BROGDEN BULBS

2008 NEW RELEASES

- 8w.o** **ABRAXIS** (E)
- This is another of the excellent show quality tazettas raised by WILF HALL. A strong growing, early flowering variety with well formed white perianth segments and neat cup shaped coronas of an orange shade. Has 4 or 5 florets per long stem. Only 2 or 3 bulbs to go this season. **\$90.00 each**
- 2w.y** **BLAST OFF** **BB 323 - 2** (M) **109 47 17 500**
- A top exhibition flower bred from *Janelle x On Target*. The smooth, very broad, shouldered at base perianth is rounded at apex and of clean white. The well balanced bowl shaped corona is mid yellow – lighter to base. Premier 2w.y NDS S.I. show 2006. **\$90.00 each**
- 2wwy.y** **EGMONT PRIDE** **BB 248 - 4** (L) **105 46 35 450**
- Has taken many awards at late shows where it's form and lasting qualities make it most useful. The very broad, blunt perianth is smooth, of heavy substance and is white with a distinct yellow halo. The corona is funnel shaped, has a crenate, wavy rim and is deep yellow. Bred from *Flash Affair x Kareka* **\$40.00each**
- 2y.r** **FLAMING HOT** **BB 3-05-5** (EM) **115 50 27 500**
- Very brightly coloured, free flowering and strong plant habits makes this *Some Day x Redlands Too* variety stand out on the show bench and in the garden. The bright, deep yellow perianth is long, acute, smooth, plane and forms a striking back for the bright red, straight cupped corona which has an entire rim. Premier 2y.r NDS NI show 2004 and a stand out vase of 3 in our winning red cup entry at the Australasian show 2007. **\$90.00 each**
- 2w.wwp** **JOYO** **BB 321-4** (L) **102 43 22 450**
- A very pretty flower that is useful for showing. The ovate perianth is plane and smooth. The broad bowl corona is wavy at the mouth and has a slight flanged, crenate rim. A distinct rosy pink band on the rim highlights the otherwise white bloom. Bred from *Precedent x Aimee Joy*. Good stem and poise. **\$30.00 each**

- 2y.r MASON ROAD BB 6-10-1 (EM) 115 53 25 550**
This strongly coloured flower was bred from *Some Day x Wayby* and demands attention with very broad and shouldered at base, ovate perianth that is blunt, very smooth and overlaps half. The expanding cup shaped corona is lightly waved and has an entire rim. Coloured very deep yellow and deep orange red. Has a great future. **\$90.00 each**
- 1y.oor ROYELEEN (E)**
Bred by Hawera amateur growers Roy and Noeleen Willcox this has been tops at local shows for some years and showed it's worth at the Australasian Championships in 2007 where it was Champion Amateur Bloom (grown by Roy and Noeleen) and overall Premier 1y.r grown by Brogden bulbs. A very consistent variety with a very smooth perianth and a corona of true trumpet shape and measurement. From *Corbiere* seed. SOLD OUT for 2008 but orders can be made for 2009 delivery. **\$100.00 each**
- 3w.o SHOW DOWN BB 0-28-12 (EM) 105 45 15 600**
Don't be fooled when this one firsts opens as it takes a few days to develop to a magnificent roundish flower with smooth, rounded, very broad perianth that is plane and overlaps more than half it's length. The shallow bowl corona is ribbed and has a wavy, finely crenate rim and is unusual reddish orange to yellow at the base. Needs protection from the sun – but it is well worth the effort. Premier 3w.r NDS NI show 2004. Great lasting blooms. **\$100.00 each**
- 2y.y SUNLINE BB 5-06-1 (E) 110 45 35 500**
An excellent, early flowering show flower that was bred from *Misquote x Kiwi Moon*. The well overlapping, very smooth perianth is blunt, very broadly ovate and shouldered at the base. The straight cylinder corona has a wavy, crenate rim. The whole flower is an even deepish yellow. Free flowering and good plant and bulbs. **\$100.00 each**

NOTE -

Classification is followed by Name, Seedling number, Flowering season, and a set of numbers (in millimeters) for Flower width, Perianth length, Corona length and Stem length.

With the exception of ROYELEEN all varieties have been registered.
