INTRODUCTION

To all Daffodil fanciers,

In presenting this descriptive catalogue we have opted for it to cover 1997 and 1998 bulb seasons. It will not be posted to you again unless requested.

About this time next year, a 1998 update of new releases will be posted to you if this one was.

We have listed only five new releases for ~~1997~~ from Brogden Bulbs. They are proven high quality varieties and have had extensive trials.

We regret that we cannot repeat the Special Collections that were offered last year as stock numbers are too low this year.

We thank our clientele and trust to merit your continued support.

Spud & Joy Brogden

GLOSSARY & ABBREVIATIONS

Flowering season in brackets: (E) Early (M) Mid Season (L) Late

CLASSIFICATION is followed by NAME, SEASON, SEEDLING NUMBER and a set of four numbers for flower width, perianth length, corona length and stem length.

N.A.	=	None available this season
N.D.S.	=	National Daffodil Society of New Zealand
N.I.	=	North Island
S.I.	=	South Island
GOLD RIBBON	=	In the U.S.A. the champion of show receives a gold ribbon.

SECTION ONE

1997 RELEASES - BRED & RAISED BY BRODEN BULBS

2y.r. CLASSIC TOUCH (E) 110. 45. 21. 500.

This cross of Trudie May x Torridon has produced several show quality seedlings. With very strong plant, stem and neck the large blooms are held in excellent poise. Perianth is broadly ovate, very smooth and absolutely plane. The goblet shaped corona has a finely serrated and crenate edged and is a solid mid red. A very consistent, well balanced show flower.

2w.r. HILITE (EM)T31 100. 43. 15. 600.

The pure white, shovel shaped perianth is smooth and thick textured. The wide, flatish corona is evenly serrated and of a deep, fiery orange red. Good poise on tall, strong stems. Has had premier awards at N.D.S. shows. Good white/red breeding of Rockall x Gauntlet.

4y.y. SMASH HIT (E) 141/2 97 - - 450

Bred from a Papua x Camelot seedling - open pollinated. This flower has the broad perianth of Camelot and the smoothness of Papua. A very clean coloured light yellow with a slightly deeper centre. Perianth is super smooth and very plane. The very round blooms are held in perfect poise on strong, thick stems. Very consistent and a robust plant.

2yyw.wwy TURNING POINT (E) 354/P5 110. 46. 38. 450

As well as being an excellent show flower 'Turning Point' has beauty and strong plant habits that will make it a great garden variety. The broad, smooth, pointed perianth is always plane, and is coloured mid sulphur yellow and has a lovely halo.. The cylinder corona is flared at the mouth and has a neat crenate edge. The corona soon fades to white with a sulphur band on the edge. A very consistent flower that was bred from Star Tracker x a Fred Silcox seedling. Only a few for sale this season.

2y.y WINNINGWAY (LM) 137/8

This outstanding show flower has been shown only 3 times at N.D.S. shows where it has twice been Champion Bloom VIZ Lower Hutt 1987 and Timaru 1991. Has superb form, balance and poise. The very broad, shovel shaped perianth is plane, silken smooth and is a clean coloured midyellow. The deeper yellow corona is a 3/4 length cylinder with a smooth edged half roll. Bred from Thunderbird x 53/G (Iberia x Gold Bank). A slow increaser so only 1 or 2 to go each year. Photo in 1988 N.D.S. annual.

1996 RELEASES - BRED & RAISED BY BROGDEN BULBS

2w.r CARLA MAREE (M) x941 105. 45. 20. 650

This Sweet Luck x Bandit seedling is another from a cross that has given several great show quality flowers. Strong plant, stem and neck together with excellent poise of the large bold flowers makes this a must in any collection. The very broad rounded perianth is plane, smooth and of a clean white. The bowl shaped corona has a smooth edge and is of an unusual light orange red. Always neat and very consistent.

4y.o CRINKLE CUT (L) 137/1

Different from other doubles with all of its petals being crimped around the edges. Of medium size, on a long, strong stem and excellent poise. Colour is mid yellow with orange centre petals. Great for garden and cut flower uses.

2w.w FIRST SNOW (E) 263/3 105. 45. 43. 450.

This clean white is a valuable show flower due to its consistency in producing show blooms and it is earlier than most whites. The long pointed perianth has good overlap and is always smooth and plane. The long cylinder corona is lightly flanged at the mouth. Good plant habits and poise. Bred from Guiding Light x Silver Convention.

