1994 RELEASES FROM BROGDEN BULBS

- 2w.w DEEP WATER (LM) X81/G7. 100. 45. 34. 600.
This Easter Moon x Empress of Ireland seedling is very strong, large and has long stems. The plane perianth is broad, shovel shaped, well overlapped and a clean white. The funnel shaped corona is narrow at the base, flared, with a crenate edge and is white with a greenish tinge. Has a nice green throat. Excellent poise, strong plant.
\$15.00 each.
- 2w.y EGMONT PRINCESS (M) X57/C. 112. 48. 25. 550.
Breeding Hostage x Bandit. A large, bold flower that is a consistent producer of show quality blooms. The very broad, ovate perianth is smooth and plane, while the well proportioned, large deep bowl corona is evenly lobed. On opening the corona is mid yellow but gradually fades to pale yellow with a lovely lime-yellow band on the edge. The flowers are well poised on strong stems. Premier 2w.y NDS Nishow (Palmerston North) 1992.
\$25.00 each
- 4y.y LOVEIT (L) R2/6. 115. 50. -- 400.
This very beautiful flower opens a distinct white and yellow but after 2 or 3 days colours to an even mid-lemon throughout. The perianth is very smooth, round and well overlapped. May not be full enough for showing but has won premier awards. Bred Double Event x Lemonade.
\$15.00 each
- 3w.w SURFER GIRL (LM) X72/2. 95. 43. 12. 600.
Consistency, poise and stem length make this Sea Dream x Verona seedling a most useful show flower. Medium to large in size with very broad ovate perianth and a small bowl corona that is crimped and has a crenate edge. On opening the corona has some yellow colour but this soon fades to white. The perianth is a clean white. A neat flower that is always smooth and plane. Premier 3w.w NDS SI show (Christchurch) 1982.
\$25.00 each. 7
- 3y.r STARDOM (LM) X92/2. 92. 40. 12. 600.
Very neat, very consistent and very good form. This medium sized flower is bred from Kiwi Invader x Achduart has a broad ovate, very smooth and plane perianth of clean mid-yellow. The bright orange-red, deep saucer corona is lightly lobed with a fine crenate edge. Blooms are held in excellent poise by a strong short neck on a strong stem and plant.
\$30.00 each.

1992 RELEASES FROM BROGDEN BULBS.

2y.r FOCUS (E) X107/7. 105. 44. 25. 600.
An outstanding show flower with brilliant colour of very
show bright deep yellow and solid deep red, that stands out in
any company. With strong substance that holds the broad
acute, smooth perianth plane until the flower fades, and a
well balanced, slightly flared cup shaped corona, FOCUS is
a 'must have' for early shows. The strong, longish neck holds
the bloom in very good poise on long, strong stems. Free
flowering, a good increaser and stands the sun well. Bred
from Torridon x Jetsetter. Premier 2y.r N.D.S. N.I show
(Lower Hutt) 1990.
~~\$35.00 each.~~

3w.y NEW LIFE (E) X52/A. 100. 45. 12. 550.
An older variety that has had Premiers at National shows
while under number. Bred from Verona x Motif, New life is
consistant and valuable due to it's early season for a 3w.
3w.y. The broad ovate perianth is very smooth, of thick
texture and plane (but does reflex slightly with age). The
flat disc corona is ribbed, has a wavy, crenate mouth and is
of a lighth greenish yellow. Corona colour fades after
maturity to near white with a yellow rim. Excellent poise
on sturdy stems.
~~\$35.00 each.~~

3w.w RUNITA (LM) X52/1. 90. 40. 11. 450.
A medium to large sized flower bred from Easter Moon x
Verona. that is a consistent producer of show blooms. A
round flower with smooth, plane perianth and a small disc
corona. T whole flower opens and stays white. Very good
poise on strong stem.
~~\$20.00 each.~~

FIGURES FOLLOWING THE SEEDLING NUMBER ARE FOR -

Flower width. Perianth length. Corona length. Stem length.

1991 RELEASES FROM BROGDEN BULBS

2y.y EGMONT GOLD (M) X74/1. 105. 43. 37. 550.
Has the vigor and strong plant habits of it's parents Gold
Bank x Daydream, and is consistantly good year after year.
Reg. The broad ovate perianth is smooth, plane and of great sub-
stance and texyure. The 7/8th length funnel shaped corona
is flared, has a slight roll and a crenate rim. The whole
flower is deep golden yellow throughout.

