the Yellow Cyclamen-flowered Daffodil.

This beautiful little Daffodil was re-introduced into cultivation in 1887 by A. W. Tait, Esq., of Oporto, after being lost sight of for 200 to 300 years. It is the earliest of all Daffodils and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed as in a Cyclamen. A valuable little species for pot-culture, edgings, rockwork, and to naturalise in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil, ht. 6 in., FIRST-CLASS CERTIFICATE R.H.S. As we have to depend for our annual supply upon collected bulbs, and these have to be taken up while the foliage is still green, they are not all likely to bloom the first season.

POETAZ—New hybrids of *Poeticus Ornatus* × Best Forms of *Polyanthus Narcissi*.

A fine new race of Daffodils, resulting from a cross between *Poeticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the *Poeticus* being the seed-bearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer than the common *Polyanthus Narcissi*, and have the advantage of being much hardier. In pots or the flower border they are very decorative, while the flowers are highly prized for cutting.

		per doz.		each.	
		s.	d.	s.	d.

TAZETTA—Dutch varieties of Polyanthus Narcissi, see our General Bulb Catalogue.

DIVISION IX.—POETICUS—True Poet's Narcissi.

These "Poet's" Daffodils or Narcissi all have snowy white perianth segments or petals, and a flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, and sometimes almost all scarlet. All are more or less sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced. As border plants and naturalised in grass by themselves the Poet's Narcissi produce a lovely effect.

☛ **Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.**

DIVISION X.—DOUBLE VARIETIES.

(A) DOUBLE TRUMPET DAFFODILS.

All the Double Trumpet Daffodils thrive admirably when planted in grassland and allowed to remain undisturbed. They are seen to great advantage when planted in clumps in permanent borders, and as pot-plants they are very attractive (several bulbs in a pot).

	per doz.		each.

(B) DOUBLE INCOMPARABILIS NARCISSI.

The Double Rose-flowered Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (3 to 6 bulbs in a pot) they are very charming, while in beds, borders, or naturalised they make a most effective display.

DIVISION XI.—VARIOUS SPECIES AND HYBRIDS.

Distinct forms which cannot be classed under any of the foregoing divisions.

BULBOCODIUM (CORBULARIA), The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See also *Cultural Notes*, pp. 4 and 8.

†**Large Sulphur Hoop Petticoat** (*Bulbocodium citrinus*) (3), native of the Pyrenees, very beautiful pale citron-yellow, ht. 6 to 8 in.; delights in a dampish sandy peat soil. The bulbs having to be collected while in growth each year, will not all bloom the first season; they should be left undisturbed to establish themselves. per doz. each. s. d. s. d.
per 1000, 60/-; per 100, 6/6 I 0... —

WHITE HOOP PETTICOAT
(Half natural size).

†**White Hoop Petticoat** (*Bulbocodium monophyllum* or *Clusii*) (1), native of N. Africa, winter-flowering, snowy white flowers of exquisite beauty produced in winter; grow in pots, in frames, or at the foot of hot dry walls, and as soon as signs of growth are seen, give water freely, ht. 6 in. We import these bulbs each year from N. Africa and only a proportion will flower the first season. They should remain where planted so as to become establishedper 100, 13/6 I 10...0 2
" " " " Extra strong bulbs " 16/6 2 4...0 3

†**Large Yellow Hoop Petticoat** (*Bulbocodium conspicuum*) (4), rich golden-yellow, ht. 6 in.; prefers a dampish sandy peat soil. A fair proportion of the bulbs flower the first yearper 100, 12/6 I 9...0 2

†**Early-flowering Yellow Hoop Petticoat** (2), found in Spain by the late Mr. Peter Barr, rich golden-yellow, very beautiful, flowering outdoors from February, ht. 6 in.; delights in a dampish sandy peat soil. A fair proportion of the bulbs should bloom the first seasonper 100, 10/6 I 6...0 2
" " " " A few extra large bulbs " 15/- 2 3...0 3

†**Miniature Early Yellow Hoop Petticoat**, native of Portugal, bright yellow, early and very pretty, a rare species, ht. 3 in.; prefers a sandy peat soil. A fair proportion of the bulbs should bloom the first season.....per 100, 21/- 3 0...0 4