2y.r IF ONLY (M) x107/8 105. 46. 23. 650

No matter how good a variety is there is always someone who will say "If only it was" bigger or better coloured etc. etc. Bred from the successful cross of Torridon x Jetsetter that has given FOCUS and others yet to be named. The perianth is broadly ovate, plane and of a deep rich yellow, while the cup shaped corona of a solid orange-red has a fine crenate rim. A show flower that is strong in all departments.

11 w.y TRUMP (EM) 135/4

Our first split corona release is bred from Bandit x Colblanc. A useful show variety but is recommended for garden decoration. A very strong grower that opens with white perianth and a deep green-yellow split corona that fades to near white with age. A large flower with excellent poise.

2y.r WEE ONE (ML) 115/1

Bred Orator x Salute. A model of consistency but is too small for release as a show flower and just too large for an intermediate. Mid yellow and orange-red, Wee One is ideal for garden and cut flower uses. Strong stems hold the round smooth, slightly reflexing perianth and small, short cup shaped corona in excellent poise. Strong healthy plant. Several of these together look great so we offer 4 for the price of 3.

SECTION TWO

FIRST TIME LISTINGS - FROM OTHER RAISERS

3w.y **EVESHAM** **(M)**

An outstanding show flower that has won many major awards in U.K. Performs very well here and is my pick for best 3w.y. Very white with a small citron yellow corona. A John Lea introduction.

2y.r **REDLANDSTOO** **(E)**

This Radcliff release is a very large very strong growing and of consistent show quality. The perianth is very broad, smooth and in deep yellow. The red, wide expanding 1/2 length corona is well balanced. A slow increaser so only a few for sale.

2y.y **SPECIAL ENVOY** **(E)**

This Lea release is very smooth and of good show form. The perianth and the near trumpet length corona are of the same deep yellow.

BROGDEN BULBS

Our logo shows our provincial Mount Egmont,
the nearby Hawera Water Tower, and
the mighty Daffodil.

SECTION THREE

EXHIBITION VARIETIES

This section contains only the best for showing. A number of older, but still good, show varieties are now listed in Section Four.

* Denotes raised by Brogden Bulbs

* **2w.p** **AIMEE JOY** **(EM)** **X95/4**

Bred from Melanie (Caro Nome x Debutante) x Dear Me. Quite early flowering for a top show quality pink. Has strong substance and good texture in the very round, flat, white perianth. The wide bowl shaped corona has a serrated edge and is a beautiful shade of deep pink. In some conditions an odd white fleck shows on the corona edge. Medium to long stem with a strong neck. Premier 2w.p N.D.S. N.I. Show (New Plymouth) 1995 shown by Bruce Hughes.

* **2w.yyo** **BANDIT** **(M)**

The clean white, near perfect perianth is very broad, smooth, flat and of the best substance and texture. The well balanced, wide bowl corona is of mid yellow with a broad band of orange and gold. A top show flower with many N.D.S. and local champion awards to its credit. A top breeder with very good plant habits.

* **2y.p** **CAPREE ELIZABETH** **(M)** **142/2**

Bred from Daydream x a Salmon Trout x Vision seedling. A good sized flower with quite broad, pointed perianth that is very smooth, flat and of a 'Daydream' yellow. The seven-eighth length corona is vase shaped with a neat serrated edge and is a deep rosy pink. Once the flower is fully developed and matured the corona colour gradually fades. An eye catching show flower on a strong plant. The first 2y.p to be awarded a Premier at a N.D.S. show (Lower Hutt) N.I. 1987. N.D.S. Premiers again in 1992 at Dunedin.

* **3w.yyr** **CENTERFOLD** **(EM)** **X46/2**

Apart from its superb shape and form, Centrefold is valued for its size and early flowering for this division. The pure white perianth is broad, rounded, smooth and plane. A deep saucer corona with a deep crenate rim, is light to mid yellow with a distinct band of red. Good, strong plant and stems hold the flowers in perfect poise. Many local and N.D.S. premiers to its credit. First Class Certificate 1992. Bred Polar Imp x Bandit.

2w.w **CULTURED PEARL** **(L)**

This medium sized flower is smooth, flat and of great quality. The creamy corona soon changes to give beautiful self-white flower. Tall strong stems. Bred by Clive Postles.

