## DAFFODILS FOR SHOW AND GARDEN - 1991

At 400+ different daffodils, the 1991 List contains fewer cultivars than in years past. Notwithstanding, it continues to represent the world's most comprehensive catalog of currently available daffodil cultivars. With few exceptions, most stocks consist of no more than ten bulbs. This means that no order can be accepted after 15 July and, since each order is custom dug, no order may be cancelled. Also, all bulbs are offered subject to crop and being unsold on receipt of order. Please note that I offer a 5% discount to current members of the American Daffodil Society and an additional 10% on orders exceeding \$150. Also, orders are filled in strict order of receipt. Minimum order is \$15.00, plus applicable shipping/handling charges. Please enclose your check or money order in full payment.

To all customers who have ordered bulbs from CASCADE DAFFODILS in prior years, Thank You!, it is your repeat orders that make this business possible. This year's offering contains a number of cultivars that have been returned to the list and I trust that you will find something in this year's catalog that you might like to try in your garden. This year, I'm listing a considerable number of Australian and New Zealand originations. If you are looking for a specific cultivar from a Down-Under breeder, or any other, (and don't find it), please write, as I probably have what you are looking for and can spare a bulb. When your daffodils bloom this Spring, take some of your favorite blooms to your local daffodil show and exhibit, its rewarding and great fun and a good way to see many of the newer daffodils before purchasing.
