Quality and Guarantee — The bulbs offered in this catalog are guaranteed to be of the best available quality, true to name, and of top size or sizes as stated. The only instance where a size less than that stated will be sent is where, due to seasonal growth variation in a particular variety of circumstances beyond our control, we are left with no alternative; and reserve the right to do so. However, if not completely satisfied with your order or any part of it on arrival return it at once for free replacement or refund, as preferred. All Dutch bulbs and plants offered in this catalog are thoroughly examined for their density and soundness by Dutch and American inspectors before leaving our Nurseries in Holland and subsequently certified by an authorized official of the Dutch Government Phytopathological Service Department.

In this Catalog you will see that a number appears in front of the variety. When ordering, we would be very grateful if you would please quote this number in the column provided on the order form. As every effort is made to insure that the color reproductions in our catalog are accurate it should be appreciated that on occasions slight variations may occur, due to certain limitations in color printing.

Naturalizing Daffodils in Grass, etc. Most Daffodils are suitable for naturalizing but in very heavy soils preference should be given to stronger growing kinds e.g. Trumpet varieties and many Large-Cupped. They are all admirably adaptable for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately, scattered on the ground and planted where they fall.