*** 2w.wwy COUNTDOWN (M) X46/21**

Has taken several premier awards at N.D.S Shows. With the same breeding as Centrefold (Polar Imp x Bandit) and the same high quality, Countdown is a must for the exhibitor. Very broadly ovate, smooth, plane perianth is of thick, white texture. The well proportioned bowl corona opens light yellow and develops to near white with a wide band of strong lemon yellow on the edge. Strong plant and stems with ideal poise.

*** 2w.w DEEP WATER (LM) X81/GT 100. 45. 34. 600.**

This Easter Moon x Empress of Ireland seedling is very strong, large and has long stems. The plane perianth is broad, shovel shaped, well overlapped and a clean white. The funnel shaped corona is narrow at the base, flared, with a crenate edge and is white with a greenish tinge. Has a nice green throat. Excellent poise, strong plant.

*** 2y.r DYNASTY (M) X74/8**

A round flower with near fully overlapping, smooth, mid golden perianth that cups slightly at edges. The deep bowl corona is deeply (but neatly) serrated and is of brick red. A strong flower that is 'different' from others of this type. Excellent plant habits. Premier seedling, 2y.r and Champion Bloom N.D.S. N.I. Show (Howick) 1987.

*** 2w.yyo EGMONT CHARM (E) X95/12**

We have always considered this Conquest x Bandit seedling as the best 'flat cupped' show variety. Near fully overlapped perianth is smooth and plane. The yellow and orange edged corona is of flat, wide bowl shape. Excellent poise, stem and plant health. Has form and beauty - hence its name. Premier 2w.r N.D.S. N.I. Show (Howick) 1993.

*** 2y.yor EGMONT KING (EM) X95/2**

A large flower from Orator x Loch Hope that impresses with its boldness. Has been shown successfully since its first flowering in 1983 when it was Premier Seedling and Premier 2y.r at N.D.S. N.I. Show (Waitara). 1989 saw it Premier 2y.r at N.D.S. N.I. Show (Hawera). The long, broad pointed perianth is mid-yellow and makes a great backing for the slightly expanded, straightish corona of orange that deepens to red on the serrated edge. Tall stems, strong plant and excellent bulbs. N.D.S. Premier 2y.r and Champion Bloom N.I. (Wanganui) 1994-both won by Koanga Daffodils.

*** 2w.y EGMONT PRINCESS (M) X57/C 112. 48. 25. 550.**

Breeding Hostage x Bandit. A large, bold flower that is a consistent producer of show quality blooms. The very broad, ovate perianth is smooth and plane, while the well proportioned, large deep bowl corona is evenly lobed. On opening the corona is mid yellow but gradually fades to pale yellow with a lovely lime-yellow band on the edge. The flowers are well poised on strong stems. Premier 2w.y N.D.S. N.I. Show (Palmerston North) 1992.

*** 2w.w FLORENCE JOY (EM) X88/1**

This Guiding Light x a Verona seedling has been a most consistent (and sort after) show variety for several years. The very broad, triangular perianth segments are well overlapped, very smooth and flat, of excellent substance and texture. The half length, straight corona has a lightly serrated edge and is very well balanced with the perianth. After a few days the whole flower is an even milky white. The flowers have excellent poise on strong stem and plant. Show successes include Premier 2w.w N.D.S. N.I. Show 1989 at Hawera. Premier in Tasmania 1993. Champion Bloom N.D.S. S.I. Show (Timaru) 1995, shown by Greg Inwood.

*** 2y.r FOCUS (E) X107/7 105. 44. 25. 800.**

An Outstanding show flower with brilliant colour of very deep yellow and solid deep red, that stands out in any company. With strong substance that holds the broad acute, smooth perianth plane until the flower fades, and a well balanced, slightly flared cup shaped corona, FOCUS is a 'must have' for early shows. The strong, longish neck holds the bloom in very good poise on long, strong stems. Free flowering, a good increaser and stands the sun well. Bred from Torridon x Jetsetter. Premier 2y.r N.D.S. N.I. Show (Morrinsville) 1990.

2w.p FRAGRANT ROSE (VL)

Quite distinct with a delightful fragrance. Excellent show form with thick waxy white perianth that is smooth and flat. The vivid pink, goblet corona is half length. Many show awards.

*** 3w.yyr GLAMOUR GIRL (LM)**

Of medium to large size with broad rounded, pure white perianth and a saucer shaped corona of yellow with a red rim. Excellent show flower with strong plant and stem. Champion Bloom N.D.S. N.I. (Wanganui) 1986. Premier 3w.r World Convention (Hobart) 1988 shown by Koanga Daffodils.

