We send our hearty congratulations to all the members, and best wishes for every continued success, and a warm welcome to the visitors from home and overseas to the centenary celebrations.

We also welcome you to our 1998 publication of the Bulbs we have to offer, you will find many additions to the collection, some new and exciting introductions that have been raised by us, also for those of you who are interested in the Daffodils of yesteryear we have included a number of older varieties.

By popular demand we have included a page under the C.A.B.G.A. Collection, for varieties that are available in much larger numbers. These are listed for sale by weight and admirably suited for mass planting or for Garden Club special offers.

## System of Daffodil Classification

- Division 1. Trumpet Daffodils = The trumpet or corona is as long or longer than the perianth segments.
- Division 2. Large Cup = The cup or corona is less than the length of the perianth but more than a third.
- Division 3. Small Cup = The cup or corona is less than a third of the perianth.
- Division 4. Double Daffodils = This is for double flowers and also includes flowers that are doubled and have more than one bloom to the stem.
- Division 5. Hybrid Daffodils that have the n.triandrus characteristics.
- Division 6. Hybrid Daffodils that have the n.cyclamineus characteristics
- Division 7. Hybrid Daffodils that have the n.jonquilla characteristics.
- Division 8. Hybrid Daffodils of the Tazetta group.
- Division 9. Hybrid Daffodils that have the n.poeticus characteristics.
- Division 10. This for all Species and Wild forms.
- Division 11. Is for Daffodils with the cup or corona that is naturally split or separated usually for more than a half of its length. (Not to be confused with varieties that have deeply goffered cups or pronounced frills).
- Division 11a. Collar Daffodils = Are with the corona segments opposite the perianth segments; with the corona segments usually in two whorls of three.
- Division 11b. Papillon Daffodils = Are for those with the corona segments alternate to the perianth segments; the corona segments usually in a single whorl of six.
- Division 12. Is for Daffodils that cannot be classified within the foregoing classes.

For many years Daffodils have been letter coded to assist in the identification of colours, this system is used within the catalogue. You will see 9W-GYR(L) "Cantabile", this defines the variety as from Division 9 and has a white perianth with green centre, a yellow middle zone, and a red rim to the cup or corona. A single letter will denote it to be one colour. W = white, Y = yellow, G = green, R = red, P = pink, O = Orange, (E) = Early season, (EM) = Early Mid, (M) = Mid, (LM) = Late Mid, (L) = Late, W = Winter Flowering.

## Cultural Notes

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

NEW INTRODUCTIONS FOR 1998

**"Arwenack"** 11AY-YYO(EM) S224 (Brandaris x Paricutin). The broad, smooth and flat perianth is well overlapped and a bright Golden Yellow, and is an excellent foil to the six coronal segments opposite and closely overlying the perianth, the outer zone being slightly frilled and deeper orange tone, the plant is vigorous and flowers of a good show quality .....each £6.00

**"Bedruthan"** 2W-YYR(L) S521 (High Society x Raspberry Ring). A large flower of different style in this colour combination which has been much admired for several years under the seedling number, it is a good show bloom with a broad well overlapping perianth and neat funnel shaped corona that ends in a lovely dark red rim.....each £14.00

**"Bethal"** 3Y-Y(LM) S342 (Aircastle x Montego). When first shown this interesting variety won Best Bloom in the Southwest Championship class. I think it has improved since then and last year was to gain a top place at the National show in its class. The flower opens with a whitish yellow to the broad perianth and soon develops in colour to become a lovely citrus lemon tone throughout ....each £15.00

**"Dragon Run"** 2W-R(M) S147 (Hotspur x St. Anns). Not a large flower at 83mm, but big in other ways, the perianth is broad and round, of pure white to show off the rich dark red corona to it's best, as a show flower it has won its class at the early national show, recieved a best bloom and won several times here in the Southwest.....each £12.00

**"Gemini Girl"** 2W-P(EM) S371 (Chenoweth x Kirklington). The main stock of this pretty flower had been purchased and named by the Hough family. We are very pleased continue to offer this delightful variety to you. It has been well liked and admired for several years when shown on our displays . The plant is strong and vigorous, with a broad flat and smooth perianth of clear white and a rosy pink corona, well suited for the special spot in the Garden or for show .....each £5.00

**"Golitha Falls"** 2W-W(LM) S71 (Pitchroy x Dailmanach). The large flowers are held well on strong stems. It is a particularly vigorous plant as well as a superb show variety. The perianth is very smooth of pure white with a 3/4 length corona to nicely balance the bloom. I have featured this many times in my collections and displays .. .....each £15.00

