Bicolor Incomparabilis

Division 2b. Varieties with white or whitish perianth, and self-yellow, red-stained or red crown.

✓ **Whitewell.** Outstanding and of great individuality with smooth white perianth and expanded chrome-orange crown, prettily frilled. A large flower, of fine form. Doz., \$1.00.

The daffodils listed represent surplus from a collection of rare and unusual Narcissi, together with standard sorts.

Exceptional opportunity is thus afforded the collector in choosing from a host of desirable varieties. All have withstood the test of experienced selection.

Only the finest grade of bulbs is sent out. Rhodeen stocks have established a reputation for quality and hardihood and are *free from disease*.

State Inspection is rigidly observed, but the best guarantee of security is our own personal supervision at all times.

Planting may be started after the foliage ripens in June and continued until the ground freezes. September is a favoured planting time as the bulbs make their root growth in early Fall.

Order Early: Most stocks are limited.

Terms of Sale: Cash with order.