***2y.y GOLD CHARM (M)**

A tried and proven all yellow of fine show form. Healthy plant.

*** 2y.y GOLD SHAH (L)**

Bred from Gold Bank x Daydream with the form and colour of Gold Bank and the smoothness and refinement of Daydream. Very strong plant. Excellent for late shows.

*** 3w.y GREEN BERET (M) X72/G4**

A medium sized flower that is a most consistent show flower. The broad, round, smooth perianth is slightly cupped at the edge, clear white and of excellent substance. The small, saucer shaped corona is a yellowish green. A very neat flower on a strong, medium length stem and plant.

*** 2w.w GUIDING LIGHT (EM)**

A superb, pure white that produces a very high percentage of show flowers. The pointed perianth is plane while the corona is a three quarter length cylinder shape. Always neat on long stems. Many exhibitors have won champion awards with Guiding Light which was bred from Arctic Doric x Empress of Ireland.

*** 2w.wyo HAPPY SMILES (LM) X95/19**

A decorative flower that is offered as a garden plant rather than for showing. A very strong grower that produces blooms that appeal to all who want something different and showy. The perianth silvery white, shovel shaped and of stiff substance. The wide flatish bowl corona is of pale yellow and white with a broad band of orange-red at the edge. Bred Conquest x Bandit.

*** 2w.w ICE HOUSE (E) X91/2 110. 47. 42. 550**

With its breeding of Guiding Light x an Empress of Ireland x Canisp seedling, one can understand why it has this name. A superb flower that has very smooth, flat, very broad, triangular perianth, and a straight cylindrical corona with a lightly dentate rim. Long, strong stem and neck. Has been regularly shown (under number) in our N.D.S. Raisers entries.

*** 1w.w JET TRAIL (E) X19/7**

Produces excellent show flowers on a moderate length, but strong stem. The plane, white perianth forms a perfect triangle backing to the long slender trumpet that has slight flare at the mouth. Bred Salaam x Glendermott.

*** 3y.r KIWI INVADER (L)**

An older variety that is throwing its vivid corona colour to its seedlings. The smooth perianth is a clean light yellow. Corona is flat disc shaped of deep red. Long stems. Bred from Mirren x Orator.

*** 3w.o KIWI RULER (M) X94/4**

Bred from Sweet Luck x Bandit this large flower has very smooth, very broadly ovate perianth that has the whiteness of Sweet Luck and the form of Bandit. The small bowl corona is an even shade of reddish orange and it easily measures division 3. Long, strong stems and strong plant. A high quality show flower that has been one of our top seedlings since first flowering. A great future shines for Kiwi Ruler.

*** 3w.y LITTLE DOLL (L) X72/3**

Only small to medium sized but consistently produces blooms of very good show form. The broadly ovate white perianth is smooth and flat while the very small corona is light yellow. Very long strong stems hold the blooms in excellent poise. Bred from Sea Dream x Verona.

***4y.y** **LOVEIT** **(L) R2/6** **115. 50. - . 400.**

This very beautiful flower opens a distinct white and yellow but after 2 or 3 days colours to an even mid-lemon throughout. The perianth is very smooth, round and well overlapped. May not be full enough for showing, but has won premier awards. Bred Double Event x Lemonade.

*** 2y.w** **MOON DANCER** **(M) X74/G18**

A very strong, distinctly coloured reverse bicour. Long, broad perianth of deep yellow and a flared bowl corona that fades to pure white. Bred from Gold Bank x Daydream.

1w.w **MOUNTAIN DEW** **(M)**

Super smooth, glistening white of large size. The perianth is long and pointed and the trumpet is slender at the base to a flared mouth. Good plant and stem.

1w.w **NEAHKANNIE** **(EM)**

I consider this to be the best white trumpet from the U.S.A. Its broad, smooth perianth forms a broad back to the well proportioned, slightly rolled trumpet. Very good plant and poise.

*** 3w.y** **NEW HOPE** **(M) X71/1**

Large for this division. A very consistent show flower with an impressive record which includes 3 times N.D.S. premier and Reserve Champion at Canberra, 1992. The white perianth is very broad rounded, very smooth and flat. The shallow bowl corona of mid lemon yellow is lightly crimped with a fine crenate edge. Tall stem, strong plant. Bred from Motif x City Lights.

