SOME HINTS ON CULTIVATION

Daffodil bulbs will grow and flower in any well-drained garden soil, but they like best a well-worked and deep loam which may be from quite a light character to a stiff clay. Be sure of good drainage.

The position should be open to a fair amount of sun, yet sheltered from the full force of prevailing winds.

If the shelter is provided by trees, the bulb beds must be kept away from the roots, and the site should not be totally enclosed by permanent shelters.

It is advisable to plant bulbs in a bed that is separated from the rest of the garden; after blooming they need a rest period, and they do not receive this if planted with other flowers which require watering during the summer months.

Daffodils do not need any special fertiliser treatment and fertilisers should be applied according to the requirements of the soil used. In an average soil they will benefit from any "complete" fertiliser or mixture of fertilisers, natural or artificial. Excessive fertilising may produce size at the expense of refinement.

All daffodil bulbs are best planted not later than March if possible so that they have a long period before them in which to secure a good root system. The depth of planting depends on the size of the bulbs and the mechanical texture of the soil; the larger the bulb the deeper it should be planted, and allowances should be made for heavy soil in which bulbs should not be planted too deeply. It is a safe and general guide to cover the neck of the bulb with three inches of soil.

Surface soil cultivation should begin as soon as the first leaves appear and continue throughout the season.

Bulbs should not be lifted till the foliage has turned yellow. They should be left in the ground for at least two years, as many varieties do much better the second year. In the summer the surface soil should be raked over so as to fill in the holes left by the foliage.

Bulbs may be left in the ground indefinitely but after three or four years the size of bloom and length of stem will be reduced. The usual practice is to lift every three years.

- BIZERTA:** 2, J.L.R. Closely similar in form and quality to the magnificent Polindra, but of most unusual and distinct colouring, having pure white perianth of thick waxy substance, while the cup is rich apricot-chrome, frilled slightly. Very lasting flower. 7/6.
- BLARNEY'S DAUGHTER:** 4, J.L.R. This very lovely flower, as its name suggests, was raised from Blarney x an unnamed seedling of the same type. The perianth is pure white of lovely quality and rich thick texture. The cup is deep apricot-orange with a very distinct bright gold rim. £5.
- BLODWEN:** 3, W.J. White perianth, large flat orange cup, brighter at edge. 10/- dozen.
- BODILLY:** 3, P.D.W. Good white perianth, well overlapping, nice cup of yellow. 2/6.
- BREAD AND CHEESE:** G.L.W. Broad satin-smooth perianth of purest white, perfectly proportioned crown, which opens soft yellow and soon passes to a most distinct attractive soft rich cheese buff. 5/-.
- BRILLIANT LIGHTS:** 2-3, J.N.H. Large flower and well balanced. The good white perianth overlaps well and the cup is flat, of brilliant orange and beautifully frilled. 2/6.
- BRUNSWICK:** 2, P.D.W. A beautiful early flower. Cup white at base with greenish lemon edge. 2/6.
- BUFF LADY:** 3. A very striking high-class flower, having glistening, smooth white perianth and lovely buff coloured cup that intensifies with age. 5/-.
- BUNCRANA:** 3-4, J.L.R. A first-class show flower, having very broad, flat, pure white shovel-shaped segments, and a longish frilled cup of unusual deep peachy-orange colour. 5/-.
- CANTERBURY BELL:** 2-3, H.A.B. A very distinct and beautiful flower with solid white perianth, creamy white cup with apricot edge. 1/6 each, 15/- dozen.
- CARAGH:** 4, J.L.R. Pure white perianth, the major segments very broad; wide shallow crown, sharply rimmed clear golden orange, then pale citron passing to soft sage green in the eye. 10/-.
- CARDIGAN:** 3, A.M.W. Very smooth broad white perianth, pointed at the tips, standing at right angles to the rather straight cup of deep clear lemon yellow. An excellent show flower. 2/6.
- CAREY:** 3, J.N.H. The white perianth is well overlapping and very smooth; the cup, which is almost flat, is of a good shade of orange and beautifully fluted. Tall, strong plants. 5/-.

DIVISION 2b(i) (Continued).

- CARNALEA:** 4, G.L.W. Bred from Nelly by the same pollen parent as Chinese White, this charming flower has a broad, pure white perianth, and a shallow expanded crown edged by a well defined band of lemon gold. 12/6.
- CASABLANCA:** 3, J.L.R. A splendid flower after style of Polindra, with white perianth and well-proportioned soft pale yellow cup, nicely serrated at mouth. 3/-.
- CHARTWELL:** 2, J.N.H. Originally named Chartreuse. An unusual cross, Content x Rouge, which has produced a beautifully smooth flower of lemony primrose white. The long almost straight trumpet is of a more lemony tone. Very well balanced and very lasting. 30/-.
- CLEENA:** 2-3, J.L.R. A Fortune seedling of splendid vigour. The perianth is flat and firm, clear white, and the crown is pale primrose near the mouth, shading quickly into a flush of warm soft apricot. 7/6.
- CONBEG:** 3-4, G.L.W. Broad, pure white perianth and neat, deep red cup. Good stem and vigorous grower. 5/-.
- COOLIBAH:** 3, J.N.H. This is a wonderful cut flower. The perianth is smooth and the shovel-pointed perianth segments of good substance. The crown, which is large and bowl-shaped, is pale yellow with the edge deep orange, widely flanged and rolled well back. 40/-.
- COOLPORT:** 3, J.N.H. The smooth very overlapping perianth is of splendid texture and the large bell-shaped deep cream cup is beautifully frilled. 2/-.

:: :: ::

Stocks of Miniature Daffodils are unfortunately very low this season. Fresh supplies are coming from England and Holland, and next year a good range of attractive varieties should be available.

MIXED SEEDLINGS

When seedlings flower, only a few are selected for further trial and only a few selected seedlings are finally judged to be a sufficiently clear advance on existing varieties to be worthy of naming. The remainder are described as mixed seedlings. Being the progeny of the best modern hybrids, they include a high proportion of excellent flowers.

60/- per 100.

(Allow postage on 100 Mixed Seedlings at the rate of not more than 11 lb.)