1991 RELEASES CONTINUED

- 2y.w GALAXY PRINCE (EM) X74/G4. 110. 47. 37. 550.
Another Gold Bank x Daydream seedling but is different from the other reverse bicolours we have named. A very healthy plant with the large flowers well poised on stout stems. The deep 'Daydream' yellow perianth is long, broad and pointed, is very smooth and has a slight twist. The wide, straight, cup shaped corona is very white, has a light roll and a slightly crenate rim
- Reg.
- 2w.w ICE HOUSE (E) X91/2. 110. 47. 42. 550.
With its breeding of Guiding Light x an Empress of Ireland x Canisp seedling, one can understand why it has this name. A superb flower that has very smooth, flat, very broad, triangular perianth, and a straight cylindrical corona with a lightly dentate rim. Long, strong stem and neck. Has been regularly shown (under number) in our NDS Raisers entries. Only a few to go.
- Reg.
- 2w.wwy ON CALL (M) X93/9. 103. 42. 28. 600.
A very reliable variety that is a most useful collection filler. The blunt, broad ovate perianth is very smooth and white. Opening light yellow, the wide, cup shaped corona fades to white with a broad band of light yellow on the slightly crenate rim. Bred from Guiding Light x Bandit. Has very broad, erect foliage and strong, long stems.
- Reg.
- 2w.y ON TARGET (LM) X96/3. 105. 45. 17. 550.
This Top Model x Bandit seedling has been given a star each year in our seedling record books. The strong, large blooms are consistantly of top show form. The very broad, round, smooth, very flat, white perianth has wonderful substance and great lasting quality. The wide, shallow bowl corona is lobed, has a smooth rim and is coloured light limey yellow. Only a few left for 1991.
- Reg.
- 1w.w TOPSPOT (M) X91/5. 95. 40. 40. 450.
A medium sized flower from Guiding Light x (Empress of Ireland x Canisp) that like its sister, Ice House, has all the form for a top show variety. The very smooth and flat triangular perianth forms a double triangle backing for the narrow, gently expanding trumpet that has a flared and fine dentate rim. The whole flower is a clean white throughout. Good plant and poise. Medium length stems. Not many to go.
- Reg.
- 2w.w WHITE FROSTING (E) X93/1. 100. 43. 22. 600.
Quite different from what one would expect from Guiding Light x Bandit, - a very white, rather stary shaped flower with a short, cup shaped corona. The narrow, pointed perianth is very smooth and always flat, while the straight, smooth edged corona opens very light lemon but quickly fades to white. A 100% flower = always good. Excellent poise on long, strong stems.

PREVIOUS RELEASES FROM BROGDEN BULBS

- 2w.p AIMEE JOY (EM) X95/4. Bred from Melanie (Caro Nome x Debutante) x Dear Me. Quite early flowering for a top show quality pink. Has strong substance and good texture in the very round, flat, white perianth. The wide bowl shaped corona has a serrated edge and is a beautiful shade of deep pink. In some conditions an odd white fleck shows on the corona edge. Medium to long stem with a strong neck.
- Reg.
- 2y.p CAPREE ELIZABETH (M) 142/2 . Bred from Daydream x a Salmon Trout x Vision seedling. A good sized flower with quite broad, pointed perianth that is very smooth, flat and of a 'Daydream' yellow. The seven-eighth length corona is vase shaped with a neat serrated edge and is a deep rosy pink. Once the flower is fully developed and matured the corona colour gradually fades. An eye catching show flower on a strong plant. The first 2y.p to be awarded a Premier at a NDS show (Lower Hutt) NI 1987.
- Reg.
- 2y.yor EGMONT KING (EM) X95/2. A large flower from Orator x Loch Hope that impresses with its boldness. Has been shown successfully since its first flowering in 1983 when it was Premier Seedling and Premier 2y.r at NDS NI show (Waitara). 1989 saw it Premier 2y.r at NDS NI show (Hawera). The long, broad pointed perianth is mid-yellow and makes a great backing for the slightly expanded, straightish corona of orange that deepens to red on the serrated edge. Tall stems, strong plant and excellent bulbs.
- Reg.
- 2w.wwp FAIRY CHARM (EM) X89/9. A medium sized, high quality, pink not predominate show flower. Purest white, shovel shaped perianth is very smooth and flat. The short, wide, cup shaped corona is white with a pink pencil rim on the very neat edge. Good poise, long stems and excellent plant. Previously listed as WHISPER.
- Reg.
- 2w.w FLORENCE JOY (EM) X88/1. This Guiding Light x a Verona seedling has been a most consistent (and sort after) show variety for several years. The very broad, triangular perianth segments are well overlapped, very smooth and flat, of excellent substance and texture. The half length, straight corona has a lightly serrated edge and is very well balanced with the perianth. After a few days the whole flower is an even milky white. The flowers have excellent poise on strong stem and plant. Show successes include Premier 2w.w NDS NI show 1989 at Hawera.