***3w.y** **NEW LIFE** **(E) X52/A** **100. 15. 12. 550.**

An older variety that has had Premiers at National shows while under number. Bred from Verona x Motif, New Life is consistent and valuable due to its early season for a 3w.y. The broad ovate perianth is very smooth, of thick texture and plane (but does reflex slightly with age). The flat disc corona is ribbed, has a wavy, crenate mouth and is of a light greenish yellow. Corona colour fades after maturity to near white with a yellow rim. Excellent poise on sturdy stems.

***2w.y** **ON TARGET** **(LM) X96/3** **105. 45. 17. 550.**

This Top Model x Bandit seedling has been given a star each year in our seedling record books. The strong, large blooms are consistently of top show form. The very broad, round, smooth, very flat, white perianth has wonderful substance and great lasting quality. The wide, shallow bowl corona is lobed, has a smooth rim and is coloured light limey yellow.

*** 2y.r RED ALERT (M) X78/11**

This Orator x Loch Hope seedling has consistency and colour as its strong points. Of good size, broad, rounded, golden yellow perianth and a large goblet like corona of fiery orange red. Good poise, stem and plant. Premier 2y.r at the 3rd World Convention 1984 (Hamilton). Premier 2y.r and Champion Bloom (grown by Alf Chappell) N.D.S. S.I. Show (Dunedin) 1987. Champion Bloom Palmerston North 1993 shown by John Hollever.

*** 3w.w RUNITA (LM) X52/1 90. 40. 11. 450.**

A medium to large sized flower bred from Easter Moon x Verona, that is a consistent producer of show blooms. A round flower with smooth, plane perianth and a small disc corona. The whole flower opens and stays white. Very good poise on strong stem. Premier 3w.w N.D.S. S.I. Show (Dunedin) 1992.

*** 2y.r SABRE (E) X85/9**

Large and very good colouring makes this early, (Air Marshal x Orator) x Falstaff seedling a more than useful show flower. A strong grower with long stems. Very broad, rounded perianth is smooth, flat and of deep yellow while the solid red corona is cup shaped. Has a N.D.S. Premier and a number of local show award to its credit.

1w.w SILVER CONVENTION (E)

A fine trumpet from John Lea. A large flower with very smooth, broad, slightly pointed perianth and a gently expanding trumpet that is flared and erated at the mouth. Great show flower being Show Champion at N.D.S. 1994 S.I. show.

*** 2w.w SILVER KIWI (ML) P83/6**

A wonderful, large pure white that has a silver sheen. The fully round perianth segments are very smooth, slightly cupped at the edges and thick textured. The shallow bowl corona is crimped and has a serrated edge. Very impressive on tall stems and a very strong plant. Has many Premier and Champion bloom awards to its credit. Was included in three of our winning exhibits at Tasvention 1988.

3w.w SILVERWOOD (L)

A large, pure white flower with long, smooth and flat perianth and a small slightly expanding corona. A Brian Duncan seedling that has a good show record. Tall stems.

*** 2y.r** **SOME DAY** **(EM) X97/2**

An Orator x Torridon seedling. A magnificent show flower with excellent form, colour and plant habits. This well overlapping, broad, slightly pointed perianth is very smooth, flat and of excellent substance and texture. The neatly serrated, goblet shaped corona is very well balanced with the perianth. The corona colour is uniform deep red to the base, while the perianth is an even, deep yellow with a touch of gold. Excellent poise, stem and strong plant. Judged Premier 2y.r, Premier Seedling and Champion Bloom at the 4th World Convention (Hobart) 1988. Premier 2y.r N.D.S. N.I. Show (Palmerston North) 1992.

*** 3y.r** **STARDOM** **(LM) X92/2 92. 40. 12. 600.**

Very neat, very consistent and very good form. This medium sized flower is bred from Kiwi Invader x Achduart has a broad ovate, very smooth and plane perianth of clean mid-yellow. The bright orange-red, deep saucer corona ie lightly lobed with a fine crenate edge. Blooms are held in excellent poise by a strong short neck on a strong stem and plant.

*** 2y.w** **STAR TRACKER** **(ML) X74/G11**

Soft, clean colouring of creamy yellow with a very white corona, and the long triangular perianth makes STAR TRACKER distinct in its class. The perianth is smooth, plane and of good texture while the 5/8 cup is nicely crenate. Excellent poise, mediurn stems and good plant. Premier 2y.w Hamilton 1990.