**"Gorran"** 3W-YYR(LM) S196 (Corofin x Kimmeridge). Here is a large flower with ovate perianth that is well overlapping and quite acute at the tips. The brightly coloured flatish cup is yellow with a dark red rim. It has won its class several times here in the Southwest and done well in other regions as a pre-released seedling, a very prolific flowerer and a rapid increaser. A large stock permits our low introductory price .....each £5.00 or 3 for £10.00

**"Greatwood"** 1Y-Y(M) S305 (Ormeau x (St. Keverne x New Zealand 1Y-Y seedling)). We bred this from parents that possessed the strength and vigour that is looked for in good Daffodils, St. Keverne seems to resist basal rotting and the N.Z. seedling had the form and breadth of perianth of a top show flower. We think this variety inherits the best of all of these, and is already proving to be a consistant show variety. The flower colour is of Dark golden yellow and stands well above the foliage on long strong stems .....each £12.00

**"Halvasso"** 6W-W(EM) S138 (Knothead x *n.cyclamineus*). A delightful little plant and flower, pure white throughout with a naturally reflexing perianth. The long corona is slightly open at the mouth and with frill to the rim. It is dwarf in stature but I do not think it will qualify in the miniature classes for show, but never the less a super plant for the rockery or for show.....each £10.00

**"John's Delight"** 3W-YYR(M) S316 (Corofin x Kimmeridge). The main stock of this was aquired and named by the River Society, it is a superb variety for cutting, being most prolific in bloom and a very vigorous plant but also has been much admired as a winning show flower on the benches here in the West Country. We are pleased to able to introduce and continue to offer this variety to you .....each £6.00

**"Lewis George"** 1Y-Y(E) S55 (Viking x Ristin). This very smooth and bold flower is early and well suited both to the early show where it has been particularly successful. Also to the garden where some early spring colour is desired, a fine bold flower of quality, a rich gold in colour, and a good plant .....each £7.50

**"Lundy Light"** (L) S377 (Polbathic x Loch Lundy). Here is a large show quality flower with a broad well overlapped perianth of rich golden yellow. The cup is well balanced of solid bright red, excellent poise on long stems. A very vigorous plant and rapid increaser, we have large stocks of this.....each £5.00 or 3 for £12.00

**"Manaccan"** 1W-W(LM) S33 (Pitchroy x Dailmanach). We first flowered this in 1986 and have observed its development over the years. Many have been pre-released under number, and reports have been most encouraging with many show successes. It is a large flower with broad overlapping perianth segments of pure white, the long corona opens with a pinkish undertone but goes very white on maturity, a very strong and vigorous plant. ....each £10.00

**"Poppy's Choice"** 4Y-R(LM) S484 (Golden Aura x Menabilly). The perianth and petaloid segments are in a number of whorls prominently mucroid, and a very dark yellow with the coranal segments deep red. A good show bloom with several successes nationwide, the flowers last a long time. It is a strong plant and makes large bulbs .....each £7.00

**"Probus"** 1Y-Y(M) S57 (Viking x Ristin). This is a very vigorous plant that produces many fine, bold flowers of rich golden colour. The perianth is broad and rounded with a long well balanced trumpet. An excellent variety for cutting, garden display or for show. We have a large stock to permit the low introductory price.....  
.....each £5.00 or 3 for £12.00

**"Rosmerryn"** 2W-P(LM) S173 (Rose Royal x Dailmanach). The rate of increase of this is truly amazing with this very prolific variety, making it a fine flower for cutting and for the discerning gardener. The very smooth, chalky white perianth is broad and well overlapped, a little pointed but shows off the large pale pink cup to its best. It is also a useful bloom on the show benches .....3 for £7.00

**"St. Budock"** 1Y-Y(M) S140 (St. Keverne x Golden Aura). This is another we have grown for some years. It is a rich golden yellow throughout, with a smooth, broad well overlapped perianth, excellent poise, very prolific bloomer and has been much admired in our field. The flowers are medium in size and resist the weather well making it the ideal flower for cutting, garden display and for showing .....  
.....each £5.00 or 3 for £10.00

**"Tehidy"** 3Y-YYR(M) S334 (Aircastle x Montego). The flower of perfect form and balance with broad rounded perianth segments of lovely soft yellow, with a neat small cup rimmed in bright red. A strong vigorous plant that gives a large number of fine show blooms .....each £15.00

