2015 INTRODUCTIONS

Hybridized and Raised by

BROGDEN BULBS

2y.y BB 01-4-05/3 (EM)

The name and final description of this one is yet to be finalised but a general description of "it's a good one" covers all the attributes of this excellent show flower. Good line breeding of *Otaihape x Sunline* shows why it was Premier 2yy at the NDS NI show in 2014.

\$60.00 each, Offsets \$25.00 each

2y.p NARELLE BB 01-23-1 (LM) 112 35 43 450

The broad ovate perianth that is smooth and flat stays plane until the flower ends, opens soft yellow that deepens to a clean, light lemon yellow as the flower develops. The well balanced cylinder corona has a small flanged mouth that is neatly crenate. The corona opens a coppery pink that soon changes to a cleaner pink that lightens to the base. A highly consistent and lovely coloured show flower with excellent poise and very strong plant and stem. Premier 2y.p at the NDS SI show 2013. Premier 2y.p & Best Vase of 7 at the Central Daff.Group's Late show 2014. Bred (*Easter Dawn x Dailmanach*) x *Capree Elizabeth*.

\$90.00 each, Offsets \$35.00 each.

2y.y NEW WAY (Reg) BB 03-6-3 (M)

The very broad, smooth, flat and plane perianth makes an impressive background for the shortish, very narrow cylinder corona that has a slight flare and entire mouth. Long stem and good poise. There are very few cultivars with this type of corona which some say are "under-cupped". The whole flower is a clean mid yellow. NEW WAY is certainly different but is of excellent show form. Bred *New Penny x New Image*.

\$100.00 each, Offsets \$40.00 each.

EARLIER BROGDEN BULBS INTRODUCTIONS

1w.w STATEMENT (Reg) BB 01-13-2 (E)

This large, double triangle flower has very broad, smooth, plane perianth which is well overlapped and of heavy substance. The long, smooth cylinder corona is slightly flared at the mouth and has a flanged entire rim. The whole flower is pristine white. Top white breeding of *Ice House x Neahkahnie*.

Sorry -Sold out for this season.

1y.p TANEKA (Reg) BB 01-2-3 (LM)

This deeply coloured show flower has already achieved telling success since first being shown in 2012. A large flower of double triangle shape, the perianth segments are ovate in outline and acute at the apex and are spreading, smooth, plane and well overlapped. The long, tightly ribbed funnel-shaped corona is flared and wavy at the mouth with an entire rim. TANEKA has a strong plant and excellent bulbs. National Premier at the SI in 2012 and 2013. Bred *Corbiere x Capree Elizabeth*.

\$90.00 each, Offsets \$35 each.
