DEAR FRIENDS AND VALUED CUSTOMERS,

Another year has disappeared , but what a year it has been , we hope you all have had as happy , healthy , and as interesting year as we have had.

The highlight of our daffodil year would have to be attending the American Daffodil Society's annual convention in Portland Oregon . The Fellowship , the seminars , were all they have been and more ; the delight of meeting overseas friends again , and making more lasting friendships is what daffodils is all about . And I know all the other Australians who attended feel the same way . Congratulations to the A.D.S. .

We were able to enter the American Daffodil Society Challenge Awards in which " the exhibitor must be the hybridizer of each cultivar but need not be the grower ". We had everything going for us . Elise and Dick Havens at Grant Mitch Novelty Daffodils have grown them magnificently , the flowering time was almost at peak , and the convention was a car drive away . Help staging and these advantages allowed us to win two and come second in the three classes we entered against tough competition that had been flown many thousands of miles . We were absolutely delighted . One entry is shown on the front cover.

In the Tasmanian shows our results were patchy . Hobart and Launceston show dates clashed so I went to Launceston . Robin and Amanda showed at Hobart . We only had two on the championship table at Launceston but several at Hobart . Is there a message there ?

Best wishes to you all.

David and Robin

NEW RELEASES 2000

The flower name is first followed by a number which indicates its time of flowering here. No.1 for flowering in August; No.2 for the first week in September; No.3 is for the second week; No.4 for the third week; No.5 for the last week and No.6 for those few flowering in October. The variety's seedling number is in brackets with the last number being the year of its first flowering from seed. Then the variety's parentage followed by stem length and the flower's diameter both measured in millimetres. The colour number in the description is as close as we can match with the R.H.S. 1986 colour chart. The recent written descriptions are as close as we can get using the International Daffodil Registrar's descriptive terms..
