DEAR FRIENDS AND VALUED CUSTOMERS,

Every year another change. We now have a web page www.jacksonsdaffodils.com.au and the catalogue, along with our garden catalogue, and all the colour photos will be on the web page. We are hoping that this will reduce the number of catalogues that we post out. We will send a hard copy to those that require one.

I have done it again!. The name STRIKER has been rejected and so could you change the name to TIWI. Sorry once again.

This year we had the wettest flowering season in the hundred plus years of recorded rainfall then the driest November. So we had excellent flowers, if you could brace yourself against the wind, and the bulbs are great.

Last flowering season was hectic with too many events jammed into too few weeks and so for the first time in over 50 years a Jackson did not compete at Launceston. Next year looks to be even worse.

We hope to see you all at the 2004 World Convention in Melbourne and it's post convention tour of Tasmania, contact us if you need more details.

Jackson bred daffodils again had a successful year on the show bench with best blooms in show to ENTENTE at Hobart, ZIMPLATS at Launceston, GYMPIE at Orange NSW, RENEVATOR at Winchelsea Vic. Division bests with RENEVATOR, EGOTIST, IMPECCABLE, WYONG, FARRAGO, YOWIE at Hobart. FORTESCUE at Launceston. AKALA, DI-HARD, IMPECCABLE at North Island & KURREWA, VERRAN at South Island N.Z. . BANKER & FORTESCUE both in the list of six or more mentions in the USA.

The reminder to Northern Hemisphere customers that most of our cultivars are also available at :- Mitsch Daffodils, P.O. Box 218, Hubbard, Oregon, 97032, U.S.A., Phone:- 503 651 2742, fax:- 503 651 2792, email:- havens@web-ster.com

Our best wishes to you all,

The flower name is first followed by a number which indicates its time of flowering here. No.1 for flowering in August; No.2 for the first week in September; No.3 is for the second week; No.4 for the third week; No.5 for the last week and No.6 for those few flowering in October. The variety's seeding number is in brackets with the last number being the year of its first flowering from seed. Then the variety's parentage followed by stem length and the flower's diameter both measured in millimetres. The colour number in the description is as close as we can match with the R.H.S. 1986 colour chart. The recent written descriptions are as close as we can get using the International Daffodil Registrar's descriptive terms..
