MINIATURE DAFFODILS  
from Alec Gray  
Supplementary List for Fanciers

This list supplements our introductory offer. It includes the balance of Mr. Gray's list this year, and is provided so that American miniature fanciers will not be cut off from their principal source of miniatures and species. We believe that these lists make up the only complete Gray offering in the USA this year.

Reluctantly, because of the extra work and cost of serving USA customers, Mr. Gray notified his customers that he could no longer supply them directly.

This list includes varieties untested here; varieties Mr. Gray labels "not a good doer"; varieties not yet successful here; varieties good here, but because of high price, we have arbitrarily considered "fanciers' items". We suggest you check details in former catalogues. You will note that several have not recently been offered. We have not included mixtures, collected bulbs, and some collections. We don't believe collectors are interested in these, but, we feel that our American miniature fanciers should have access to all from this acknowledged authority, even those not "good doers" (some of which are our own favorites).

We visited the Grays this spring; were very much impressed with the care in their operation. As go-betweens only, we promise to do our best to supply you from this list to the extent the Grays can provide bulbs. We regret its delay. We know you know that if you want any, early ordering is essential.

We will follow the pattern proposed for the introductory list; you may, of course, combine orders from either list.

\*\*\*\*\*

BULBOCODIUM Species

<u>Romieuxii</u> 3". Yellow of petunia type.	\$ .25/ea.
<u>Romieuxii ruffanus</u> 3". Early pale yellow.	.85/3
<u>Tananicus</u> 3". White, held vertically.	.85/3
<u>Tenuifolium</u> 3". Later, dwarfer conspicuous type.	.50/5
<u>Vulgaris citrinus</u> 5"-6". Pale yellow. Likes damp spot.	.35/3
<u>Vulgaris conspicuus</u> 4"-6". Deep yellow. Best known.	.45/5
<u>Vulgaris nivalis</u> 2"-3". The smallest. Early. Cute in pots.	.35/3

## TRUMPET Species

<u>Minor conspicuus</u> 5". Yel. trumpet; pale yellow per.	\$ .35/3
<u>Minor pumilis plenus</u> 6". "Like a dandelion", but stock is mixed.	.50/3
<u>Ps.-Narcissus</u> 6". Pale bicolor, the Lent Lily. (stock mixed).	.65/12
<u>Ps.-Narcissus plenus</u> 6". Rare double of above.	.65
<u>Ps.-Narcissus Gayi</u> 12". Whitish per., with clear yellow.	.85/12
<u>Ps.-Narcissus moschatus</u> 9". The swan's necked original white.	.55/3
<u>Ps.-Narcissus moschatus plenus</u> (sic) 9". Double of above.	.50 2a.
<u>Ps.-Narcissus obvallaris</u> 12". (The Tenby Daf.) Early, neat, but stock mixed.	1.00/12
<u>Ps.-Narcissus pallidiflorus</u> 6"-8". Large pale yellow or bicolor: "variable".	.45/ea.
<u>Ps.-Narcissus Van Zion</u> . This may be the true one; we do not know.	.45/3

## Hybrids

<u>Charles Warren</u> 5". An earlier, dwarfer one of pumilis type.	.35/ea.
<u>Sneezy</u> 4". Sizable self yellow on stiff stem. ast. x obv.	.35/ea.
<u>Snug</u> 5". White per.; cream tr.; stronger than its parent, alpestris.	.65/ea.
<u>Wee Bee</u> 5". Nanus sport; pale yellow of good substance.	.50/ea.

## TRIANDRUS Species

<u>Albus</u> 3"-4". The well-known "angel's tears".	1.00/12
<u>Concolor</u> 3"-4". Golden form of above. Beautiful in pots here.	1.00/12
<u>Loiseleurii</u> (calathinus) 5"-6". Lovely thing; parent of most hybrids.	.65/ea.

## Hybrids

<u>Arctic Morn</u> 6"-8". A hint of pink in the several blooms to stem.	.75
<u>Auburn</u> 9"-12". Intense self gold. Long corona; casual perianth.	.65/5
<u>Cobweb</u> 10". 1-4 sizable blooms of wh. per. and small yellow cup.	.45/ea.
<u>Dawn</u> 12". Similar to above, but with larger, flatter, deeper toned cup.	.35/ea.
<u>Frosty Morn</u> 6". A charming, snowy-white dwarf of good substance.	.50/ea.
<u>Mary Plumstead</u> 6". A strong-growing pale yellow, similar to April Tears.	.85
<u>Phillida Garth</u> 9"-12". A frilled cup adds novelty to these lovely whites.	.75
<u>Rippling Waters</u> 16"-18". This seems still to take the top awards.	.50/ea.
<u>Samba</u> 9". A love of rare coloring; the red of cup suffusing perianth.	.65/ea.
<u>Sennocke</u> 4". Unusual tri. x bulb.	1.00
<u>Sidhe</u> 15". Several small sulphur-yellow flowers to stem.	.50
<u>Thoughtful</u> 12". A soft yellow of great smoothness and substance.	1.00

CYCLAMINEUS Species

Home-grown only. (Hope you have better luck than we!)

