WHITELEY GEM , (Brodie). This daffodil was awarded the Gold Medal for the best new variety at the London Daffodil Show, March 1928. It is extremely early, by far the earliest of the red-cups to flower on our farms. On a very tall stem the flower is beautifully balanced, the proportions of perianth and cup are very pleasing. The perianth is not much overlapping but of great substance. The colouring is very fine, deep golden-yellow for the perianth and a bright orange for the finely fluted cup. We recommend this daffodil most strongly for hybridising purposes as its extreme earliness makes it very valuable for the forcing trade. Also for general garden use it should be most satisfactory as this extreme early flowering daffodil prolongs the season of the red cups, about two weeks. A.M.H. 1931	10/-	each

Daffodils and Narcissi for Naturalizing

Our mixtures are especially made up from named varieties and are greatly superior to the cheap mixtures frequently sold. We do not grow any mixed Daffodils and we only select varieties that are especially adapted for naturalizing. They may be relied upon to give an abundant supply of flowers over a long period.
