#### DAFFODILS FOR NATURALIZING

DAFFODILS are amongst the most hardy of garden plants and lend themselves beautifully to naturalizing; that is, planting out in drifts to give the effect of Wildflowers.

After many years of experience and experiments, we have searched out the varieties most suited for naturalizing and are listing below by the bushel or peck those we especially recommend. These are blooming sized rounds and may be left undisturbed for many years if fertilized each winter.

NATURALIZING MIXTURE: Our own mixture of many varied types, colors and blooming dates-ORDER EARLY!

..... \$12.00 per Peck  
 ..... \$40.00 per Bushel

Most of the following varieties are included in the Naturalizing Mixture and may be bought by the peck. Each peck contains approximately 75 to 100 bulbs.