**"Wheal Jane"** 2W-W(LM) S245 (Pithroy x Canisp). A large pure white flower that is of good substance and a very broad smooth perianth, excellent poise and form to give a useful show flower. **"Cotehele"** 1W-W. Mid-season. When first shown at the R.H.S. show received good reception although only placed in the lesser prizes, and is not as refined as it might be, it can and does produce some nice quality flowers .....£1.00

**"Euryalas"** 1Y-Y(EM) S283 (St. Keverne x Ristin). Excellent show variety and strong plant that exudes the vigour of St. Keverne and the refinement of Ristin. The perianth is broad and well overlapped with a long corona that is well balanced and has a gently expanded mouth. ....each £6.00

**"Gwennap"** 1Y-Y (Empress of Ireland x Fine Gold) S136. Early mid-season. This is a plant that has the vigour of (E.G.) and is a large bold pale flower of the (E of I) style, very broad and smooth, but inclined to hang its head - when corrected it is a super flower .....each £5.00

### DIVISION 3 - SMALL CUPS

**"Aintree"** 3W-O. Early mid-season. Bred by John Williams (Park Springs x Shinning Light). This is an excellent show variety with smooth, chalky white broadly overlapping perianth segments, good poise, a neat goblet shaped cup of rich orange, at maturity the perianth does take slight reflex in a manner similar to its parent. An excellent plant and fine flower both for show or the garden. ....£4.00 each or 3 for £10.00

**"Cheesewring"** 3W-WWY(L) S486 (Cool Crystal x Delos) This flower is large and of good show form. The broadly ovate perianth shows off the shallow bowl shape corona which is pale primrose yellow and white at the base. Tall stem, also excellent as a cut flower.....each £8.00

**"Crenver"** 3W-GYR. Late season. This is a very old variety that is very sweetly scented. The perianth opens a greenish white but soon whitens out to show off the poeticus style of corona and could well be useful for further breeding of the poeticus style of flower.....£2.00

**"Feock"** 3W-YR (Corofin x Kimmeridge) S93. Late mid-season. Shown in my winning collection at the County Festival Show, and has been much admired by several knowledgeable experts for several years. **"Greenodd"** 3W-YYW. Late season. (Reg Nicholl) No 17/86. Bred and raised by Reg Nicholl, this was a seedling that he sent to me and has been much admired at National level. The plant is vigorous and the stem is tall and stiff. Apart from the impeccably smooth perianth and very pretty bowl shaped cup, it is the very pronounced green in the throat of this flower that makes it a super show flower and a must for the exotic flower arrangements .....SOLD OUT

**"Trident"** 3W-YYR. Late mid-season. (Previously known as "Bella Vista") This is a tall, very robust plant with a flower of brilliant colouring. **DIVISION 5 - TRIANDRUS HYBRIDS**

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

**"Budock Bells"** 5W-W(L) S98 (Broomhill x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potential .....each £6.00

**"Cariad"** 5Y-Y(LM) S137 (Debutante x *n.triandrus albus*). First exhibited and winning its class under number 1-44-79 at the National Shows in 1986, this has continued to impress each year. The stem is short and sturdy and holds the twin headed flower in perfect drooping poise for this division. The soft yellow, smooth perianth is broadly ovate and well overlapped with a slightly expanded goblet cup of the same colour. An added bonus is that this cultivar does on occasion set seed. ....£15.00

**"Tater Du"** 5W-Y (Penril x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma excerpted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits. ....each £8.00

## DIVISION 6 - CYCLAMINEUS HYBRIDS

**"Betsy MacDonald"** 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind. ....each £10.00

**"Carclew"** 6Y-Y (St Keverne x *n.cyclamineus*) S6 Early season. An undisputed Division 6 which has been much admired both at shows and in the field trial beds, the perianth segments are narrow and fully reflexed, the flower is of bright golden yellow, held on a short neck and stiff stem, and is an ideal plant for the windy situation. ....each £4.00

**"Kea"** 6W-YP (Jenny x 2W-P seedling) S217. Late mid-season. Successfully shown at the R.H.S. under number 1-2-80. This has a good cyclamineus form, the colour could be better, and does need a little time to develop. .... each £5.00