- 2y.y GOLD KIWI (M) X53/E. Quite a large show flower with very thick, smooth texture and intense colour. The flat, slightly rounded, shovel shaped perianth is deep golden yellow. The large 3/4 length corona is straight with a neatly flared edge, and is of the same colour as the perianth. Premier 2y.y NDS SI (Dunedin) 1988. Previously listed as 24 CARAT.
- 2w.p GOOD NEWS (E) NT48. An excellent large show pink that is ideal for the first shows. Very broad, white, triangular perianth and a neat five-eighth length, vase shaped corona of soft pink, deeper at the edge. Long stems and good plant.
- 3w.y GREEN BERET (M) X72/G4. A medium sized flower that is a most consistent show flower. The broad, round, smooth perianth is slightly cupped at the edge, clear white and of excellent substance. The small, saucer shaped corona is a yellowish green. A very neat flower on a strong, medium length stem and plant.
- 2y.r KIWI GOSSIP(E) X87/6. Highly coloured, excellent show form and early flowering. The long, rather pointed perianth is bright golden yellow, very smooth, flat and of great texture. The solid red, wide cup shaped corona is well serrated. Takes 3-4 days for colour to develop. Tall stem with long but strong neck. Premier NDS NI show (Pukekohe) 1980.
- 2y.y KIWI MOON (M) NT 41. Unexpected colour from Favourelle x Loch Hope. Mid-yellow perianth with a slightly deeper corona that shows a touch of orange when the flower ages. Reg. Each petal is very broad and round, and, being nearly fully overlapped, forms a near circular back to the straightish, wide, half length corona. A large smooth flower that can be ribby on very large blooms. A good seed parent for broad perianth 2y.r's. Very strong plant. Previously listed as FULL MOON.
- 2y.yyr KIWI SPARK (EM) 90/6. The unusually shaped perianth is very broad but cuts back to be narrow at the base, yet it forms a large, smooth, plane background to a neat, straightish, half length cup. Perianth colour is clear mid-yellow. The corona is distinctly coloured, half the same as the perianth and a bright red for the outer half. Excellent poise and plant. Previously listed as BRIGHT SPARK.

2y.r RED ALERT (M) X78/11. This Orator x Loch Hope seedling has consistency and colour as its strong points. Of good size, broad, rounded, golden yellow perianth and a large goblet like corona of fiery orange red. Good poise, stem and plant. Premier 2y.r at the 3rd World Convention 1984 (Hamilton). Premier 2y.r and Champion Bloom (grown by Alf Chappell) NDS SI show (Dunedin) 1987.

2y.r SABRE (E) 85/9. Another early flowering, high coloured show flower that is very large. The rounded, very broad perianth is flat, smooth and of great substance and texture. The large well balanced corona is cup shaped and lightly serrated. The deep yellow, and deep orange-red flowers are held on long strong stems on a vigorous plant. Premier 2y.r NDS NI show (Pukekohe) 1986.

2w.w SILVER LINING (ML) P83/6. A wonderful, large pure white that has a silver sheen. The fully round perianth segments are very smooth, slightly cupped at the edges and thick textured. The shallow bowl corona is crimped and has a serrated edge. Very impressive on tall stems and a very strong plant. Has many premier and champion bloom awards to its credit. Was included in three of our winning exhibits at Tasvention 1988.

2y.r SOME DAY (EM) X97/2. An Orator x Torridon seedling. A magnificent show flower with excellent form, colour and plant habits. The well overlapping, broad, slightly pointed perianth is very smooth, flat and of excellent substance and texture. The neatly serrated, goblet shaped corona is very well balanced with the perianth. The corona colour is uniform deep red to the base, while the perianth is an even, deep yellow with a touch of gold. Excellent poise, stem and strong plant. Judged Premier 2y.r, Premier Seedling and Champion Bloom at the 4th World Convention (Hobart) 1988.

2y.w STAR TRACKER (ML) X74/G11. Soft, clean colouring of creamy yellow with a very white corona, and the long triangular perianth makes STAR TRACKER distinct in it's class. The perianth is smooth, plane and of good texture while the 5/8 cup is nicely crenate. Excellent poise, medium stems and good plant. Premier 2y.w Hamilton 1990.

2y.wyp TWILIGHT ZONE (EM) X74/G22. Another Daydream x Gold-Bank seedling that is extremely consistent in producing large, smooth, show blooms. The perianth that is long, broad and flat, opens 'Daydream' yellow that deepens to mature with a white halo at the base. The neat five-eighth length, cup shaped corona opens lemon, changes to white at the base and shades to a yellow with a slight pink tinge on the edge. Very long stems, healthy plant and excellent bulbs. Gold Ribbon winner Indiana State Show 1989. Gold Ribbon winner at American Daffodil Society's 1990 Convention.
