The giant, double-nose Daffodil bulb on the left will produce 2 or more flowers. The smaller single-nose landscape size produces one.

Only the Best are chosen for Park's Customers

The largest bulbs of the finest, best-performing varieties are yours when you deal with Park. There is a significant difference!

Most Daffodil bulbs sold produce only one bloom (Landscape size bulbs). However, Park's Daffodils are giant, double-nosed bulbs that will give you an average of two and one-half blooms per bulbs (some will produce two and some three.) While slightly more expensive per bulb,

they represent a real value—the cost per flower is actually less! They are ideal for planting where you want concentrated color. Get a spectacular show in your garden yet dig only half as many holes!

Park's Tulips, Hyacinths and other bulbs are top size, of the finest quality and produce the largest flowers and more of them. They are produced by the world's best growers, men who take pride in superior quality.

Our customer, Janie Taylor, of Greenville, S. C. writes:

"Thank you for the lovely color you have added to our yard . . . and our lives. Our double nosed bulbs arrived promptly and due to your careful packaging, in good condition. We have healthy, beautiful flowers and if your directions for the care of our bulbs are followed, we will enjoy them for years.

Again, thank you for your prompt service and for our pleasure of adding to God's already beautiful world!"