§**GRACILIS** (5), xx, an elegant rush-leaved Daffodil, 3- to 5-flowered, pure yellow, sweet-scented, the last of the family to bloom, opening about end of May, ht. 14 in. per 100, 7/6 I 3... —

†**JUNCIFOLIUS** (The Miniature Rush-leaved Daffodil) (4), xxx, a charming and elegant little species for pots or for select spots on rockwork; it has small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, ht. 3 to 4 in., flowers delicately fragrant, a native of the Pyrenees, Collected bulbs per 100, 6/6 I 0... —

†**MACLEAYI** (*Panza bicolor* and *Diomedes minor*) (4), xx, flowers small, solid white perianth, yellow goblet-shaped cup, a characteristic little Daffodil, ht. 4 in., per 100, 25/- 3 6...0 4

†**SEROTINUS** (5), a rare little Narcissus, producing in October, on slender stems, little star-shaped flowers with silvery white perianth and a minute golden-yellow cup, sometimes two to three flowers on a stem, fragrant, ht. 10 in. It requires a warm spot on rockwork and to be lightly covered during winter; it may also be grown in pots in a cold frameper 100, 12/6 I 9...0 2

§†**TENUIOR** (the Slender Straw-coloured Daffodil) (4), xx, perianth sulphury white, cup yellow, several flowers on a stem, ht. 9 in.per 100, 21/- 3 0...0 4

VIRIDIFLORUS, the Green Narcissus, a rare species, native of Morocco and the Gibraltar Rock, bearing in November on a tall slender stem two to four little star-shaped green flowers which are deliciously fragrant — ...4 6

FOUR INTERESTING BOOKS ON THE DAFFODIL.

John Parkinson's "*Paradisi in Sole Paradisus Terrestris*," or A Garden of all sorts of pleasant flowers which our English ayre will permitt to be noursed up: with A Kitchen garden of all manner of herbes, rootes, & fruites, for meate or sause used with us, and An Orchard of all sorte of fruitbearing Trees and Shrubbes fit for our Land together With the right orderinge, planting & preserving of them and their uses & vertues, Collected by John Parkinson, Apothecary of London, 1629." Faithfully reprinted from the Edition of 1629; a delightfully written, interesting old book. £3 3s.

The Book of the Daffodil (by Rev. S. E. Bourne), containing valuable information on the cultivation of the Daffodil gained by the results of the author's own personal experience, 2/6; post free, 2/9.

Daffodils (by Rev. Joseph Jacob), a well-got-up useful book on the Daffodil, with 8 coloured plates, 1/6; post free, 1/9.

Narcissus, its History and Culture (by F. W. Burbidge), with coloured figures of species and varieties, and a review of the classification by J. G. Baker, F.L.S., with 48 coloured plates. £1 10s.

DAFFODIL SEED FOR AUTUMN SOWING.

With the exception of some of the miniature Daffodils, like *Triandrus*, *Bulbocodiums*, etc., *Narcissi* take 7 to 10 years to bloom from time of sowing the seed.

- Choicest Yellow Trumpet Daffodils in Mixture**, saved from *Hamlet*, *Isolde*, *King Alfred*, *Lord Roberts*, etc.per pkt. 3/6 & 5/6
- Choicest Bicolor Trumpet Daffodils in Mixture**, saved from *Calpurnia*, *Wear-dale Perfection*, *Duke of Bedford*, *Cygnets*, *Gwendalin*, etc.per pkt. 3/6 & 5/6
- Choicest White Trumpet Daffodils in Mixture**, saved from *Alice Knights*, *Lady Audrey*, *Madame de Graaff*, etc.per pkt. 3/6 & 5/6
- Choicest Chalice-cups in Mixture**, saved from good *Incomparabilis*, *Barrii* and *Leedsii Varieties*.....per pkt. 3/6
- Choicest Poet's in Mixture**, saved from several good varietiesper pkt. 2/6
- Polyanthus Narcissi**, saved from best named sorts .. per pkt. 1s. & 2/6
- Miniature Daffodils**, flowering soon from seed, all beautiful on rockwork :
Bulbocodium conspicuum and **miniature early yellow** ; **Triandrus albus**, **Triandrus calathinus** and **Juncifolius**each variety 1s. per packet.