**"Penril"** 6W-O. Mid-season. Another seedling acquired from Brian, this is a much shorter plant and has a typical cyclamineus growth habit. The perianth is not quite pure white but does reflex naturally and the slightly expanded goblet cup is a most interesting coppery orange tone, a very good plant admirably suited to the garden or show. ....5 for £2.50

**"Percuil"** 6Y-Y (St Keverne x *n.cyclamineus*) S3. Early season. A true Division 6 flower with narrow naturally reflexing perianth segments and a typical trumpet, short stemmed and very nice in pots. ....£4.00

**"Princess Alexander"** 6W-W (E) (*n.cyclamineus* x Woodgreen) This excellent variety was raised at Rosewarne, and the stock acquired and built up by one of the counties most noteworthy growers. For a number of years this has been much admired by knowledgeable experts and we are now pleased to be able to offer this to you. The style and form of this superb variety is quite typical of this division with a natural reflex to the narrow pure white perianth, the long and slender corona opens a pale creamy yellow but soon matures to a toning white. ....each £4.50 or 3 for £12.00

**"Princess Diana"** 6W-Y (E) (*n.cyclamineus* x Trousseau) Also raised at the Rosewarne station, the stock had been built up here in Cornwall and now permits a limited release, the flower is a touch larger with a slightly expanded corona of lovely soft creamy yellow. It is a superb plant for the discerning gardener and does make a fine flower for floral arrangements or show. ....each £7.50 or 3 for £20.00

**"Roscarrick"** 6W-P. Late season. Raised by Brian Duncan, this is a seedling stock that I purchased some time ago, and is a particularly fine plant that increases well and is a pretty flower, much admired by all who see it. A little large for some Division 6 critics, but has had many successes on the show benches both here in Cornwall and at national level - very smooth lovely colours. .... 3 for £4.00

**"Sumo Jewel"** 6Y-Y (Arctic Gold x *n.cyclamineus*) S213 Early season. A sturdy plant with lovely graceful flowers that last a long time on the plant, the reflexing perianth segments of deep yellow do have a slight twist, and the long and narrow

waisted trumpet is neatly flanged at the mouth, all to make this a perfect flower for both show and garden. ....each £3.00

**"Trehane"** 6Y-Y (St Keverne x *n.cyclamineus*) S212. Early season. Another good Division 6. A strong plant that produces many fine blooms that last a long time on the plant. ....each £3.50

**"Treverva"** 6Y-Y (Foresight x *n.cyclamineus*) S2. Very early season. Very early to flower - not the best of show form but a true Division 6 character, very nice in arrangement when picked young. The flower is small but grows when left on the plant. ....3 for £4.00

**DIVISION 7. JONQUILLA HYBRIDS.**

This Jonquilla section is for hybrids that have been bred with the species *n.jonquilla*. The resulting plants vary in stature from quite dwarf to very tall, however they are generally on good stiff stems that can stand a fair amount of wind. Most of the stems do have several flowers on each and without exception all are sweetly scented, which makes them ideal for indoor decoration.

**"Boscastle"** 7Y-Y(L) S111 (Aircastle x *n.jonquilla*) 2 or 3 sweetly scented flowers to a stem with broad smooth and well overlapping perianth segments make this an ideal show quality flower, bulbs often give secondary stems which can only add to its benefits as a perfect plant for the garden or cutting .....each £5.00

**"Kit Hill"** 7Y-YWW(L) S107 (Aircastle x *n.jonquilla*) Stems usually with two sweetly scented florets, very smooth and soft pale yellow perianth segments and a neat round cup that fades to ivory white, this flower has already won its class on several occasions and much admired in our trials .....each £5.00

**"St. Piran"** 7W-Y (Aircastle x *n.jonquilla*) S108 Late season. Like our Cornish Saint this flower has been much revered, it has had some good success on the show benches when under number, it is also a particularly good plant and well suited to the garden and stands the weather well, like most in the jonquilla section has a delightful scent, usually two or three florets on the stem. ....each £2.50

**"Sweet Blanche"** 7W-W (M) S220 (Grand Prospect x *n.jonquilla*) Most stems have only one flower but the bulbs will send several secondary stems thus extending the flowering period, this makes for perfect cut or garden variety although it has won its class at national level as a seedling. The scent is sweet and the perianth smooth and opens a soft creamy yellow which usually fades to white. Very long lasting .....each £1.00 or 3 for £2.50

**"Treble Two"** 7Y-GYY(LM) S222 (Aircastle x *n.jonquilla*) Named at the request of several admirers of this flower. It has been successfully shown under number for many years. Two or three large rounded flowers to the stem, smooth and very broadly overlapped. A good show flower .....SOLD OUT