*** 3w.w** **SURFER GIRL** **(LM) X72/2 95. 43. 12. 600.**

Consistency, poise and stem length make this Sea Dream x Verona seedling a most useful show flower. Medium to large size with very broad ovate perianth and a small bowl corona that is crimped and has a crenate edge. On opening the corona has some yellow colour but this soon fades to white. A neat flower that is always smooth and plane. Premier 3w.w N.D.S. S.I. show (Christchurch) 1982

*** 2w.oooy** **TANZEY** **(L) 155/9**

One of the best in a small group of yellow rimmed show quality daffs. The flower is held squarely on a short neck and a strong, thick stem. The white perianth takes a few days to develop its broadly ovate, very smooth and plane qualities. The flatish, crimped corona with a fine crenate edge is deep orange with a narrow yellow band that does not fade as the flower ages. Has good breeding of (Motif x Avenger) x Crimpelene.

*** 1w.w** **TOPSPOT** **(M) X91/5 95. 40. 40. 450.**

A medium sized flower from Guiding Light x (Empress of Ireland x Canisp) that like its sister, Ice House, has all the form for a top show variety. The very smooth and flat triangular perianth forms a double triangle backing for the narrow, gently expanding trumpet that has a flared and fine dentate rim. The whole flower is a clean white throughout. Good plant and poise. Medium length stems.

*** 3y.oor TRUDIE MAY (E)**

A top, early flowering show flower with broadly ovate, smooth, flat perianth of mid yellow and a neat small bowl corona of red. Long stems and very good poise. Many premiers to its credit.

***2yw.www TWILIGHT ZONE (EM) X74/G22**

Another Daydream x Gold-Bank seedling that is extremely consistent in producing large, smooth, show blooms. The perianth that is long, broad and flat, opens 'Daydream' yellow that deepens to mature with a white halo at the base. The neat five-eighth length, cup shaped corona opens lemon, changes to white at the base and shades to a yellow with a slight pink tinge on the edge. Very long stems, healthy plant and excellent bulbs. Gold Ribbon winner Indiana State Show 1989. Gold Ribbon winner at American Daffodil Society's 1990 Convention. Also 2 other State Gold Ribbon Awards 1992 & 1993.

2w.r YOUNG BLOOD (ML)

Another Duncan seedling that scores highly on the show bench. Large size with flat, rounded, white perianth that forms a neat triangle to the wide corona of deep red. Strong plant with very short neck.

**READ TERMS OF SALE
AS PRINTED ON PRICE LISTS**

SECTION FOUR

GARDEN VARIETIES

All daffs have beauty and can be used for garden decoration or cut flowers. Those listed in this section are recommended as all are proven performers. Most varieties with red in the corona will sunburn to some extent, but if shaded or picked as they open, the problem will be reduced. Many in this section are also good show flowers

* Denotes raised by Brogden Bulbs

***2w.www BALLET LASS (EM)**

A lovely flower with clean white perianth and a lobed, bowl corona of white with a deep yellow rim. Good plant and stem.

*** 2y.yor BIG TIME (M)**

The mid yellow perianth has a twist to each petal. The near trumpet length corona is quite large, it develops strong colour and is different from others in this class.

- * 2y.r** **BRIGHT LIGHTS** **(M)**
A large, strong growing yellow and red of good form. Strong stem and plant.
- 2y.y** **CAROL** **(E)**
Opens a pale-yellow but quickly changes to soft lemon-yellow. Loves the sun to develop its beautiful colour. Great laster.
- 2y.w** **CHARTER** **(EM)**
An ideal garden plant. Flowers open lemon-primrose and the corona fades to white after 2-3 days. Lovely.
- * 2w.r** **CONQUEST** **(M)**
Has very round, off white, perianth and a deep orange red, small bowi corona. Good garden plant and show flower, but colour burns.
- 2w.r** **COOL FLAME** **(M)**
A strong grower with thick, white perianth and a large cup shaped corona of soft flame red. Quite sunproof.
- 2w.wwp** **CORAL RIBBON** **(M)**
Round white perianth and a wide flattish corona of white with a broad pink band on the edge.
- 7w.w** **DAINTY MISS (L)**
A small flower that grows no more than 300mm tall. Neat form and good grower. Good in pots. One bulb soon becomes a clump with lots of white blooms.
- *2y.r** **DANGER** **(EM)**
A yellow and red show flower that stands out in the garden with its size and deep colour. Strong plant.
- 2y.w** **DAYDREAM** **(EM)**
A very beautiful flower for showing, garden or cutting. Soft lime yellow perianth with a flanged corona that fades to white after a day or 2.
- * 3w.o** **DIANE JOY** **(EM)**
Medium sized with white perianth and a small flat corona of reddish orange. A neat flower on long stems.
- * 2y.y** **EGMONT GOLD** **(M)**
Broadly ovate perianth is smooth and flat. The funnel shaped, near trumpet length corona has a slight roll. Consistent and useful for showing it is golden yellow throughout.