\$1.50/12

Hybrids

<u>Bartley</u> 18". The narrow, long-trumpeted early. (Same clone as "Peeping Tom").	.35/ea.
<u>Charity May</u> 15". Still the top show-winner. Superb form.	.75/ea.
<u>Golden Cycle</u> 9". An early self, "not a good doer".	.45/ea.
<u>Greenshank</u> 6". Similar to Snipe.	.55/ea.
<u>Jack Snipe</u> 4"-6". The stiff little "only yellow and white cyclamineus hybrid."	1.50/ea.
<u>Jenny</u> 15". The "only wh." (but only K. Smith grows it as it should look!)	1.85/ea.
<u>Jumblie</u> 6". Like Tete-a-tete with reflexed petals.	1.00/ea.
<u>Little Gentleman</u> 6"-8". An Australian self-yel. of good form and substance.	.50/ea.
<u>Little Witch</u> 9". Self yellow; stiff, durable, but of lesser form.	.45/ea.
<u>March Sunshine</u> 12". Long over-rated follower of F. Gold.	.65/3
<u>Quince</u> 4"-6". 2-3 flowers; does this properly extend the previously one bloomed 6's?	.75/ea.
<u>Snipe</u> 9". Long-trumpeted pale yellow.	1.25/ea.
<u>Tete-a-tete</u> 4"-6". Cyclataz selfed; of superior form and substance.	.85

JONQUIL Species

Callicola 5"-6". Delightful golden bit in pots; we doubt its hardiness.

.35

Fernandesii 4". Rare and beautiful yellow.

.45

Jonquilla minor 6". Probably Jonq. x Junc., a "shy flowerer".

.55/5

Jonquilla (single) 12". Fine in the south, but miserable here.

.55/6

Scaberulus 4"-5". The tiniest of all; safe in pots.

.65/3

Hybrids

Demure 6"-8". A wh. & yel. bit, showing the refinement of Watieri breeding.

.75/ea.

Kidling 6". Free-flowering cross of jonquilla x juncifolius.

.35

Lintie 7"-8". 1-4 fls. flat orange cups within butter-yellow yel. perianth.

.50/3

Odorus camperelli 18". Perhaps Mr. Gray can resolve

.55/6

Odorus camperelli plenus 15". the confusion in this group,

.55/6

Odorus rugulosus 15". as they appear at shows.

.60/5

Orange Queen 7"-9". One of the most intense of oranges.

.35/3

Peaseblossom 4". 1-3 dainty yellow fls. from a junc. x trial b. cross.

.35/ea.

Pencrebar 6". Like a tiny, double yellow rose.

.45/ea.

Pipers Barn 8". Deep yellow; small cup; pointed petals.

.45/3

Sea Gift 6". Self yellow found in a Cornish garden by Mr. Gray. \$ .45/ea.  
Stafford Similar to Bobbysoxer, but earlier. .40/ea.  
S. lial 6". Smaller, dwarfer, much earlier version of Bobbysoxer. .75

#### TAZETTA Species

Bertolonii 6"-8". Polianthus self yellow; perhaps the ancestor of Soleil d'Or. .45/ea.  
Compressa 12". Very robust white and yellow. .65/3  
Intermedius 12". Between yellow tazetta and single jonquil. .55/ea.  
Lacticolor (Canaliculatus) 4". Only dwarf. Charming, but of variable performance .55/6  
Odoratus 12". Similar to above but taller. .55/4

#### Hybrids

Halingy 6". Low, early white with soft cream. From Scilly White. .35/ea.  
Hors d'Ouvre 4". Extremely early tiny yellow. Canaliculatus x minor. .35/ea.  
Soliel d'Or 15"-18". 3 varieties of this ancient plant available. .55/4  
Shrew 2"-3". Tiny; several yel. & wh. flowers to a stem. .65/ea.

#### POETS

Flore pleno 15"-18". The well-known late double "Pheasant's Eye". .65/6  
Praecox 15". Early; formerly grown for market; now scarce. .75/3  
Poetarum 15". The famous red from which all has come. A "poor doer". .50/ea.  
Recurvus 15"-18". The useful latest. .65/6

#### VARIOUS

Fairy Circle 12". Charming tiny bloom with flat circle edged buff-pink. .45/ea.  
Hedrianthus 2". Curious, early, newly-discovered species, related to bulb. 1.00/ea.  
Lady Bee 10". Wh.; long pink cup on stiff stem. .50/ea.  
Macleayi 6". Curious bi-color; perhaps a poet x abscissus. .65  
Nor-nor 9"-12". Prolific sunproof 2a, changing from self yellow to white and orange. .85/3  
Pango 8". Very early soft yellow. Dubius x John Evelyn. .75/ea.  
Serotinus 4". Autumn-flowering white with tiny yellow toothed corona. Pots only. .45  
Tweeny 6". Very late. 2A x watieri. .70/ea.  
Xit 5"-6". Pure white from watieri x large 2c. .50
