

Cherry Creek Daffodils • 2012 Late List

My sincere thanks to all of you that make what we do possible! In this era of big business my goal is to stay just the right size and keep that personal relationship with each and every one of YOU. It is these personal relationship that makes this business so fulfilling and satisfying.

As usual, this listing is ONLY available in your bulb parcel. It is NOT mailed or available on the WEB. I find this a nice way of offering new, special, rare, or discounted bulbs and getting them into the hands of those that most appreciate them. Please note the drastically lowered prices on many choice varieties. Many of the bulbs on this list are simply not available anywhere else. Two planting label styles are offered on special as well. Hopefully you will find some things that will intrigue and entice.

Replanting here begins on Tuesday October 30th. Please no orders for bulbs after that date without checking first. Supplies available any time.

FREE New Miniature Daffodil Introduction

Order \$30.00 or more from this late list or our online WEB catalog and get a free bulb of our 2013 Miniature Introduction

‘Piccolo Pete’

‘Piccolo Pete’ 1Y-Y

V90-73-9 = Little Gem x Tanagra, S. J. Vinisky, USA, Season 1-2

MINIATURE

Will easily qualify for inclusion on the A. D. S. Approved Miniatures List. Flower diameter of 46 mm. Segment length is 21 mm. Trumpet length is 21 mm. Overall height of the bloom stalks is about 7". Lovely frilled edge to the trumpet. Perianth segments are distinctly lighter yellow than the darker yellow trumpet Acceptable show form. Offered due to its high fertility as a parent and the fact that it is one of the strongest growers and most rapid increaser that I've raised in Miniature Daffodils. Available both now and in 2013 at \$20.00 per bulb.

Get one bulb of ‘Piccolo Pete’ FREE with any order \$30.00 or more!

Standard Daffodils

Art Nouveau 7W-P, - Sdlg # P38-126 = (Cordial x Canby) x *N. jonquilla*, Sid DuBose, USA, 2003, Season 4

'Work of Art' sibling with a totally different look and style. Due to fumigation damage I've only been able to list this once. Thank goodness for planting stocks in three locations! Increase has been good but still only a few to go. Highly recommended as a superbly formed, mid-baby pink jonquil hybrid of merit and worth. First offering since its intro. Special price. \$15.00

Ceasefire 2Y-R, Seedling # D1113 = [Red Spartan x (Montego x Achduart)], Brian S. Duncan, N. Ireland, 1995, 3

This fine Brian Duncan flower has been a dependable, consistent show flower for us. We like it as a main season show flower and have used it frequently in collections. Smooth and well colored with great pose, stem, and neck. A strong grower and vigorous increaser. Wonderful, thoughtful parentage make this a flower with good breeding potential. Mostly smaller, single nose rounds this season. Much recommended and dependable. \$6.00 each or 3 for \$15.00

Evesham 3W-Y, Sdlg # 1-37-76 = (Loch Assynt x Blanchard sdlg # 68/15A, J. S. B. Lea, England, 1990, Season 4

Many believe this to be one of the late John Lea's finest show flowers. Wonderful stem, pose, form and color. Healthy, strong increaser that is not often available. Sibling to 'Dunley Hall'. Excellent parent for Div. 3 breeding. Fertile both ways. \$6.00

Luchon 9W-GYR, Wild collected *N. poeticus var. poeticus* from a meadow located outside of Luchon, France, Season 5

The smallest wild poeticus that I came across in many feral poeticus populations. Opens at 51mm so not a Miniature but quite close. Flower is much better than the skewed photo in the June 2012 A.D.S. Journal ad. Has unusual vigor and is a good increaser as well as a prolific seeder. Quite late but choice and not often seen in Div. 13 Standards. Can win its class. \$32.00

Gold Breeze 6Y-Y - 2013 Registration and Introduction. [(Peeping Tom x Glen Clova) x *N. cyclamineus*], Season 3

Offered a year in advance for those that adore *N. cyclamineus* hybrids. Deep, dark flower like polished gold. Not yellow or orange, but deep, dark gold. A petite standard (about the size of 'Jetfire') with excellent and unusually consistent show form. Remarkable vigor and a fantastic increaser. Fertile both ways. Much liked and admired. Fine bulbs offered. \$40.00

Sabot Hill 4W-Y, Sdlg # 66/2= Ave x Gay Time, William G. Pannill, USA, 1994, Season 3-4

Strongly contrasted bicolor double from Bill Pannill's breeding program. Great neck with

spot on pose. Can be quite symmetric and is a good show flower. High potential as a parent for pure white doubles. Rarely offered. \$10.00

Sammy Girl 8W-P, Seedling # is unknown; cross = Lilac Delight x Avalanche hybrid; Dr. Harold Koopowitz, USA, 1976, 3-4