***2w.w** **EGMONT SNOW** **(LM)**
Has won many top show awards. A large white with a good plant. The bowl corona opens with yellow colour but soon changes to snow white.

*** 2w.wwp** **FAIRY CHARM** **(M)**
Was premier seedling at the (Lower Hutt) National Show. Of medium size with glistening white, flat perianth and a neat, cup shaped corona of white with a fine pink rim. Very good plant.

*** 2y.w** **GALAXY PRINCE** **(EM)**
This one should probably be in Section 3 as it is a show flower but its beauty and very healthy plant make it also a great garden plant. Long, broad perianth is mid lime yellow and the wide cup shaped corona is very white.

2y.y **GALWAY** **(E)**
A very strong growing, deep yellow self with near trumpet length corona that is flared and serrated. Ideal garden flower.

*** 2y.yor** **GINA** **(M)**
Very popular for garden or cutting. The mid yellow perianth is very broad and slightly cupped at the edges makes an impressive backing to the wide bowl corona that shades from yellow to red and often rolls back onto the perianth. Very strong plant habits.

*** 2w.p** **GOOD NEWS** **(E)**
One of the first pinks to bloom. Large sized on long stems. Very broad, shovel shaped white perianth and a wide vase shaped corona of soft to mid pink.

*** 2y.oor** **HOT IDEA** **(EM)**
Very strong upright plant with flowers held in excellent poise, different from others of this type with its deep bowl corona that is nicely lobed on the edge. The broad perianth of deep yellow sets off the orange to red edged corona. A very good all purpose variety.

2y.o **JACKO** **(E)**
A very large, strong grower with good yellow perianth and orange corona.

*** 2y.r** **JETSETTER** **(E)**
The medium to large blooms have an excellent mid yellow perianth and a short corona that is wide cup shaped and of intense deep red. Good for breeding. Long stems.

11y.y KING SIZE (M)

An all yellow split corona that has very large blooms.

*** 2w.p KESTELLE (M)**

This one has several champion blooms to its credit. A soft flower with very smooth, well shaped white perianth and a neat expanding corona of light pink to mid pink on the edge. Champion Bloom N.D.S. (New Plymouth) 1983.

***2y.yor KIWI (M)**

Under rated as a show flower, this variety has excellent form and health. The mid yellow perianth is very broad and of thick substance and texture. The smooth edged corona shades from yellow to red on the edge.

***2yw.w KIWI CHARM (LM)**

The well shaped perianth of light greenish lemon, shades to white at the petal tips and the wide cup shaped corona slowly fades from light lemon to white. Different from most other reverse bicolours. Strong stem and plant. Very decorative.

***2y.r. KIWI GOSSIP (VE)**

Large, tall, very deep colour and early flowering makes this most useful for showing, garden or cutting. The perianth is long, rounded and deep golden. The deep cup shaped corona opens orange with a green edge but soon colours to deep red.

***2y.yyr KIWI SPARK (EM)**

Excellent for show and garden. Very broad, smooth, plane perianth is dear mid-yellow. The straight, half length corona is half mid yellow and half bright red, Excellent poise and plant.

3y.y LEMONADE (LM)

This division 3 flower opens very pale yellow, but deepens day by day to a light lemon yellow in both perianth and saucer corona. A round flower on long stems.

***2w.y MERRIDEE (M)**

Pretty with slight reflexed broad, white perianth and a deep saucer corona of citrus yellow. Good stem and plant.

***3w.yyr MOTIF (M)**

Has won many awards at shows. Develops to a broad, white perianth and a flat saucer corona of yellow with a narrow band of red. A proven pollen parent.

***2y.yor NEW FASHION (E)**

A garden variety with extremely broad, light yellow perianth and a very wide, flat-tish corona of yellow at base to bright red at edge. Very strong plant and stem. Very eye catching.

