Spring 1989

Our entry into the daffodil business under our own name is marked by mixed emotions. After five years under the generous and patient tutelage of Murray Evans, we are pleased and proud that he thought us worthy to continue the work he loved... and we are sad that Murray could not be with us to celebrate our debut. We are very grateful for Estella's continued participation and support, and we thank all those whose kind words and acts helped us through a time of great personal loss.

Diane now represents the fourth generation of the Evans family to grow daffodils commercially in the Corbett area. Our goal is to continue to develop exceptional daffodils for show and garden and to conduct our business with the same generosity, attention to detail, and personal service that were the hallmarks of Murray's operation for the past twenty years.

We will continue to offer Bill Pannill's introductions and most of Murray's cultivars, and we look forward to bringing more of both to the market from seedling stocks. We appreciate Bill's confidence in us to continue growing and helping to evaluate his outstanding daffodils. And, of course, we are excited about our own fledgling breeding efforts, hoping to offer many of our own introductions in years to come.

As we have much yet to learn, we welcome your comments, suggestions and criticism as we step out on our own. Many thanks for your consideration.

Revised Classification of Daffodils 1977

1. The classification of a daffodil cultivar shall be based on the description and measurements submitted by the person registering the variety, or shall be the classification submitted by such person.
2. Colors applicable to the description of daffodil cultivars are abbreviated as follows: W-white or whitish; G-green; Y-yellow; P-pink; O-orange; R-red.
3. For purposes of description, the daffodil flower shall be divided into perianth and corona.
4. The perianth shall be described by the letter or letters of the color code most appropriate.
5. The corona shall be divided into three zones: an eye-zone, a mid-zone, and the edge or rim. Suitable coded color descriptions shall describe these three zones, beginning with the eye-zone and extending to the rim.
6. The letter or letters of the color code most accurately describing the perianth shall follow the division designation.
7. The letters of the color code most accurately describing the zones of the corona shall then follow, from the eye-zone to the rim separated from the perianth letters by a hyphen. In Division 4, the letters of the color code most accurately describing the admixture of petals and petaloids replacing the corona shall follow in proper order, using 3, 2, or 1 color codes as appropriate.
8. If the corona is substantially of a single color, a single letter of the color code shall describe it.

Using these basic requirements, daffodils may be classified as follows:

DIVISION 1: TRUMPET DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: One flower to a stem; trumpet or corona as long or longer than the perianth segments.

DIVISION 2: LONG-CUPPED DAFFODILS OF THE GARDEN ORIGIN

DIVISION 3: SHORT-CUPPED DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: One flower to a stem; cup or corona not more than one-third the length of the perianth segments.

DIVISION 4: DOUBLE DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: Double flowers.

DIVISION 5: TRIANDRUS DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: Characteristics of *Narcissus triandrus* predominant.

DIVISION 6: CYCLAMINEUS DAFFODILS OF GARDEN ORIGIN

DIVISION 7: JONQUILLA DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: Characteristics of the *Narcissus jonquilla* group predominant.

DIVISION 8: TAZETTA DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: Characteristics of the *Narcissus tazetta* group predominant.

DIVISION 9: POETICUS DAFFODILS OF GARDEN ORIGIN

Distinguishing characters: Corona split for at least one-third of its length

DIVISION 12: MISCELLANEOUS DAFFODILS

All daffodils not falling into any one of the foregoing Divisions.