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter (Regd. 548091), specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been

Rd. 548091.

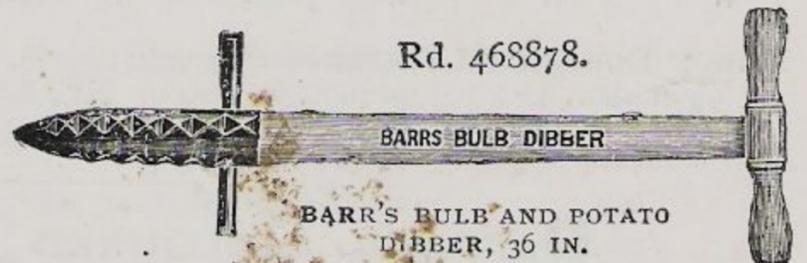

BARR'S BULB PLANTER.

put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early autumn rains and not when in a hard and baked condition, as it is then impossible to use this or indeed any other tool with success. By the use of BARR'S SPECIAL BULB PLANTER a large quantity of bulbs may

be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup :—To cut out a circular hole 2, 2¼, or 2½ inches diameter, each 10/6. We shall send the medium size (2¼ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber (Regd. 468878), specially designed for dibbling bulbs into borders, etc. ; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6¾ lbs., length 36 inches over all. 9/6 each.

Rd. 468878.

BARR'S BULB AND POTATO DIBBER, 36 IN.

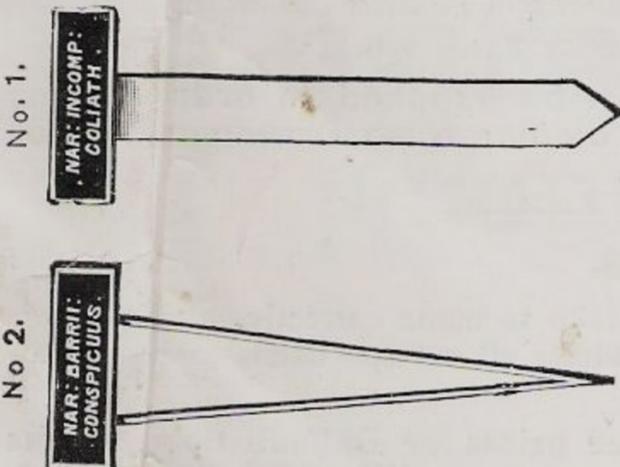

Barr's Special Bulb Trowel, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

New Pattern Daffodil Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Daffodils are just showing ; also a useful weeding tool. With 3 ft. handle (41 inches over all, and weight under 1 lb.) 1/9 each, with short handle (12½ inches), 1/3 each.

Hybridising Tweezers, specially made for easily removing pollen from Daffodil flowers, per pair, 2s. 6d.

BARR'S SPECIAL METAL LABELS FOR DAFFODILS, Etc. (With Raised Letters.)

No. 1, with solid metal shank, about 9 inches long. We specially recommend this for beds and borders. 4d. each.

No. 2, with stout wire stem, 6 or 9 inches long : specially suitable for pots, etc. (in ordering please state whether a short or long shank is required). 3d. each.

Ditto, with 12-inch stem, 4d. each.

No. 3, for Suspending, 3d. each.

The above prices include the stamping of any name required. These special metal labels are not kept in stock, being made only to order. The time taken to execute an order is generally from 2 to 3 weeks.

For Wooden Labels and other Garden Requisites, see BARR'S SEED GUIDE. Free on application.

MANURES, SOILS, FIBRE, VASES & BOWLS FOR DAFFODILS.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots**, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-.

Basic Slag, per cwt. 6/6; per 14 lb. 1/-.

Bone Meal (*Genuine Fine Crushed Bones*), best quality, per cwt. 12/6; per 7 lbs. 1/-.

Sulphate of Potash, per cwt. 21/-; per 7 lbs. 1/9.

Barr's Specially Mixed Potting Soil, containing a suitable quantity of *Phytobroma*, 2/6 per bushel (*bags free*).

Barr's Fertilised Fibre, Shell, and Charcoal Mixture, ready mixed for use, a specially prepared mixture suitable for growing bulbs in vases, bowls, jardinets, etc. (*see page 4*). 3/6 per bushel; 1/- per peck (*bags free*).