Raised by our friend, Harold Koopowitz. This is a fabulous pink tazetta hybrid. The world's first pink tazetta creation! Normally has two flowers on the main stems in our climate. In warmer climates three flowers can be expected on the main stems. Each flower can be close to 3" in diameter. Exquisite, smooth, ivory white segments are wide and shovel shaped with prominent micro tips. Gives each flower a rounded look. The bowl shaped corona is clear mid-pink that deepens in intensity in the throat. Nice, light, poetaz type fragrance. Can easily win its class and is a very useful collection flower as it "balances" jonquil hybrids as well as other multi flowered types. Has been hardy here outdoors in the main fields which have been down to four degrees F. Reports from Pennsylvania is that it grows well and increases strongly there as well. Much recommended. Not too many bulbs available. SPECIAL LATE LIST PRICE \$50.00

Triple Crown 3Y-GYR, Sdlg. # D962 = Sunapee x Achduart, Brian Duncan, N. Ireland, 1987, Season 4-5

Simply one of the best for show. An inspired cross by Brian Duncan of a Murray Evans flower by a John Lea flower. The result is truly a world class flower that has too many awards to even begin to list. Wins all over the world. A glowing, luminous yellow with a bright red rim on the precise corona. Tremendous increaser and a healthy grower. SPECIAL 3 for \$10.00

Tuscarora 1Y-Y, Seedling # 225 = (Slieveboy x [Kingscourt x ? Shah]) x Gold Convention, Dr. Bill Bender, USA, 1990, 2-3

In my opinion this is still one of the best and most distinctive early/midseason yellow trumpets available. Hybridized by the brilliant, dedicated, keen eyed, and much missed Dr. Bill Bender. The very broad and overlapped perianth segments are a bright, glowing yellow. The width, smoothness and overlap are notable. The narrow based, cylindrical trumpet is of a darker vivid yellow. It has a gentle roll to the slightly expanded trumpet rim. A wonderfully consistent producer of show flowers of the highest quality. Excellent, stems, neck and overall carriage. Tuscarora has a super bulb with good skins. Another rare, rare bulb in commerce. Recommended. \$12.00

Windsor Court 4W-Y, Sdlg. #67/57E = Snowhill x Bromley, William G. Pannill, USA, 1992, Season 3-4

Choice and little known Bill Pannill double. Nice show flower. Often fertile having both stigma and pollen. Exceptional parent for breeding white doubles given the brilliant parent selection. Good substance and a good neck. Strong increaser and a fine garden double too! \$11.00

Miniature Daffodils

Gadget 10Y-Y, Sdlg # 1/89 = Smarple x *N. bulbocodium subsp. bulbocodium var. citrinus*, Glenbrook Bulb Farms, Tasmania, 2002, Season 2-3

Favored show bulbocodium hybrid from Rod Barwick. Tall, almost austere, well formed flower that is perfect for exhibition. Less than 30 to go! Order early. \$14.00

Mary Plumstead 5Y-Y, *N. jonquilla* x *N. triandrus subsp. triandrus var. loiseleurii*, Alec Gray, England, Pre 1954, Season 3-4

Extremely RARE and choice exhibition Miniature. Good grower for us in raised beds with well drained soil. Steady increaser. Only a few available. \$23.00

Erythronium x hybrid

'Pioneer Mountain Strain'

Considered a color break for the genus! Exclusive, exciting introduction of this superb NEW hybrid of two American native species made by noted daffodil hybridizer Walter Blom. Cross of *E. revolutum* x *E. johnsonii*. The red *E. johnsonii* was found on Pioneer Mountain at about 3000 foot elevation and is unbelievably RARE even among bulb specialists. Choice woodland plant perfect for underplanting trees. Likes filtered light to full shade and rich but well drained soil. Perfect for shady rock garden conditions or raised beds. Glowing, purplish pink coloration with some having a yellow "eye". Two to as many as five flowers on a spray. Strong increaser. Really choice. \$15.00 each or 3 for \$38.00

Supplies for Planting

Virgin Vinyl Labels - 1" wide x 6" long

This type of plant label lasts far longer than the styrene plastic labels commonly available. The labels are custom manufactured to my specifications from 20 mil, virgin vinyl sheets. I find that using a paint pen or one of the Horticultural marking pencils works best. Pens and pencils on WEB site. \$12.50 per 100 or • SPECIAL • 500 for \$50.00

Thick Labels - Thick styrene, injection molded with hole, 4 7/8" long and 1/8" thick (125mm x 2mm) with a pre-punched hole which may be used to wire these thick labels to shrubs, trees, and or field wires. We learned of these from Dave Karnstedt. He buried these completely next to his 12" field stakes(see above) as insurance against broken or damaged field stakes. A wise policy in my opinion. Easily lasted a decade and more when completely buried. Lasts seven to ten seasons in full, year round sun. Again, these work well with paint pens or pencils. \$7.50 per 100 or • 500 for \$32.00
