TERMS OF BUSINESS

All prices quoted are in Australian dollars, and may be paid with personal cheques, money orders or Bank Drafts at the exchange rate applicable on our day of banking. Money with orders please unless by prior arrangement.

Substitute bulbs are only included on the rare occasion when the ordered bulb is not available. The substitute bulb will be of a similar type and of at least comparable standard and price. An indication of any preferred substitute, or if you don't wish to substitute, will help us both.

Any over payment due to exchange or postage difference will be adjusted by the inclusion of extra bulbs.

Receipt of orders will not be acknowledged unless specifically requested.

Invoices will be included in with the bulbs unless you request otherwise.

The parcel should be opened on arrival and bulbs planted as soon as possible into cool ground, or the bulbs should be stored in a cool well ventilated location.

Jackson's Daffodils guarantee their bulbs to be sound and healthy. We will readily replace any lost in the year that they are received.

Other catalogues may list our varieties at prices lower than ours.

We will more than meet their prices - we will charge 10 per cent less.

A GARDEN AND NOVELTY CATALOGUE IS AVAILABLE

Dear Friends and Valued Customers

Summer has been extraordinary, the wettest and coldest ever recorded, with three "once in fifty years" floods. Each of which washed away a farm bridge and covered one patch of bulbs with flood water. Daffodil foliage did not completely die down until January and the bulb roots just did not die at all. It all made lifting and planting very difficult, but produced the largest bulbs and greatest increase we have experienced, some two year down bulbs dug four flowering and six smaller size offsets. We are looking forward to seeing the flowers, will they be abnormally good?, or too coarse and rough?. It certainly proved that daffodils cannot get too much rain water.

This year we hope to realise our ambition of having our catalogue completed by the flowering season without too many glitches.

We released the Mitch bulbs too soon, and although they will flower, they were not up to the high Mitch standard. In future we will hold them for another year post quarantine.

We are looking forward to the N.Z. Daffodil World convention visitors coming to Tasmania and hope you see plenty to interest you. Seedlings are the premier classes in most Tasmanian shows and Tasmania has lots of seedling growers, so there will be many unknown cultivars for you to see!. Luckily the season looks as if flowering may be early. Enjoy the Down - Under as we know we will enjoy your company and learn from your knowledge. Welcome!.

No major changes to our family this year, all are well, and little George continues to delight us all.

Best wishes to you all,

David and Robin

NEW RELEASES 1997

The flower name is first followed by a number which indicates its time of flowering here. No.1 for flowering in August; No.2 for the first week in September; No.3 is for the second week; No.4 for the third week; No.5 for the last week and No.6 for those few flowering in October. The variety's seedling number is in brackets with the last number being the year of its first flowering from seed. Then the variety's parentage followed by stem length and the flower's diameter both measured in millimetres. The number in the description is as close as we can match with the R.H.S. colour chart. The recent written descriptions are as close as we can get using the International Daffodil Registrars descriptive terms.