*** 2y.o ORANGE BOWL (M)**

An all purpose flower that is highly recommended for garden and cutting. Strong plant and stem that holds blooms in excellent poise. Smooth, plane perianth is mid yellow while the contrasting, serrated edged, deep bowl corona is solid deep orange. Very consistent and quite sunproof.

3w.w POLAR IMP (M)

A medium sized, all white division 3. Very round flower with a small bowl corona.

***2y.w PRYDA (M)**

A very strong grower with bold flowers on medium length stems. The broad ovate perianth of mid lime yellow has stiff texture. The very wide bowl corona quickly changes to white. Recommended for showing or garden plant.

***2w.p ROSIE (EM)**

This one 'stands out' with its bold flowers and robust plant. Wide triangular perianth is white and slightly cupped at edges. The large, wide bowl corona opens creamy pink with the pink deepening each day. Pretty and excellent for cutting or garden decoration.

*** 2y.y SELENA (LM)**

A large very round flower with a wide flattish corona with a lobed edge. The whole flower is a pleasing mid yellow. Long stems. Different from most other all yellows.

***2w.y SOBEIT (E)**

The first to bloom in this type and colour. The off white perianth is long, triangular, smooth and flat. Near trumpet length cylindrical corona is creamy yellow. Good plant and stem.

11y.o SOVEREIGN (M)

Strong growing split corona with orange split over yellowish perianth. Showy.

2y.o SPRING FLING (E)

Very strong plant, stem and flower that is ideal for cut flowers and garden. Very broad, rounded, light yellow perianth and a large, wide bowl corona of fiery orange.

A must have.

*** 2y.w STARLIGHT (EM)**

A most beautiful flower of soft lemon tinted perianth and deep bowl corona that fades to be very white after a day or 2. Floral artists find this easy to work with.

***2w.o** **SWEET LUCK** **(M)**

The long rounded pure white petals are smooth and flat. A flattish bowl corona is a pretty reddish orange. Large flowers on long stems.

*** 2y.yor** **TANYA** **(EM)**

Has stiff texture that holds the flowers plane, and with good poise says 'look at me' The bright yellow, triangular perianth makes the deep cup shaped corona of yellow to a deep red edge, stand out. Will sunburn but is a great garden and cut flower. Has had show champion awards.

*** 2 y.yor** **TALL TIMBER** **(LM)**

Consistently produces excellent show form flowers on very long stems. Light yellow perianth is very smooth, broad and flat. The small goblet shaped corona shades from yellow to red.

*** 2o.r** **TOURIST** **(M)**

Excellent for garden or cutting. The perianth is round and has orange flush through the yellow. The small bowl corona is orange-red. Long stems and good healthy plant.

*** 2y.r** **TUI** **(LM)**

Medium sized flower with smooth, yellow perianth and a small goblet corona of deep red. Great health and stems. Increases quickly.

3w.w **VERONA** **(LM)**

A great division 3 that has had numerous show awards. Quite round perianth and a short bowl corona, both are clean white. Good for all purposes.

*** 1w.w** **WHITE FRILLS** **(M)**

An unusual all white trumpet that has a very frilly serrated edge to the rolled trumpet. Broad triangle shaped perianth on a strong stem and plant.

*** 3w.r** **ZARENE** **(EM)**

Doesn't look much at first opening but quickly develops to a broad, white perianth. The deep brick red, saucer corona burns in the sun, but the flowers develop perfectly in water so it can be picked in the bud. Strong stem, healthy plant.

DAFFODIL CLASSIFICATION

The number and letters preceding flower name are -

- 1 = Trumpet (Trumpet as long or longer than perianth)
- 2 = Large cup (Corona shorter but more than 1/3 the perianth length)
- 3 = Small cup (Corona 1/3 or less than 1/3 the length of the perianth)
- 4 = Double flowers
- 5 = Triandus hybrid
- 6 = Cyclamineus hybrid
- 7 = Jonquilla hybrid
- 8 = Tazetta hybrid
- 9 = Poeticus hybrid
- 10 = Species or wild forms
- 11 = Split corona
- 12 = Miscellaneous

y = Yellow

w = White

r = Red

o = Orange

p = Pink

i.e. - 2y.yor is a large cup with Yellow perianth and a Yellow to Orange to Red (at rim) corona.
