COLOUR CODING

Colour coding has now been adopted by the R.H.S. and will be included in the new Classified List and Register of Daffodil Names to be published by the R.H.S. in conjunction with "Daffodils 1975".

In this Price List, Colour coding is given between brackets immediately following the Division.

For a full explanation of Colour coding I recommend the article on this subject by Dr. Tom D. Throckmorton in "Daffodils 1974". These annual publications also contain all the latest information on Daffodils from all over the world and are vital reading if you are to get the best from your bulbs.

TOREADOR (Richardson) Div: 3B (RRR)

A borderline flower between Divisions 2 and 3. The white perianth, much whiter than expected from its breeding, is formed from broad overlapping petals of great substance.

* TORRIDON (Lea) Div: 2A (RRR)

A sister seedling to "Drumrunie", but slightly smaller; it is a brilliant flower, quite the richest coloured red and yellow I have raised. The perianth is so smooth it might have been ironed. A very consistent and long lasting flower on a tall stiff stem. Practically sunproof. Shown in my winning Engleheart Cup group 1971 and 1973.

Breeding: Seedling x Vulcan

Early season.

ONLY A FEW BULBS FOR SALE.

Price each £13.50. \$31.70.

TORRISH (Lea) Div: 3B (YYY)

A beautiful flower with a smooth, very white, perianth and a small bright yellow cup - a perfect contrast to the perianth. A sister seedling to "Dell Chapel".

Breeding: Suilven x Hamzali

Late season.

Price each £0.50. \$1.15.