Small Pebbles and Charcoal, 6d. per quart; 3/6 per peck.

Charcoal (*fine twig*), per peck 1/-; per bushel 3/6.

Cocoa Fibre for plunging pots and covering beds in winter, per bushel, 1/3; 3 bushels for 3/6 (*bags free and full measure guaranteed*).

Special Fancy Vases and Bowls for growing Daffodils, etc., in.

We have had special little fancy vases made for us by Messrs. Doulton for growing Daffodils and other spring bulbs in our Fertilised Fibre and Charcoal Mixture. The vases are of elegant shape, of neutral art green and drab shades, and without drainage holes, thus saving the use of saucers. They will be found most useful for growing not only Daffodils in, but also Tulips, Hyacinths, Crocuses, early Scillas, Snowdrops, Chionodoxas, and Lily of the Valley, also the charming winter-flowering Irises—*reticulata*, etc., either for table decoration or the greenhouse. During summer these bowls are very useful for holding cut flowers, etc. All Daffodils which may be grown in pots may also be grown in these fancy bowls, and in the foregoing pages we have indicated thus † those kinds most suitable for the purpose.

Barr's "Doulton-Ware" Bulb Vases, unglazed, neutral drab shade, 2½ in. dia., -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.

" " " " " glazed dark green, 2½ in. dia., -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.

Fancy Decorated Japanese Bowls:—5 in. dia., -/10; 6 in. dia., 1/3; 7 in. dia., 1/9; 8½ in. dia., 3/-; 9½ in. dia., 4/-; 10¾ in. dia., 6/-; 12 in. dia., 8/6 each.

Illustrated List of Vases and Bowls for Bulb Culture sent on application.

DAFFODIL COLOURED AND UNCOLOURED PLATES.

These Daffodil Plates can be had, post free, at the following charges:—

- (1) Two large Uncoloured Illustrations, one representing a group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, *drawn and arranged for the "Gardener's Chronicle" by Agnes Barr*. The two Plates for 1s.
- (2) Coloured Plate of a group of Daffodils, including *Cernuus pulcher*, *Johnstoni Queen of Spain*, *Bicolor J. B. M. Camm*, *Leedsii*, and *Nelsoni varieties*, etc. 6d.
- (3) Coloured Plate of a group of Daffodils, including *Barrii conspicuus*, *Triandrus albus*, *Leedsii Mrs. Langtry*, *Bicolor J. B. M. Camm*, *Johnstoni Queen of Spain*, *Cyclamineus*, and *Minimus*. 6d.
- (4) Coloured Plate of a group of Daffodil *Queen of Spain*. 3d.
- (5) Coloured Plate of Daffodil *Incomparabilis Sir Watkin*. 3d.
- (6) Coloured Plate of Daffodils *Madame de Graaff* and *Apricot*. 6d.
- (7) Coloured Plate of Daffodils *Weardale Perfection*, *Monarch*, and *Lulworth*. 3d.
- (8) Coloured Plate of Daffodils *Barrii Conspicuus*, *Glory of Leiden*, *Queen of Spain*, *Victoria*. 3d.
- (9) Coloured Plate of Daffodils *Peter Barr*, *Weardale Perfection*, and *Monarch*. 3d.
- (10) Coloured Plate of Hoop Petticoat Daffodils *Bulbocodium citrinum* and *Bulbocodium conspicuum*. 3d.
- (11) Coloured Plate of Daffodils *Peach*, *Maggie May*, *Gloria Mundi* and *Poeticus Cassandra*. 3d.

A COMPLETE SET OF THE ABOVE PLATES SENT, POST PAID, FOR 4s.

☞ Good Water-colour Paintings of any Daffodils can be supplied (to order) during the Daffodil flowering season at the rate of 10s. 6d. per bloom; Wash Drawings in black and white, 7s. 6d. per bloom. *Orders should be given early.*

DAFFODIL NOTICES.

Naming Daffodils.—Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 3s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Taplow, Bucks.

Daffodil Prizes.—We award Silver Cups, Vases and other prizes for Daffodil Competitions in various parts of the British Isles and Colonies. Particulars of Competitions for Spring 1912, for Barr's Silver Daffodil Vases, will be sent on application.