**"Wheal Coates"** 7Y-O(M) S416 (Pinza x *n.jonquilla*) This is a lovely flower of show quality, beautifully scented and a rounded well overlapped perianth with shallow cup of bright orange, usually two flowers to each stem, with bulbs sending many secondary stems to extend the season. We have a good stock .....each £5.00

**"Wheal Kitty"** 7W-W (Handcross x *n.jonquilla*) S219 Early season. Named at the suggestion of several noted growers as an ideal plant for the garden, the stem is short and stiff and the flower stands well in bad weather, like many from this division a great many secondary blooms are produced to extend the flowering period, the flowers open with yellow undertone but soon fades out to a clear chalky white, the perianth is broad and sometimes take on a little twist when mature, it has been exhibited with some success and we see no reason why it should not continue to do so. ....3 for £2.50

**Division 8. The Tazetta Hybrids.**

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"**Hugh Town**" 8Y-O(VE) Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you .....each £1.25, 3 for £3.30 or 10 for £9.90

## Division 9. The Poeticus Hybrids

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

"Colville" 9W-GYR (Corofin x Crenver) x Crenver) S131 Late season. Named at the request of several enthusiasts, this flower has already featured in the prize winners on several occasions, the perianth opens with greenish undertones, but soon whitens to form a good foil for the brilliantly coloured corona, like all flowers of this kind it will not tolerate the sun and does need to be picked young. ....each £7.00

## DIVISION 10 - The Species and Wild forms

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.

### DIVISION 11- Split Corona or Collar Daffodils

This strain of Daffodil has been developed in Holland by Mr. Jaap Gerritson and has been his lifetime work for which he is justly renowned. Here we have a selection of the very best available plus several new and exciting varieties that I have bred and successfully shown over the years

**"Bosbigal"** 11a Y-O (Brandaris x Paricutin) S315 Early season. The perianth is broad and well overlapping, a little pointed, and the coronal segments are evenly split and laying flat to the perianth, a vigorous plant and very colourful flower of good show form.....3 for £4.50

**"Boscoppa"** 11a Y-O(M) S293 (Obelisk x Tamar Fire) This is a plant of strong vigorous growth - a stiff tall stem that holds the flower with broad overlapping perianth segments, the corona is evenly split and lays flat in six segments to almost cover the length of the perianth, many show successes, we predict this new and exciting variety will have a great future. ....each £10.00

**"Bosinney"** 11a W-WPP(M) S333 (Pearlax x Audubon) A flower that has been much admired under trial, the stems are only of a medium length and flowers seem to resist the weather, to make this the perfect plant for the garden. The perianth is somewhat acute though well overlapped and shows off the very pretty slightly frilled corona to its best. ....each £4.00

**"Boslowick"** 11aY-O (Gironde x Paricutin) S225. Mid-season. A tall strong plant with a flower of good colour. The perianth is broad and flat, slightly pointed at the tips, with an evenly split cup laying flat against each segment, (was featured on "Gardens for all" programme on TSW).....each £2.50

**"Carnyorth"** 11aY-R(EM) S117 (Brandaris x Paricutin) The flower appears to last an extraordinary long time and seems to stand the weather, I have used this for show for many years and has many top awards to its credit. The perianth is slightly pointed but flat and well overlapped with a flat evenly split corona, highly recommended.....each £9.50

**"Gillan"** 11aY-YOO(LM) S411 (Brandaris x Falstaff) Has oval perianth segments that are well overlapped of rich yellow. The corona is split into six segments opposite and closely overlying the perianth that are orange with yellow tones towards the centre - large stock available .....each £5.00

**"Gunwalloe"** 11aY-R(LM) S291 (Brandaris x Falstaff) This very brightly coloured flower has been selected for its vigour and suitability for show, garden or cut flower. I have successfully shown this for several years. The perianth is broad and well overlapped to show off the round flat evenly split corona to its best. ...each £4.00

**"Max"** 11aY-YRR(M) S412 (Gironde x Falstaff). Affectionately named after my mother Mary Louise, this is we believe to be one of the best Collar Daffodils yet available. The vigour of this plant is inherited and clearly evident from both the parents, as is the neatness of the round flat coronal segments, beautifully enhanced by the broad well overlapped perianth. A super show flower that we believe will be much sought after .....£20.00
